The Australia-European Union Free Trade Agreement Marc Bungenberg, Andrew Mitchell, 2022-02-26 This book gathers a selection of peer-reviewed chapters reflecting on the Australia-European Union Free Trade Agreement (AEUFTA). Since 18 June 2018, ten rounds of negotiations for a AEUFTA have been held in a constructive atmosphere, showing a shared commitment to move forward with this ambitious and comprehensive agreement. After a lengthy and arduous process interrupted by the United Kingdom's withdrawal from the European Union (EU), the United States' hesitations regarding the EU's global strategy and the outbreak of the COVID-19 pandemic, the negotiations between Australia and the European Union finally appear to be nearing completion. In challenging times, both parties share a commitment to a positive trade agenda, and to the idea that good trade agreements benefit both sides by boosting jobs, growth and investment. This book explores the challenges, achievements and missed opportunities in the AEUFTA negotiation process, and examines current legal and political relations between the EU, its Member States and Australia. Furthermore, it examines in detail a wide and diverse range of negotiated areas, including digital trade, services, intellectual property rules, trade remedies and investment screening, as well as dispute settlement mechanisms. Lastly, it sheds light on the likely nature of future commercial relations between Australia and the EU. Written by a team of respected authors from leading institutions in both Australia and Europe, the book provides a valuable, interdisciplinary analysis of the AEUFTA.

Latin America-European Union relations in the twenty-first century Arantza Gomez Arana, María J. García, 2022-03-22 Latin America-European Union relations in the twenty-first century provides a valuable overview of transatlantic trade agreement negotiations and developments in the first decades of the twenty-first century. This edited collection examines key motivations behind trade agreements, traces the evolution of negotiations and explores some of the initial impacts of new generation trade agreements with the EU on South American countries. The book makes an important contribution to our understanding of relations between these regions by contextualising relations and trade agendas, both in terms of domestic political and economic policies and broader global trends. It demonstrates the importance of a shift toward mega-regional trade agreements in the 2010s, particularly under the Obama administration in the United States, in shaping South American and European agendas for trade agreement negotiations and their outcomes. Detailed case studies in the book investigate EU relations and negotiations with countries that have successfully negotiated new generation trade agreements with the EU: Mercosur, the Andean states, Chile and Mexico. Other contributions offer a wider overview of EU-Latin American relations, including parliamentary and civil society relations. The net result is a balanced analysis of contemporary EU relations with South America, useful for students and scholars of foreign policy and political economy in both regions.

EU Regional Trade Agreements Maryna Rabinovych, 2021-04-07 This book unveils the potential of utilizing EU Regional Trade Agreements (RTAs) as an instrument of promoting the rule of law to third states. In doing so, the book combines development economics, foreign policy and legal perspectives at three levels of analysis of four sectors to introduce the concept of EU value-promoting RTAs. The book demonstrates that the EU RTAs bear considerable potential to be strategized as instruments of promoting the rule of law in third states, requiring, however, overcoming strict divides between EU political and economic cooperation, and values and *acquis* conditionality in its relations with third countries. This book will be of key interest to scholars and students of European Studies, European Union Law, EU external action/foreign policy, EU trade agreements and Development Studies, as well as to NGOs and think tanks that work on European affairs.

The Oxford Handbook of Indian Foreign Policy David M. Malone, C. Raja Mohan, Srinath Raghavan, 2015-07-23 Following the end of the Cold War, the economic reforms in the early 1990s, and ensuing impressive growth rates, India has emerged as a leading voice in global affairs, particularly on international economic issues. Its domestic market is fast-growing and India is becoming increasingly important to global geo-strategic calculations, at a time when it has been outperforming many other growing economies, and is the only Asian country with the heft to counterbalance China. Indeed, so much is India defined internationally by its economic performance (and challenges) that other dimensions of its internal situation, notably relevant to security, and of its foreign policy have been relatively neglected in the existing literature. This handbook presents an innovative, high profile volume, providing an authoritative and accessible examination and critique of Indian foreign policy. The handbook brings together essays from a global team of leading experts in the field to provide a comprehensive study of the various dimensions of Indian foreign policy.

State-Building, Rule of Law, Good Governance and Human Rights in Post-Soviet Space

Lucia Leontiev,Punsara Amarasinghe,2022-05-09 This edited book analyses the issues of state-building, the rule of law and good governance, and human rights in the post-Soviet space after 30 years from the USSR dissolution. In doing so, it assesses the presence (or absence) and the level of influence of the Soviet legacies in the constructed political and legal systems of the post-Soviet republics. Assessing whether individual's interests are protected in theory and practice, the book conceptualizes the legacies that the Soviet Union left in the post-Soviet space after 30 years of disintegration. This book will be of key interest to scholars and students of human rights, governance, democratization studies, post-Soviet and Russia studies, and more widely to comparative politics, political economy, humanitarian studies and political history.

Resources, Financial Risk and the Dynamics of Growth Roberto Pasqualino,Aled Wynne Jones,2020-05-19 This book presents a new System Dynamics model (the ERRE model), a novel stock

and flow consistent global impact assessment model designed by the authors to address the financial risks emerging from the interaction between economic growth and environmental limits under the presence of shocks. Building on the World3-03 Limits to Growth model, the ERRE links the financial system with the energy, agriculture and climate systems through the real economy, by means of feedback loops, time lags and non-linear rationally bounded decision making. Prices and their interaction with growth, inflation and interest rates are assumed to be the main driver of economic failure while reaching planetary limits. The model allows for the stress-testing of fat tail extreme risk scenarios, such as climate shocks, energy transition, monetary policies and carbon taxes. Risks are addressed via scenario analyses, compared to real available data, and assessed in terms of the economic theory that lies behind. The book outlines the case for a government led system change within this decade, where the market alone cannot lead to sustainable prosperity. This book will be of great interest to scholars of climate change, behavioural, ecological and evolutionary economics, green finance, and sustainable development.
