The Origins of Monsters David Wengrow, 2020-04-28

It has often been claimed that monsters--supernatural creatures with bodies composed from multiple species--play a significant part in the thought and imagery of all people from all times. *The Origins of Monsters* advances an alternative view. Composite figurations are intriguingly rare and isolated in the art of the prehistoric era. Instead it was with the rise of cities, elites, and cosmopolitan trade networks that monsters became widespread features of visual production in the ancient world. Showing how these fantastic images originated and how they were transmitted, David Wengrow identifies patterns in the records of human image-making and embarks on a search for connections between mind and culture. Wengrow asks: Can cognitive science explain the potency of such images? Does evolutionary psychology hold a key to understanding the transmission of symbols? How is our making and perception of images influenced by institutions and technologies? Wengrow considers the work of art in the first age of mechanical reproduction, which he locates in the Middle East, where urban life began. Comparing the development and spread of fantastic imagery across a range of prehistoric and ancient societies, including Mesopotamia, Egypt, Greece, and China, he explores how the visual imagination has been shaped by a complex mixture of historical and universal factors. Examining the reasons behind the dissemination of monstrous imagery in ancient states and empires, *The Origins of Monsters* sheds light on the relationship between

culture and cognition.

Mathematical Demography David P. Smith, Nathan Keyfitz, 2013-07-23 Mathematical demography is the centerpiece of quantitative social science. The founding works of this field from Roman times to the late Twentieth Century are collected here, in a new edition of a classic work by David R. Smith and Nathan Keyfitz. Commentaries by Smith and Keyfitz have been brought up to date and extended by Kenneth Wachter and Hervé Le Bras, giving a synoptic picture of the leading achievements in formal population studies. Like the original collection, this new edition constitutes an indispensable source for students and scientists alike, and illustrates the deep roots and continuing vitality of mathematical demography.

Understanding Human Sexuality Janet Shibley Hyde, 2022

Not Afraid Daniele Bolelli, 2015-12-01 In this memoir, the author and podcaster discusses his experiences in martial arts, the death of his wife, and raising his daughter as a single father. This book is a meditation on facing fear, heartbreak, and mortality. In his own irreverent and inimitable style, Daniele Bolelli tells the story of his courtship and marriage, which would have been a sweet story had all hell not broken loose. Or as he puts it, "Hell was a ninja who entered my house without being seen. It all began in such an unremarkable way that it barely registered as anything meaningful. Little did I know that the experiences of the next five months would rip me apart and kill me. They would re-forge me into a different man. On that day, I

became an unwilling traveler on a journey through the heart of fear.” This is the story of a man who, in rapid succession, has his wife die in his arms, loses his house and his job, and is left to care for his nineteen-month-old daughter. Oddly enough, the best tools for coping with all of this were those he learned in more than two decades of martial arts practice. Not Afraid tackles this extremely heavy subject matter in a light-hearted style and with an attitude that acknowledges pain and suffering but denies them dominion over one’s life. Praise for Not Afraid “Not Afraid is an adventure story of the truest, deepest sort. You’ve never read a story like this or known a man like this.” –Chris Ryan, New York

Times–bestselling author of Sex at Dawn “A true warrior poet, Daniele bleeds on these pages with fearless vulnerability and uncensored humor.”

–Aubrey Marcus, writer and CEO of Onnit.com

“Bolelli is a genius warrior philosopher. What he talks about here is the opposite of a victim’s mentality. By sharing the emotionally apocalyptic experience he has gone through, he gives a gift to anyone who is struggling with the dragon of fear and sadness.” –Duncan Trussell, comedian and host of the podcast The Duncan Trussell Family Hour

Of Green Illusions Clifton Lopez,

Applied Regression Analysis and Generalized Linear Models John Fox, 2015-03-18 Combining a modern, data-analytic perspective with a focus on applications in the social sciences, the Third Edition of Applied Regression Analysis and Generalized Linear Models provides in-depth coverage of regression analysis, generalized

linear models, and closely related methods, such as bootstrapping and missing data. Updated throughout, this Third Edition includes new chapters on mixed-effects models for hierarchical and longitudinal data. Although the text is largely accessible to readers with a modest background in statistics and mathematics, author John Fox also presents more advanced material in optional sections and chapters throughout the book. Accompanying website resources containing all answers to the end-of-chapter exercises. Answers to odd-numbered questions, as well as datasets and other student resources are available on the author's website. NEW! Bonus chapter on Bayesian Estimation of Regression Models also available at the author's website.

Create Your Own Religion Daniele

Bolelli, 2013-01-01 Create Your Own Religion is a call to arms--an open invitation to question all the values, beliefs, and worldviews that humanity has so far held as sacred in order to find the answers we need to the very practical problems facing us. Writer, philosopher, and professor of comparative religion, Daniele Bolelli, leads the reader through three thousand years of mythology, misogyny, misinformation, and the flat-out lies about revealed truth that continue to muddle our ability to live a peaceful life, free of guilt and shame and the ultimate fear of death. Our worldviews are in desperate need of some housecleaning, says Bolelli. We enter the 21st century still carrying on our backs the prejudices and ways of thinking of countless past generations. What worked for them may or may not

still be of use, so it is our job to make sure to save the tools that can help us and let go of the dead weight.

Neurotransmitters, Drugs and Brain Function Roy Webster, 2001-11-28 *Neurotransmitters, Drugs and Brain Function* aims to link basic aspects of the activity of neurotransmitters at the receptor and synaptic level with their role in normal brain function, disease states, and drug action. Thus, the material considers to what extent our knowledge of the central synaptic action of certain drugs can explain their possible roles in the cause of diseases and in the modes of action of drugs effective in those conditions. It offers a working explanation of drug and neurotransmitter action in CNS function, with a clear, comprehensive, and challenging style of writing. The authors review the chemical basis for drugs and the conditions they treat. It also, includes numerous illustrations and schematic diagrams.

Pediatrics Steven P. Shelov, 1996 *ere* is a concise, practical guide for third year medical students seeking to make the most of their pediatric clinical clerkship. Stressing logical, efficient problem solving, differential diagnosis and implementation of treatment, the text also helps the reader understand the distinctions between ambulatory and in-patient settings

Population Issues Leo J.G. van Wissen, Pearl A. Dykstra, 2012-12-06 This volume marks the end of an eight-year program of research on population issues, launched in 1990 by the Netherlands Organization for Scientific Research: The NWO Priority Program on Population Issues. Initiatives

for this program of research were taken over ten years ago by Hans Van Ginkel-who became the first program chair - and Dirk Van De Kaa. The Dutch community of population scientists is deeply indebted to them for their early efforts. At the time, the program carried the name Between Individual Development and Social Solidarity: Population and Society in a Period of Transition. The goals of the Priority Program were threefold: To reduce the fragmentation of research on population issues; to increase collaboration among population researchers with different disciplinary backgrounds; and to strengthen the position of population studies in Dutch academe and in international forums. Looking back over eight years of programmed research, we can safely say that the Priority Program has given an enormous impetus to population research in the Netherlands - as this volume attests. This program of research could not have been carried out successfully without the valuable contributions and constructive input of a large group of scientists. The scope and the focus of the Priority Program were defined by a preparatory committee chaired by Gerard Frinking.

Families and Food in Hard Times Rebecca O'Connell ,Julia Brannen,2021-05-24 Food is fundamental to health and social participation, yet food poverty has increased in the global North. Adopting a realist ontology and taking a comparative case approach, *Families and Food in Hard Times* addresses the global problem of economic retrenchment and how those most affected are those with the least resources. Based on

research carried out with low-income families with children aged 11-15, this timely book examines food poverty in the UK, Portugal and Norway in the decade following the 2008 financial crisis. It examines the resources to which families have access in relation to public policies, local institutions and kinship and friendship networks, and how they intersect. Through 'thick description' of families' everyday lives, it explores the ways in which low income impacts upon practices of household food provisioning, the types of formal and informal support on which families draw to get by, the provision and role of school meals in children's lives, and the constraints upon families' social participation involving food. Providing extensive and intensive knowledge concerning the conditions and experiences of low-income parents as they endeavour to feed their families, as well as children's perspectives of food and eating in the context of low income, the book also draws on the European social science literature on food and families to shed light on the causes and consequences of food poverty in austerity Europe.

Risking the Future Panel on Adolescent Pregnancy and Childbearing, National Research Council, Cheryl D. Hayes, 1987-01-15 Abstract: This book presents the findings, conclusions, and recommendations of the Committee on Child Development Research and Public Policy within the National Research Council. The panel examined research and existing programs which address the areas of adolescent sexuality, pregnancy, and childbearing with the intent of making recommendations for policy

making, program design, program evaluation, and research. The panel's report is presented in chapters addressing the following topics: trends in adolescent sexuality and fertility, society and changing roles of adolescents, determinants of sexual behavior, effects of adolescent childbearing, interventions, and priorities for data collection, research, policies, and programs. An accompanying volume contains the working papers on which the report was based. The working papers address three broad areas, which are: 1) influences on early sexual and fertility behavior, 2) consequences of early sexual and fertility behavior, and 3) programs and policies related to teen pregnancy and sexuality.

Experimental Design and Data Analysis for Biologists Gerry P. Quinn, Michael J.

Keough, 2002-03-21 An essential textbook for any student or researcher in biology needing to design experiments, sample programs or analyse the resulting data. The text begins with a revision of estimation and hypothesis testing methods, covering both classical and Bayesian philosophies, before advancing to the analysis of linear and generalized linear models. Topics covered include linear and logistic regression, simple and complex ANOVA models (for factorial, nested, block, split-plot and repeated measures and covariance designs), and log-linear models. Multivariate techniques, including classification and ordination, are then introduced. Special emphasis is placed on checking assumptions, exploratory data analysis and presentation of results. The main analyses are illustrated with many examples

from published papers and there is an extensive reference list to both the statistical and biological literature. The book is supported by a website that provides all data sets, questions for each chapter and links to software.

Invasive Species in Forests and Rangelands of the United States Therese M. Poland, Toral Patel-Weynand, Deborah M. Finch, Chelcy Ford Miniati, Deborah C. Hayes, Vanessa M.

Lopez, 2021-02-01 This open access book describes the serious threat of invasive species to native ecosystems. Invasive species have caused and will continue to cause enormous ecological and economic damage with ever increasing world trade. This multi-disciplinary book, written by over 100 national experts, presents the latest research on a wide range of natural science and social science fields that explore the ecology, impacts, and practical tools for management of invasive species. It covers species of all taxonomic groups from insects and pathogens, to plants, vertebrates, and aquatic organisms that impact a diversity of habitats in forests, rangelands and grasslands of the United States. It is well-illustrated, provides summaries of the most important invasive species and issues impacting all regions of the country, and includes a comprehensive primary reference list for each topic. This scientific synthesis provides the cultural, economic, scientific and social context for addressing environmental challenges posed by invasive species and will be a valuable resource for scholars, policy makers, natural resource managers and practitioners.

The Continental Army Robert K. Wright, 1983 A narrative analysis of the complex evolution of the Continental Army, with the lineages of the 177 individual units that comprised the Army, and fourteen charts depicting regimental organization.

How Social Movements Matter Marco Giugni, Doug McAdam, Charles Tilly, 1999 Bringing together several well-known scholars, this volume offers an assessment of the consequences of social movements in Western countries. Policy, institutional, cultural, short- and long-term, and intended and unintended outcomes are among the types of consequences the authors consider in depth. They also compare political outcomes of several contemporary movements -- specifically, women's, peace, ecology, and extreme right-wing movements - - in different countries. Book jacket.

Emerging Answers Douglas Kirby, 2001 This report summarizes three bodies of research on teenage pregnancy and programs to reduce the risk of teenage pregnancy. Studies included in this report were completed in 1980 or later, conducted in the United States or Canada, targeted adolescents, employed an experimental or quasi-experimental design, had a sample size of at least 100 in the combined treatment and control group, and measured the impact on sexual or contraceptive behavior, pregnancy, or childbearing. Six chapters focus on: (1) Making the Case for Prevention Efforts: Adolescent Risk-Taking Behavior and Its Consequences; (2) Looking for Reasons Why: The Antecedents of Adolescent Sexual Behavior; (3) Assessing the Evidence: Factors Affecting the Strength of Research Results; (4) Emerging

Answers: The Behavioral Impact of Programs To Reduce Adolescent Sexual Risk-Taking; (5) Looking Forward: Conclusions about the State of Research and the Effectiveness of Programs; and (6) Bringing It Home: Applying These Research Results in Communities. (Chapters contain references.) (SM)

Preconception Health and Care: A Life Course

Approach Jill Shawe, Eric A.P. Steegers, Sarah Verbiest, 2020-06-26 This book provides a practical, multidisciplinary approach to support a broad range of health professionals, social workers, public health workers and others tasked with providing health and care to young adults. The continuum of life begins with the health and wellness of parents prior to conception, followed by embryonic and fetal development, and continues throughout life. Each person's life stages prepare them for the next and determine their health outcome and wellbeing over time. The text highlights the importance of promoting health throughout the lifespan, the influence of intergenerational health, and the concept of the Developmental Origins of Health and Disease in epigenetic processes and embryology. Authors underscore the importance of advancing health equity and lift up some of the ethical considerations in this work. The authors explore specific interventions in four major categories: Lifestyle, Infections, Nutrition, and Contraception / Pregnancy Planning (LINC). Preconception care is defined by the World Health Organization as the provision of biomedical, behavioural and social health interventions to

women and couples before conception. Preconception care includes evidence-based interventions to improve health status, to reduce behaviours, individual and environmental factors that contribute to poor health outcomes. This book offers readers evidence-based guidance regarding fertility awareness and sperm health, genetic counselling and lifestyle assessments, as well as mental wellbeing, alcohol, tobacco and pharmacotherapy, and specialist care for those with chronic conditions, including a review of medications. It also covers relevant infections, including HIV and the Zika virus, as well as different types of environmental and occupational exposure. The book employs a framework focusing on health promotion, the social determinants of health, and the science behind preconception care. Strategies for improving preconception and interconception health, including examples from around the globe, are described in detail.

Handbook of Population Dudley L. Poston, Michael Micklin, 2006-04-26 This comprehensive handbook provides an overview and update of the issues, theories, processes, and applications of the social science of population studies. The volume's 30 chapters cover the full range of conceptual, empirical, disciplinary, and applied approaches to the study of demographic phenomena. This book is the first effort to assess the entire field since Hauser and Duncan's 1959 classic, *The Study of Population*. The chapter authors are among the leading contributors to demographic scholarship over the past four decades. They represent a variety of disciplines and theoretical

perspectives as well as interests in both basic and applied research.

Intelligent Systems Technologies and Applications 2016 Juan Manuel Corchado Rodriguez, Sushmita Mitra, Sabu M. Thampi, El-Sayed El-Alfy, 2016-09-19 This book constitutes the thoroughly refereed proceedings of the second International Symposium on Intelligent Systems Technologies and Applications (ISTA'16), held on September 21–24, 2016 in Jaipur, India. The 80 revised papers presented were carefully reviewed and selected from 210 initial submissions and are organized in topical sections on image processing and artificial vision, computer networks and distributed systems, intelligent tools and techniques and applications using intelligent techniques.
