Alternatives for Modernizing U.S. Fighter Forces David Alan Arthur,2009

The F-16 Frédéric Lert,2014 The F-16 has thick skin. At an age when other aircraft are entering the museum, the fighter-bomber from General Dynamics still packs a punch in international competitions against the so-called fifth generation aircraft. The first prototype aircraft flew for the first time in 1974 and the operational life of the last aircraft built without a doubt will continue beyond 2040. Meanwhile, the lightweight fighter optimized for current day missions will have become a formidable fighter-bomber, with more than 4,400 aircraft having been built over the years. This second volume on the F-16 deals with versions C and D, which are still active in twenty countries

F-16 A and B Versions Frederic Lert,2010-10-01 At a time when other planes retire to museums, General Dynamics' fighter-bomber is still a formidable foe in international competitions against so-called fifth generation planes. The first prototype flew for the first time in 1974 and the operational career of the last aircraft built will continue well into the 2040s. Almost seventy years and still going strong! Meanwhile, this light fighter was optimized for daytime missions and became a formidable fighter-bomber; more than 4,400 were built and used by more than 25 countries.

The Next Generation Attack Fighter: Affordability and Mission Needs ,1997 The Air Force has embarked on a course to replace the most numerous fighter aircraft in its inventory, the F-16. The Joint Strike Fighter (JSF) may evolve from the tri-service Joint Advanced Strike Technology (JAST) program to replace the F-16 (and perhaps other Air Force ground-attack aircraft) as well as other air-to-ground fighters used by the Navy and Marine Corps. As the JAST program proceeds to a hardware demonstration phase, the Air Force is drafting statements of mission needs and operational requirements for the new aircraft. The Air Force asked RAND's Project AIR FORCE to analyze inventory levels, affordability, and mission needs for the new fighter, to augment Air Force and contractor studies. The study, documented in this report, found that the constraints of future budgets will severely circumscribe Air Force options for the JSF. Without a sharp reversal in defense budget trends or the allocation of a higher share of the Air Force budget to fighter modernization, the JSF will need to be a relatively low-cost, moderate-performance aircraft to fit within Air Force budget constraints. The good news is that an aircraft with a combat radius of 650 nm, moderate stealth, and a turn rate comparable to that of today's multirole aircraft can probably meet most of the services' needs in future regional conflicts.

F-35b V2. 0 Glenn Hoover,2018-10-27 This book contains detailed instructions on building the F-35B Lightning II 1/48 scale model aircraft from Kitty Hawk. This book covers VERSION 2.0 of the model. If the box on your model kit does not say Version 2.0 then you need my other book for the initial version. A spiral bound version is also available on my website. (glennhoovermodels.com) The F-35 Fighter Aircraft has three versions. The F-35A is for the Air Force. The F-35C is for the Navy and has a longer wingspan that can fold for carrier operations. The F-35B is for the Marines and can perform vertical takeoffs and landings. The F-35B Model is the most complex if you want to display its VSTOL capability that has many open access panels. I take the model kit instructions from Kitty Hawk and break them up into individual steps. I reorder the steps so that the small pieces (antennas, etc.) are assembled last which reduces the risk of damage when building the model. The steps are organized to insert the paint and decal steps in the best spot. This book provides a little history of the F-35B, photos of the model kit contents including the photo etch frets, a detailed list of tools that I used to build this model, along with a list of paints. The actual instruction section contains 649 steps that tells you what to dry fit, glue, and/or paint for each individual piece. Each step instruction shows the source (section) along with a block for you to mark that you completed the step. If the last column contains an X, that means there's a photo in the back with more details about the step. The major instruction sequence for this model is1. Ejection Seat & Ladder (Build) 2. Instrument Panels 3. Nose Gear Wheel Well 4. Engine 5. Engine Exhaust Nozzle (Build) 6. Main Landing Gear Wheel Wells 7. Lower Lift Fan Intake 8. Fuselage and Wings Assembly, Paint, and Decals 9. Internal Weapons 10. Nose and Main Landing Gear 11. Engine Exhaust Nozzle (Install) 12. Doors (Flare/Chaff, Engine Exhaust, Weapons Bay) 13. Doors (Nose and Main Landing Gear) 14. External Missiles 15. Vent and Lift Fan Doors (Top) 16. Tails (Decals) 17. Speed Brake and Antenna 18. Cockpit Detail 19. Ejection Seat (Install) 20. Canopy, Pitot Tubes, & Ladder

I provide an index of the individual sprue parts that show where in the book the part is mentioned. This index was a great way to make sure that no pieces were overlooked. Finally, there are several pages of in-process photos with assembly tips and the final photos of my build. This book is a great checklist to make your build go smoothly. Of course, you can feel free to use different tools, paint, weathering, etc. or even add your own diorama. It took me several weeks write the first cut of this book then another 2 months to do the actual build to test my instructions. I make tweaks to improve the instructions and add the photos. I did a lot of research and didn't see anything this detailed about a model build. Most articles or videos concentrate on parts of their build or just give a summary review. I wanted to go down to the piece level and take you thru the whole build. This is a nice tool. If you have this F-35B V2 model kit and get this book, you can dive right into the build with confidence. See a 16 page sample along with photos of finished models and other books at glennhoovermodels.com.
