Universal Access in Human-Computer Interaction. Context Diversity Constantine

Stephanidis, 2011-06-24 The four-volume set LNCS 6765-6768 constitutes the refereed proceedings of the 6th International Conference on Universal Access in Human-Computer Interaction, UAHCI 2011, held as Part of HCI International 2011, in Orlando, FL, USA, in July 2011, jointly with 10 other conferences addressing the latest research and development efforts and highlighting the human aspects of design and use of computing systems. The 47 revised papers included in the third volume were carefully reviewed and selected from numerous submissions. The papers are organized in the following topical sections: universal access in the mobile context; ambient assisted living and smart environments; driving and interaction; interactive technologies in the physical and built environment.

Transcultural History Madeleine Herren, Martin Rüesch, Christiane Sibille, 2012-06-19

For the 21st century, the often-quoted citation 'past is prologue' reads the other way around: The global present lacks a historical narrative for the global past. Focussing on a transcultural history, this book questions the territoriality of historical concepts and offers a narrative, which aims to overcome cultural essentialism by focussing on crossing borders of all kinds. Transcultural History reflects critically on the way history is constructed, asking who formed history in the past and who succeeded in shaping what we call the master narrative. Although trained European historians, the authors aim to present a useful approach to global history, showing first of all how a Eurocentric but universal historiography removed or essentialised certain topics in Asian history. As an empirical discipline, history is based on source material, analysed according to rules resulting from a strong methodological background. This book accesses the global past after World War I, looking at the well known stage of the Paris Peace Conferences, observing the multiplication of new borders and the variety of transgressing institutions, concepts, actors, men and women inventing themselves as global subjects, but sharing a bitter experience with almost all local societies at this time, namely the awareness of having relatives buried in far distant places due to globalised wars.

The Metaphysics of Virtual Reality

Michael Heim, 1994-10-27 Computers have dramatically altered life in the late twentieth century. Today we can draw on worldwide computer links, speeding up communications by radio, newspapers, and television. Ideas fly back and forth and circle the globe at the speed of electricity. And just around the corner lurks full-blown virtual reality, in which we will be able to immerse ourselves in a computer simulation not only of the actual physical world, but of any imagined world. As we begin to move in and out of a computer-generated world, Michael Heim asks, how will the way we perceive our world change? In *The Metaphysics of Virtual Reality*, Heim considers this and other philosophical issues of the Information Age. With an eye for the dark as well as the bright side of computer technology, he explores the logical and historical origins of our computer-generated world and speculates about the future direction of our computerized lives. He discusses such topics as the effect of word-processing on the English language (while word-processors have led to increased productivity, they have also led to physical hazards such as repetitive motion syndrome, which causes inflamed hand and arm tendons). Heim looks into the new kind of literacy promised by Hypertext (technology which allows the user to link audio and video elements, the disadvantages including disorientation and cognitive overload). And he also probes the notion of virtual reality, cyberspace--the computer-simulated environments that have captured the popular imagination and may ultimately change the way we define reality itself. Just as the definition of interface itself has evolved from the actual adapter plug used to connect electronic circuits into human entry into a self-contained cyberspace, so too will the notion of reality change with the current technological drive. Like the introduction of the automobile, the advent of virtual reality will change the whole context in which our knowledge and awareness of life are rooted. And along the way, Heim covers such intriguing topics as how computers have altered our thought habits, how we will be able to distinguish virtual from real reality, and the appearance of virtual reality in popular culture (as in *Star Trek's* holodeck, William Gibson's *Neuromancer*, and Stephen King's *Lawnmower Man*). Vividly and entertainingly written, *The Metaphysics of Virtual Reality* opens a window on a fascinating world

that promises--or threatens--to become an integral part of everyday life in the 21st century. As Heim writes, not only do we face a breakthrough in the technology of computer interface, but we face the challenge of knowing ourselves and determining how the technology should develop and ultimately affect the society in which it grows.

Nonlinear Microwave Circuit Design Franco Giannini, Giorgio Leuzzi, 2004-06-07 Design techniques for nonlinear microwave circuits are much less developed than for linear microwave circuits. Until now there has been no up-to-date text available in this area. Current titles in this field are considered outdated and tend to focus on analysis, failing to adequately address design and measurement aspects. Giannini and Leuzzi provide the theoretical background to non-linear microwave circuits before going on to discuss the practical design and measurement of non-linear circuits and components. Non-linear Microwave Circuit Design reviews all of the established analysis and characterisation techniques available and provides detailed coverage of key modelling methods. Practical examples are used throughout the text to emphasise the design and application focus of the book. * Provides a unique, design-focused, coverage of non-linear microwave circuits * Covers the fundamental properties of nonlinear circuits and methods for device modelling * Outlines non-linear measurement techniques and characterisation of active devices * Reviews available design methodologies for non-linear power amplifiers and details advanced software modelling tools * Provides the first detailed treatment of non-linear frequency multipliers, mixers and oscillators * Focuses on the application potential of non-linear components Practicing engineers and circuit designers working in microwave and communications engineering and designing new applications, as well as senior undergraduates, graduate students and researchers in microwave and communications engineering and their libraries will find this a highly rewarding read.

2015 European Radar Conference (EuRAD) IEEE Staff, 2015-09-09 The 12th European Radar Conference (EuRAD 2015) is the major European event for the present status and the future trends in the field of radar technology, system design, and applications It is the ideal event to keep up to date with the latest achievements in the field of radar and to interact with international experts from industry and academia The conference brings together researchers and radar developers from all over the world to stimulate development of new products and services International experts will present keynote papers on topics of current importance and on the latest advances Tailored short courses and workshops will complement the programme

Human-Computer Interaction: Interaction Modalities and Techniques Masaaki Kurosu, 2013-07-01 The five-volume set LNCS 8004--8008 constitutes the refereed proceedings of the 15th International Conference on Human-Computer Interaction, HCII 2013, held in Las Vegas, NV, USA in July 2013. The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. This volume contains papers in the thematic area of human-computer interaction, addressing the following major topics: speech, natural language and auditory interfaces; gesture and eye-gaze based Interaction; touch-based interaction; haptic interaction; graphical user interfaces and visualisation.

Artificial Reality II Myron W. Krueger, 1991 This book by artificial reality pioneer Myron Krueger presents a view of our future interaction with machines, when computer systems will sense our needs and respond to them. In its unique melding of aesthetics and technology, Artificial Reality II shows how simulated worlds allow people to interact with computers in profoundly new ways for problem-solving and recreation.

Jaunten Honor Raconteur, 2018-08-28 There was a time when magic was welcome in the country of Chahir, but that was nearly two centuries ago. Now, all forms of magic are strictly forbidden. Anyone caught using magic, or possessing magical abilities, are immediately imprisoned and executed. For Garth, that policy is a problem. As Garth approaches his sixteenth birthday, he realizes that he definitely has magical abilities. What's worse, he has no control over them. In order to stay alive, he only has one choice—he must leave his homeland, Chahir, and flee into the neighboring country, Hain. The journey isn't an easy one; he still has to make it out of Chahir without alerting anyone as to his abilities. What Garth doesn't know is that getting to Hain, and the Academy for All Magic, is going to be the easy part. Garth goes into Hain for one reason only; he wants training for his out-of-control magical powers. So how does he become a member of an exclusive magical clan known as the Jaunten; adopted by a magically enhanced colt; best friends with a gifted Witch; and foster brother of a four year old Mage? Let's just say he has a gift for finding trouble.

Clothing Matters Emma Tarlo, 1996-09 What do I wear today? The way we answer this question says much about how we manage and express our identities. This detailed study examines sartorial style in India from the late nineteenth century to the present, showing how trends in clothing are related to caste, level of education, urbanization, and a larger cultural debate about the nature of Indian identity. Clothes have been used to assert power, challenge authority, and instigate social change throughout Indian society. During the struggle for independence, members of the Indian elite incorporated elements of Western style into their clothes, while Gandhi's adoption of the loincloth symbolized the rejection of European power and the contrast between Indian poverty and British wealth. Similar tensions are played out today, with urban Indians adopting ethnic dress as villagers seek modern fashions. Illustrated with photographs, satirical drawings, and magazine advertisements, this book shows how individuals and groups play with history and culture as they decide what to wear.

Communication in the Age of Virtual Reality Frank Biocca, Mark R. Levy, 2013-02-01 This volume addresses virtual reality (VR) -- a tantalizing communication medium whose essence challenges our most deeply held notions of what communication is or can be. The editors have gathered an expert team of engineers, social scientists, and cultural theorists for the first extensive treatment of human communication in this exciting medium. The first part introduces the reader to VR's state-of-the-art as well as future trends. In the next section, leading research scientists discuss how knowledge of communication can be used to build more effective and exciting communication applications of virtual reality. Looking ahead, the authors explore pioneering approaches to VR narratives, interpersonal communication, the use of 3D sound, and the building of VR entertainment complexes. In the final section, the authors zoom out to view the big picture -- the psychological, social, and cultural implications of virtual reality. Thought-provoking discussions consider important communication issues such as: * How will virtual reality influence perception of reality? * What are the legal issues defining communication in virtual reality? * What kind of cultural trends will this technology encourage?

Ink Mage Victor Gischler, 2014 In the first installment of the A Fire Beneath the Skin trilogy, the city of Klaar has never fallen. No enemy has ever made it across the Long Bridge or penetrated the city's mighty walls. Even when a powerful invading army shows up at the gates, the duke and his daughter, Rina Veraiin, are certain that it poses little threat. But they are cruelly betrayed from within and, in a horrific spasm of violence, the city is brought to its knees. With the help of her bodyguard, Kork, the battle-trained young Rina narrowly escapes the slaughter and makes her way to the lair of an ancient sorcerer--the Ink Mage--who gifts her with a strange, beautiful set of magical tattoos. Now a duchess in exile, Rina sets out on a quest to reclaim what is rightfully hers, aided by a motley assortment of followers who will help her in her cause--some for noble reasons and others for their own dark purposes. With the enemy's agents nipping at her heels, Rina must learn to harness her new and startling magical powers if she is to assert her rightful place as ruler of Klaar.

Fashion India Tereza Kuldova, 2013 The opulent, delicate, and handcrafted Indian fashion pieces resemble the white lotus, India's national flower. The lotus too, with its beauty, grows out of the mud - mud that remains invisible and hidden. *** This anthology, written by an international group of anthropologists with hands-on experience in India and its multi-faceted fashion industry, explores the underlying dynamics of 'spectacular capitalism.' The contributors present a range of intriguing case studies that open up the potential for critique of the local, as much as the global, system that reproduces hierarchies and inequalities, while opening a window onto contemporary urban India. The book examines such questions as: * What do contemporary Indian spectacular fashion shows have in common with Western 19th-century department store fantasy palaces, the royal durbars, the elaborate museum displays of the colonial era, and the lives of erstwhile Indian royals? * What can the Delhi International Airport reveal about the current obsession of Indians with 'Indianness' - the 'local' and the refashioning of India for the global audience? * How does the 'royal chic' (the current trend in luxury Indian haute couture that recreates the splendor of the aristocratic lifestyles of the bygone era) depend on poverty for its visual and material existence? * Why does the Indian government invest in the Northeast Indian fashion scene and into the production of ethnic glamour and tribal chic? * How do glamour-seeking Kerala Muslim women appropriate the sexy Bollywood fashions while still retaining their codes of modesty? * How does the world of Delhi and its fashion designers look from the perspective of the village craftswomen that work for them, mock them, and laugh at them and their hectic life? * What is the science and artisanship behind the production of traditional Kolhapuri sandals, turned into luxury items for international consumers? * How do Bollywood cinema and the changing male fashion and body ideals reflect the transforming India?

Europe in a Global Context Anne Sophie Krossa, 2017-09-16 Rethinking familiar frameworks and exploring new perspectives, this book provides a much-needed analysis of European culture, society and politics in a global context. With contributors from across the social sciences and the humanities, this book highlights key topics and assesses the open ended question of Europe's place in a global age.
