**Curriculum 21** Heidi Hayes Jacobs, 2010-01-05 What year are you preparing your students for? 1973? 1995? Can you honestly say that your school's curriculum and the program you use are preparing your students for 2015 or 2020? Are you even preparing them for today? With those provocative questions, author and educator Heidi Hayes Jacobs launches a powerful case for overhauling, updating, and injecting life into the K-12 curriculum. Sharing her expertise as a world-renowned curriculum designer and calling upon the collective wisdom of 10 education thought leaders, Jacobs provides insight and inspiration in the following key areas: \* Content and assessment: How to identify what to keep, what to cut, and what to create, and where portfolios and other new kinds of assessment fit into the picture. \* Program structures: How to improve our use of time and space and groupings of students and staff. \* Technology: How it's transforming teaching, and how to take advantage of students' natural facility with technology. \* Media literacy: The essential issues to address, and the best resources for helping students become informed users of multiple forms of media. \* Globalization: What steps to take to help students gain a global perspective. \* Sustainability: How to instill enduring values and beliefs that will lead to healthier local, national, and global communities. \* Habits of mind: The thinking habits that students, teachers, and administrators need to develop and practice to succeed in school, work, and life. The answers to these questions and many more make Curriculum 21 the ideal guide for transforming our schools into what they must become: learning organizations that match the times in which we live.

*Formless* Yve-Alain Bois, Rosalind E. Krauss, Centre Georges Pompidou, 1997 Published to accompany exhibition held at the Centre Georges Pompidou, Paris 22/5 - 26/8 1996.

*Digital Strategies in the Pharmaceutical Industry* L. Lerer, M. Piper, 2003-01-24 This book is a comprehensive review of the current state of digital innovation, Internet activity and e-business in the life sciences arena and a practical guide for managers planning, developing and implementing e-strategies in the pharmaceutical industry. The authors provide numerous examples of innovative, best practice and lay the strategic foundation for using e-business across the pharmaceutical value chain from drug discovery to physician promotion to direct-to-consumer marketing.

*Strategic Influence* J. Michael Waller, 2009-03 In this vital book, thirteen experts in public diplomacy, counterpropaganda and political warfare lay out the components of what the U.S. and its allies need to win the war of ideas around the world. Strategic influence is much more than strategic communication. Communicating with others has somehow become a goal in itself, when the real issue is influence - to modify the perceptions, attitudes, and most of all, the behavior of people, movements and governments around the world. This book is designed for the diplomat, intelligence officer, warfighter and policymaker.

**Mathematics Under the Microscope** Alexandre Borovik, 2010 The author's goal is to start a dialogue between mathematicians and cognitive scientists. He discusses, from a working mathematician's point of view, the mystery of mathematical intuition: why are certain mathematical concepts more intuitive than others? To what extent does the ``small scale'' structure of mathematical concepts and algorithms reflect the workings of the human brain? What are the ``elementary particles'' of mathematics that build up the mathematical universe? The book is saturated with amusing examples from a wide range of disciplines--from turbulence to error-correcting codes to logic--as well as with just puzzles and brainteasers. Despite the very serious subject matter, the author's approach is lighthearted and entertaining. This is an unusual and unusually fascinating book. Readers who never thought about mathematics after their school years will be amazed to discover how many habits of mind, ideas, and even material objects that are inherently mathematical serve as building blocks of our civilization and everyday life. A professional mathematician, reluctantly breaking the daily routine, or pondering on some resisting problem, will open this book and enjoy a sudden return to his or her young days when mathematics was fresh, exciting, and holding all promises. And do not take the word ``microscope'' in the title too literally: in fact, the author looks around, in time and space, focusing in turn on a tremendous variety of motives, from mathematical ``memes'' (genes of culture) to an unusual life of a Hollywood star. --Yuri I. Manin, Max-Planck Institute of Mathematics, Bonn, and Northwestern University

*Form, Fit, Fashion* Jay Calderin, 2009-12-01 An indispensable primer for students and first-stop reference for professionals, *Form, Fit, and Fashion* guides the fashion designer through the entire design process, from conceiving a garment to marketing it. This handbook collects the information and ideas essential to planning and executing fashion projects of every scale and distills them in an easy-to-use format that is compact enough to

slip into a tote. Linking six central phases in the cycle of fashion—research, editing, design, construction, connection, and evolution—Form, Fit, and Fashion will help designers to develop effective strategies for building a cohesive collection and communicating their vision.

**American Sutter: 2019-2021** STEVE. ERICKSON, 2022-04-05 As Jonathan Lethem put, Steve Erickson's journal of the last 18 months of the Trump Presidency sears the page. Erickson, one of our finest novelists, has long been an astute political observer, and *American Sutter*, part political declaration, part humorous account of more personal matters, offers a particularly moving reminder of the democratic ideals that we are currently struggling to preserve. Written with wit, eloquence, and a controlled fury as events unfold, Erickson has left us with an essential record of our recent history, a book to be read with our collective breath held.\* Steve Erickson is the author of ten novels and two books about American culture. For 12 years he was founding editor of the national literary journal *Black Clock*. Currently he is the film/television critic for *Los Angeles* magazine and a Distinguished Professor at the University of California, Riverside. He has received a Guggenheim fellowship, the American Academy of Arts and Letters award, and the Lannan Lifetime Achievement award.

**Writing for Digital Media** Brian Carroll, 2010-06-01 Writing for Digital Media teaches students how to write effectively for online audiences—whether they are crafting a story for the website of a daily newspaper or a personal blog. The lessons and exercises in each chapter help students build a solid understanding of the ways that the Internet has introduced new opportunities for dynamic storytelling as digital media have blurred roles of media producer, consumer, publisher and reader. Using the tools and strategies discussed in this book, students are able to use their insights into new media audiences to produce better content for digital formats and environments. Fundamentally, this book is about good writing—clear, precise, accurate, filled with energy and voice, and aimed directly at an audience. Writing for Digital Media also addresses all of the graphical, multimedia, hypertextual and interactive elements that come into play when writing for digital platforms. Learning how to achieve balance and a careful, deliberate blend of these elements is the other primary goal of this text. Writing for Digital Media teaches students not only how to create content as writers, but also how to think critically as a site manager or content developer might about issues such as graphic design, site architecture, and editorial consistency. By teaching these new skill sets alongside writing fundamentals, this book transforms students from writers who are simply able to post their stories online into engaging multimedia, digital storytellers. *The Brand Innovation Manifesto* John Grant, 2006-05-12 The days of the image brands are over, and 'new marketing' has gone mainstream. The world's biggest companies are pursuing a post-advertising strategy, moving away from advertising and investing in leading edge alternatives. In the vanguard of the revolution has been John Grant, co-founder of the legendary agency St. Luke's and author of *The New Marketing Manifesto*, whose radical thinking has informed a generation. Now Grant is set to stun the industry again. In *The Brand Innovation Manifesto*, he

redefines the nature of brands, showing why old models and scales no longer work and revealing that the key to success today is impacting people's lifestyles (think Starbucks, iPod and eBay). At the heart of the book is the concept of the 'brand molecule' to which new cultural ideas can be constantly added to keep pace with change. Cataloguing 32 classes of idea, Grant presents a practical approach to mixing and matching them within your own market to develop new brand ideas - and new ideas for existing brands.

**Virtual Economies** Vili Lehdonvirta, Edward Castronova, 2014-05-09 How the basic concepts of economics—including markets, institutions, and money—can be used to create and analyze economies based on virtual goods. In the twenty-first-century digital world, virtual goods are sold for real money. Digital game players happily pay for avatars, power-ups, and other game items. But behind every virtual sale, there is a virtual economy, simple or complex. In this book, Vili Lehdonvirta and Edward Castronova introduce the basic concepts of economics into the game developer's and game designer's toolkits. Lehdonvirta and Castronova explain how the fundamentals of economics—markets, institutions, and money—can be used to create or analyze economies based on artificially scarce virtual goods. They focus on virtual economies in digital games, but also touch on serious digital currencies such as Bitcoin as well as virtual economies that emerge in social media around points, likes, and followers. The theoretical emphasis is on elementary microeconomic theory, with some discussion of behavioral economics, macroeconomics, sociology of consumption, and other social science theories relevant to economic behavior. Topics include the rational choice model of economic decision making; information goods versus virtual goods; supply, demand, and market equilibrium; monopoly power; setting prices; and externalities. The book will enable developers and designers to create and maintain successful virtual economies, introduce social scientists and policy makers to the power of virtual economies, and provide a useful guide to economic fundamentals for students in other disciplines.

**Cyber-Humans** Woodrow Barfield, 2015-12-17 It is predicted that robots will surpass human intelligence within the next fifty years. The ever increasing speed of advances in technology and neuroscience, coupled with the creation of super computers and enhanced body parts and artificial limbs, is paving the way for a merger of both human and machine. Devices which were once worn on the body are now being implanted into the body, and as a result, a class of true cyborgs, who are displaying a range of skills beyond those of normal humans-beings, are being created. There are cyborgs which can see colour by hearing sound, others have the ability to detect magnetic fields, some are equipped with telephoto lenses to aid their vision or implanted computers to monitor their heart, and some use thought to communicate with a computer or to manipulate a robotic arm. This is not science-fiction, these are developments that are really happening now, and will continue to develop in the future. However, a range of legal and policy questions has arisen alongside this rise of artificial intelligence. Cyber-Humans provides a deep and unique perspective on the technological future of humanity, and describes how law and policy will be particularly relevant in creating a fair and equal society and protecting the liberties of different life forms which will emerge in the 21st century. Dr Woodrow (Woody) Barfield previously headed up the Sensory Engineering Laboratory,

holding the position of Industrial and Systems Engineering Professor at the University of Washington. His research revolves around the design and use of wearable computers and augmented reality systems and holds both JD and LL.M degrees in intellectual property law and policy. He has published over 350 articles and major presentations in the areas of computer science, engineering and law. He currently lives in Chapel Hill, NC, USA.

**Online Brand Communities** Francisco J. Martínez-López, Rafael Anaya, Rocio Aguilar, Sebastián Molinillo, 2015-12-11 This book presents and analyzes the concept of online brand communities, an emerging and exciting topic in marketing and eCommerce. First, it lays out the foundations like the evolution of the Web and the so-called Social Web, its utility for users and businesses, and the evolution of the marketing mind-set to adapt the Social Web. On this basis, the book then presents a detailed analysis of online brand communities, examining the concept of virtual community with a specific focus on virtual brand communities. In this context the book also explores recent trends related to branding and brand management. Next, it proposes a classification system for online brand communities, taking into account questions like the motivating factors for consumers to join, participate and stay in a community. The process of value creation in communities is examined from both business and consumer perspectives. The book draws to a close with a brief presentation of the process broadly accepted for the successful development of online brand communities.

The Warcraft Civilization William Sims Bainbridge, 2012-09-21 An exploration of the popular online role-playing game World of Warcraft as a virtual prototype of the real human future. World of Warcraft is more than a game. There is no ultimate goal, no winning hand, no princess to be rescued. WoW is an immersive virtual world in which characters must cope in a dangerous environment, assume identities, struggle to understand and communicate, learn to use technology, and compete for dwindling resources. Beyond the fantasy and science fiction details, as many have noted, it's not entirely unlike today's world. In The Warcraft Civilization, sociologist William Sims Bainbridge goes further, arguing that WoW can be seen not only as an allegory of today but also as a virtual prototype of tomorrow, of a real human future in which tribe-like groups will engage in combat over declining natural resources, build temporary alliances on the basis of mutual self-interest, and seek a set of values that transcend the need for war. What makes WoW an especially good place to look for insights about Western civilization, Bainbridge says, is that it bridges past and future. It is founded on Western cultural tradition, yet aimed toward the virtual worlds we could create in times to come.

**The Worldwide List of Alternative Theories and Critics** Jean de Climont, 2020-11-01 This Worldwide List of Alternative Theories and Critics (only available in English language) includes scientists involved in scientific fields. The 2023 issue of this directory includes the scientists found in the Internet. The scientists of the directory are only those involved in physics (natural philosophy). The list includes 9700 names of scientists (doctors or diploma engineers for more than 70%). Their position is shortly presented together with their proposed alternative theory when applicable. There are nearly 3500 authors of such theories, all amazingly very different from one another. The main categories of theories are presented in an other book of Jean de Climont THE

Tragic sense of life Miguel de Unamuno,2023-06-26 In *Tragic Sense of Life*, Miguel de Unamuno, one of Spain's most important philosophers and writers of the 20th century, provides a profound exploration of existentialist thought. Unamuno's unique brand of existentialism grapples with fundamental questions about life, death, faith, and identity. The book presents an introspective journey into the human soul, delving into our constant quest for meaning and the inevitable dread of mortality that accompanies it. Unamuno argues that acknowledging the tragic sense of life, rather than seeking to eliminate it, is vital for truly experiencing and understanding life and spirituality. Dealing heavily with the themes of human immortality and the struggle for faith, Unamuno's work presents a powerful, intensely personal critique of both established religion and secular humanism. He argues for a more engaged form of personal faith that acknowledges the profound mystery and uncertainty of existence. *Tragic Sense of Life* is an intellectual tour-de-force, as poignant as it is insightful. It's a deeply philosophical and existential work that grapples with some of life's most challenging questions, exploring the human condition in a unique and powerful way. Keywords: Miguel de Unamuno, *Tragic Sense of Life*, existentialism, human condition, mortality, faith, identity, immortality, personal faith, religion, secular humanism, philosophy, Spanish philosophy, 20th century, existential thought, introspective journey, quest for meaning, existentialist philosophy, Spanish literature, existential thought, human condition, exploration of faith, philosophical critique, immortality, personal faith, exploration of identity, profound existentialism, human struggle, mortality, meaning of life, classic philosophical works, 20th-century philosophy.

Chiasson,2008-05-09 In recent years, there has been much interest in the 'virtual' –teams, organizations and communities –in management research and practice.
