**The East India Company at Home, 1757-1857** Margot Finn, Kate Smith, 2018-02-15  
The East India Company at Home, 1757–1857 explores how empire in Asia shaped British country houses, their interiors and the lives of their residents. It includes chapters from researchers based in a wide range of settings such as archives and libraries, museums, heritage organisations, the community of family historians and universities. It moves beyond conventional academic narratives and makes an important contribution to ongoing debates around how empire impacted Britain. The volume focuses on the propertied families of the East India Company at the height of Company rule. From the Battle of Plassey in 1757 to the outbreak of the Indian Uprising in 1857, objects, people and wealth flowed to Britain from Asia. As men in Company service increasingly shifted their activities from trade to military expansion and political administration, a new population of civil servants, army officers, surveyors and surgeons journeyed to India to make their fortunes. These Company men and their families acquired wealth, tastes and identities in India, which travelled home with them to Britain. Their stories, the biographies of their Indian possessions and the narratives of the stately homes in Britain that came to house them, frame our explorations of imperial culture and its British legacies.

Shaping the Developing World Andy Baker,2013-08-16 Why are some countries rich and others poor? Shaping the Developing World explores the different theories that attempt to answer this thorny question. Interdisciplinary in his scope, Andy Baker adeptly uses a threefold framework of the West, the South, and the Natural World to categorize and analyze the factors that cause

underdevelopment—from the consequences of colonialism, deficient domestic institutions, and gender inequality to the effects of globalization, geography, and environmental degradation. Students learn to think like social scientists while coming to understand the full breadth of influences on a nation's political, economic, and social development. Country case studies at the end of each chapter offer an ideal testing ground for the threefold framework, as they apply empirical data to the various explanations of underdevelopment. Critical thinking questions then encourage students to weigh the different theoretical arguments. A series of well-designed features develop students' understanding of indicators of development concepts and highlight various kinds of aid organizations and opportunities for development work in the field. *Shaping the Developing World* presents high-quality academic analysis and the latest scholarship in a format that's engaging, informative, and above all, accessible.
