Women's Barracks Tereska Torres,2011-01-01 First Digital Edition; Grier Rating: A*** This is the true-life story of what happens when scores of young girls live intimately together in a French military barracks. Many of these girls, utterly innocent and inexperienced, meet other women who have lived every type of existence. Their problems, their temptations, their fights and failures are those faced by all women who are forced to live together during dangerous and stressful times. The girls who chose Tereska Torres, the author, as their confidante poured out to her their most intimate feelings, their secret thoughts. With all of its revelations and tenderness, *Women's Barracks* is an important book because it tells a story that had never been truly told before--the story of women in war. It also has the special distinction of being the first "lesbian pulp" novel ever published and became a record-breaking bestseller. This autobiographical novel takes place in London, England during World War II. The terror of the V-1 and V-2 rocket bombings, and the resulting fires and destruction, are an unknown experience to most readers. The women enduring these events were not even 20 years old when they first arrived. Many volunteered to be there. They were French, or of French heritage, and wanted to be part of the effort to help protect France from invasion by the Nazis. Throughout it all, passions flare, long-standing taboos are tossed to the wind, and passionate relationships are begun between older, more experienced butch officers and the young, inexperienced femme girls under their charge. In her telling of these women's stories, Torres remains nonjudgmental of the lesbian relationships these women explored. Perhaps as a result, *Women's Barracks* was banned in several states for being obscene. The House Select Committee on Current Pornographic Materials denounced the book in 1952 as an illustration of how the newly emerging paperback industry was breeding and promoting moral depravity. By today's standards, of course, the book is somewhat tame; however, the eroticism and honesty with which Torres writes immerses the reader in the love, tenderness, loyalty and passion that women share with each other.

Battle Hymn Col. Dean E. Hess,2017-07-19 The explosive, true story of a man of God turned fighter pilot who fought and prayed his way through 300 combat missions and two wars. Author Dean E. Hess is the subject of this inspiring autobiography, *Battle Hymn*, first published in 1956, which tells of his experiences as a U.S. Air Force colonel, including his involvement in the so-called "Kiddy Car Airlift" during the Korean War on December 20, 1950. With the airfield over capacity, Hess sent Korean orphans to an orphanage in Seoul. When the North Korean forces began to capture the city, Hess reportedly organized 15 C-54 Skymaster aircraft to airlift 950 orphans and 80 orphanage staff from the path of the Chinese advance to safety on Jeju Island. When Hess departed Korea in June 1951, a new orphanage on this island held over 1,000 Korean children. The book later served the basis for the 1957 film of the same name, where he was played by Rock Hudson. "Stirring"—San Francisco Chronicle "In his career as a war correspondent Quentin Reynolds has met his share of heroes, but few of them, he says have impressed him as deeply as Col. Dean E. Hess."—Readers Digest "Twentieth century American soldiers, sailors, airmen and Marines have enjoyed a warm reputation for caring about the children of the lands they have fought in. Col. Dean E. Hess—Air Force humanitarians—well represents this tradition."—The Times Magazine

Securing the Future of U.S. Air Transportation National Research Council, Transportation Research Board, Studies and Information Services, Division on Engineering and Physical Sciences, Aeronautics and Space Engineering Board, Committee on Aeronautics Research and Technology for Vision 2050, 2003-12-18 As recently as the summer of 2001, many travelers were dreading air transportation because of extensive delays associated with undercapacity of the system. That all changed on 9/11, and demand for air transportation has not yet returned to peak levels. Most U.S. airlines continue to struggle for survival, and some have filed for bankruptcy. The situation makes it difficult to argue that strong action is urgently needed to avert a crisis of undercapacity in the air transportation system. This report assesses the visions and goals for U.S. civil aviation and technology goals for the year 2050.

A narrative of needle-nosed rocket powered ships flying at blistering speeds, it is also the moving testament of a man risking his life to push back the frontiers of scientific knowledge. Like St.-Exupéry, Bridgeman is capable of describing the vastness and beauty of the skies. But as America's foremost experimental test pilot, he is constantly aware of the multitude of technical information which he is called upon to use at any given instant. After the war, Bill Bridgeman left the Navy a restless man. Seeking action, he joined Douglas Aircraft as an engineering test pilot. Soon he was asked to take over the final stages of the Skyrocket testing program. The Skyrocket, a javelin-shaped experimental rocket powered ship, was a challenge to Bridgeman. The story of his day-by-day life with the plane is the substance of THE LONELY SKY. Bill Bridgeman died in an airplane accident in 1968.

U.S. Marine Corps Aviation Peter B. Mersky, 1998 In the 1980's, the Marines are still as air-minded as ever, earning a unique place for themselves in aviation history. They have always excelled in the close support of infantry. In fact, every Marine aviator has been trained to be a rifleman first. This attitude has permeated the history of Marine Corps aviation and have led to the creation of the well-trained, purpose-built combat arm that goes to sea today. Additionally, more than any other service, the U.S. Marines have been quick to adapt and exploit helicopters to assist their infantry in battle. In this, the first history of Marine Corps aviation, Peter Mersky tells about the pilots who carried on the Marine Corps tradition of first to fight from Henderson Field on Guadalcanal, the Chosin Reservoir in Korea, and the metal airstrip at Khe Sanh in Vietnam. Aircraft of the Marine Corps are illustrated in this story, from the very earliest days to the present, with more than 200 rarely seen photographs and the author's own drawings.
