Canadian National Steam! Donald R. McQueen, 2013 A Locomotive History of the People's Railway. An illustrated history of CN's more than 4300 steam locomotives. It is so detailed, so full of photographs and information, the premier volume will then be followed by seven rosters. Canadian National Steam is an updated and expanded text based on Clegg and Corley's Canadian National Steam Power, outlining the history and technical development of steam power as influenced by the different CNR Motive Power Chiefs. Its 248 pages includes a summary of all locomotive classes with wheel types, road- and builder-numbers, a list of all predecessor and subsequent owners of CNR power, a builder's list of CNR steam power, a bibliography and an index. There are 147 photos of historic locomotives, most in operation, exhibiting their awesome power and evoking pleasant memories of nostalgic days gone by when trains took everybody everywhere. Spectacular cover illustrations are in full color. The book contains 43 tables and an extensive series of appendices -- 47 in all -- covering across-the-classes items such as livery, sales, leases, appliance application, (including compounding, gearing, superheating, feedwater heating, smoke deflectors, stokers, oil burners, cab and tender designs). There's also a guide to the individual locomotive roster volumes. The subsequent roster volumes will be available later in 2013, and only on a special order -- no returns basis. They will contain the individual locomotive rosters by CNR classes according to similar or related wheel arrangements (including Newfoundland Railway and the Central Vermont Railway). Every steam locomotive will be listed, and the roster will provide all the information historians, rail enthusiasts and transportation buffs would ever want to know (and then some), including build data, ownership history, appliance history, class notes. More than 1200 photographs, with informative captions, will appear in the roster volumes, which will feature sturdy wire binding, permitting the roster book pages to open completely flat. Many readers will welcome the opportunity to own this historic series. The original Canadian National Steam Power, published in 1969, has been out of print for almost forty years after selling thousands of copies. Since then, CN has become North America's Railroad, and is widely recognized as the most efficient, best-run railway of all on the continent, and perhaps in the world. This new series will be a valuable entry in every CNR enthusiast's library, and is sure to become a rare collector's item.

Burlington Northern Earl J Currie, 2019-11 Burlington Northern (BN) formed from the merger of four railways. Success required complex planning and implementation programs. Then the electric-power industry summoned BN to transport immense amounts of low-sulfur coal, and railroading as an adventure began for thousands hired to improve or increase the railroad's capacity, lines, tracks, and fleet size. Soon, BN's lines handled the highest tonnages of any railroad line in the world, past or present. This, the first in a two-volume series, covers this important decade.

Southern Pacific Lines Henry E. Bender,2013 Southern Pacific and its predecessor railroads constructed and maintained depots throughout their territory. Between 1877 and 1894, a series of 26 numbered standard plans for depots was developed, and each plan was successively in use for a few years. By the beginning of the 20th century, there were more than 600 SP depots and telegraph offices. By then, many older depots, as well as most new ones at that time, had been or would be built to these standards. This book describes those depots. The story of depots in SP's far-flung territory is an interesting one: when they were built, what they looked like, and when they were destroyed or were saved. Particularly for smaller communities, the depot was once an integral part of local life, so the life stories of these depots are an integral part of town history. In addition to the 26 numbered standard depot designs, SP also built a number of other de facto standard depots, such as the colonnade style, and several such designs are described here. Also included are a group of stuccoed depots, modernized from older buildings, as well as standard-design depots built by predecessor railroads, such as the El Paso & Southwestern. Southern Pacific built each depot with an eye to what was expected to be needed. The overall size of the depot often reflected current or anticipated town size. The agent had quarters upstairs in a two-story depot, essential in places where suitable local housing was not available, but otherwise a one-story depot would be built. Freight rooms were sized according to the expected volume of business. Well-known depot historian Henry Bender has extensively researched this subject, and presents here an authoritative account of hundreds of SP standard depots, illustrated with a fine collection of photographs. The jacket painting is by noted railroad artist John R. Signor.
