**Derivation of Formulations 1 and 1a of Farassat**  
National Aeronautics and Space Adm Nasa, 2019-01-13  
Formulations 1 and 1A are the solutions of the Ffowcs Williams-Hawkings (FW-H) equation with surface sources only when the surface moves at subsonic speed. Both formulations have been successfully used for helicopter rotor and propeller noise prediction for many years although we now recommend using Formulation 1A for this purpose. Formulation 1 has an observer time derivative that is taken numerically, and thus, increasing execution time on a computer and reducing the accuracy of the results. After some discussion of the Green's function of the wave equation, we derive Formulation 1 which is the basis of deriving Formulation 1A. We will then show how to take this observer time derivative analytically to get Formulation 1A. We give here the most detailed derivation of these formulations. Once you see the whole derivation, you will ask yourself why you did not do it

*Up and Down* Bubba Watson, 2021-11-02 He was a small-town boy who burst onto the international golf scene with a dramatic hook shot from deep in the woods to win the Masters— before the game he loved almost killed him. Opening up about the toll that chasing and achieving his dream of being a champion golfer took on his mental health, Bubba Watson shares his powerful story of the breaking point that gave him clarity. Bubba Watson is known as the big-hitting left-handed golfer who plays with the pink driver—the small-town kid who grew up as a child golf prodigy before going on to win two Masters Tournaments, competing in the Olympics, and rising to be the number two golfer in the world. But every dream comes with a price. Feeling that he was never good enough, Bubba began to let the constant criticism from fans and commentators haunt his thoughts. Success in the game he loved was killing him. In *Up and Down*, Bubba opens up about his debilitating anxiety attacks, the death of his father and namesake, adopting his children, and how reaching a breaking point professionally and personally drew him closer to his family and God. Golf is what Bubba Watson does, but it is not who he is. Through his story, you'll learn how Bubba: Overcame his anxiety and feelings of inadequacy Found his true identity not in the standards of the world, but in the God who already knows he is enough Learned to trust God with his gifts, family, and biggest dreams Became the husband, father, friend, and mentor he was called to be Life, like golf, is filled with ups and downs. *Up and Down* is the inspiring story of an imperfect man striving to become the best person he can be—wherever the course may take him.

The Midrange Theory Seth Partnow, 2021-11-16 From one of basketball's foremost experts in the field

of analytics, a fascinating new perspective on how to watch and think about the game. At its core, the goal of any basketball team is relatively simple: take and make good shots while preventing the opponent from doing the same. But what is a good shot? Are all good shots created equally? And how might one identify players who are more or less likely to make and prevent those shots in the first place? The concept of basketball analytics, for lack of a better term, has been lauded, derided, and misunderstood. The incorporation of more data into NBA decision-making has been credited—or blamed—for everything from the death of the traditional center to the proliferation of three-point shooting to the alleged abandonment of the area of the court known as the midrange. What is beyond doubt is that understanding its methods has never been more important to watching and appreciating the NBA. In *The Midrange Theory*, Seth Partnow, NBA analyst for *The Athletic* and former Director of Basketball Research for the Milwaukee Bucks, explains how numbers have affected the modern NBA game, and how those numbers seek not to solve the game of basketball but instead urge us toward thinking about it in new ways. The relative value of Russell Westbrook's triple-doubles Why some players succeed in the playoffs while others don't How NBA teams think about constructing their rosters through the draft and free agency The difficulty in measuring defensive achievement The fallacy of the quick two From shot selection to evaluating prospects to considering aesthetics and ethics while analyzing the box scores, Partnow deftly explores where the NBA is now, how it got here, and where it might be going next.
