Southern Pacific Lines Henry E. Bender, 2013 Southern Pacific and its predecessor railroads constructed and maintained depots throughout their territory. Between 1877 and 1894, a series of 26 numbered standard plans for depots was developed, and each plan was successively in use for a few years. By the beginning of the

20th century, there were more than 600 SP depots and telegraph offices. By then, many older depots, as well as most new ones at that time, had been or would be built to these standards. This book describes those depots. The story of depots in SP's far-flung territory is an interesting one: when they were built, what they looked like, and when they were destroyed or were saved. Particularly for smaller communities, the depot was once an integral part of local life, so the life stories of these depots are an integral part of town history. In addition to the 26 numbered standard depot designs, SP also built a number of other de facto standard depots, such as the colonnade style, and several such designs are described here. Also included are a group of stuccoed depots, modernized from older buildings, as well as standard-design depots built by predecessor railroads, such as the El Paso & Southwestern. Southern Pacific built each depot with an eye to what was expected to be needed. The overall size of the depot often reflected current or anticipated town size. The agent had quarters upstairs in a two-story depot, essential in places where suitable local housing was not available, but otherwise a one-story depot would be built. Freight rooms were sized according to the expected volume of business. Well-known depot historian Henry

Bender has extensively researched this subject, and presents here an authoritative account of hundreds of SP standard depots, illustrated with a fine collection of photographs. The jacket painting is by noted railroad artist John R. Signor.

Canadian National Steam! Donald R. McQueen, 2013 A Locomotive History of the People's Railway. An illustrated history of CN's more than 4300 steam locomotives. It is so detailed, so full of photographs and information, the premier volume will then be followed by seven rosters. Canadian National Steam is an updated and expanded text based on Clegg and Corley's Canadian National Steam Power, outlining the history and technical development of steam power as influenced by the different CNR Motive Power Chiefs. Its 248 pages includes a summary of all locomotive classes with wheel types, road- and builder-numbers, a list of all predecessor and subsequent owners of CNR power, a builder's list of CNR steam power, a bibliography and an index. There are 147

photos of historic locomotives, most in operation, exhibiting their awesome power and evoking pleasant memories of nostalgic days gone by when trains took everybody everywhere. Spectacular cover illustrations are in full color. The book contains 43 tables and an extensive series of appendices -- 47 in all -- covering across-the-classes items such as livery, sales, leases, appliance application, (including compounding, gearing, superheating, feedwater heating, smoke deflectors, stokers, oil burners, cab and tender designs). There's also a guide to the individual locomotive roster volumes. The subsequent roster volumes will be available later in 2013, and only on a special order -- no returns basis. They will contain the individual locomotive rosters by CNR classes according to similar or related wheel arrangements (including Newfoundland Railway and the Central Vermont Railway). Every steam locomotive will be listed, and the roster will provide all the information historians, rail enthusiasts and transportation buffs would ever want to know (and then some), including build data, ownership history, appliance history, class notes. More than 1200 photographs, with informative captions, will appear in the roster volumes, which will feature sturdy wire binding, permitting the roster book pages to open completely flat. Many readers will

welcome the opportunity to own this historic series. The original Canadian National Steam Power, published in 1969, has been out of print for almost forty years after selling thousands of copies. Since then, CN has become North America's Railroad, and is widely recognized as the most efficient, best-run railway of all on the continent, and perhaps in the world. This new series will be a valuable entry in every CNR enthusiast's library, and is sure to become a rare collector's item.

100 Birds and How They Got Their Names Diana

Wells, 2001-10-30 How did cranes come to symbolize matrimonial happiness? Why were magpies the only creatures that would not go inside Noah's Ark? Birds and bird imagery are integral parts of our language and culture. With her remarkable ability to dig up curious and captivating facts, Diana Wells hatches a treat for active birders and armchair enthusiasts alike. Meet the intrepid adventurers and naturalists who risked their lives to describe and name new birds. Learn the mythical stories of the gods and goddess associated with bird names. Explore the avian emblems

used by our greatest writers--from Coleridge's albatross in *The Ancient Mariner* to Poe's raven. A sampling of the bird lore you'll find inside: Benjamin Franklin didn't want the bald eagle on our National Seal because of its bad moral character, (it steals from other birds); he lobbied for the turkey instead. Chaffinches, whose Latin name means unmarried, are called bachelor birds because they congregate in flocks of one gender. Since mockingbirds mimic speech, some Native American tribes fed mockingbird hearts to their children, believing it helped them learn language. A group of starlings is called a murmuration because they chatter so when they roost in the thousands. Organized alphabetically, each of these bird tales is accompanied by a two-color line drawing. Dip into *100 Birds* and you'll never look at a sparrow, an ostrich, or a wren in quite the same way.
