Grand Prix Ford Graham Robson,2015-10-09 In 1965, Colin Chapman persuaded Ford to underwrite development of a V8 for the new 3000cc Grand Prix formula. Built by Cosworth, the new DFV engine won Lotus four World Championship Grands Prix in 1967. A year later, and now available to other constructors, the engine began its domination of Grand Prix racing.

Grand Prix Cars Denis Jenkinson,2015-10-02 “ In compiling this brief history of Grand Prix racing, along with descriptions of the more successful cars, I have limited myself to the period since World War II as the present day Grand Prix cars are mostly derived from the development and design of the early post war years. Although many ideas were taking shape in the period of the mid-thirties – such as the use of De Dion rear axle layouts, independent front suspension systems and hydraulic brakes – the main interest lay in engine design under a free ruling on capacity. It was not until about 1950 that a renaissance began in chassis design for Grand Prix cars and from then on a great deal of knowledge was gained; enough in fact, to enable roadholding to become a very exact science rather than a hit-and-miss affair. This development in the chassis and the search for improved road holding and higher cornering power was accentuated by the beginning of the era of unsupercharged racing, when power outputs were severely curtailed and speed had to be found by other means ...” (1959 – Denis Jenkinson)

Brabham BT52 Owners' Workshop Manual 1983 (all models) Andrew van de Burgt,2016-02-01 Designed to suit new regulations, after ground-effect cars were banned at the end of 1982, the BT52 was very distinctive, with short, angular sidepods and a dart-shaped profile. During the 1983 season, the innovative Brabham team, with now F1 supremo Bernie Ecclestone at the helm, introduced the first high-pressure fuel rig seen in F1, to speed up refuelling stops, and used 'ovens' to pre-heat tyres prior to pitstops. This manual provides a fascinating insight into the design, evolution, operation and maintenance of the Brabham BT52.

The Formula One Pack Ron Van der Meer,Adam Cooper,1999 Detailed pop-up spreads, interactive elements, 3D glasses, a CD of racing sounds, and a collection of informative booklets provide a unique view of the sport of Formula One racing. This pack brings to life the excitement of the Formula One experience. The first large paper sculpture recreates the famous Fanglo driving his Maserati 250F. Another feat of paper engineering shows us the inside of an Arrows transporter, revealing how cars are packed into the trailer. No amount of detail is spared as a turn of the page provides an intricate look inside a modern Formula One cockpit, putting us in the driver's seat. All the details of a pit stop can be viewed on a pop-up in which each crew member plays out his clearly defined role. In a treat for the true Formula One enthusiast, a complete three-dimensional Ferrari pop-up shows the genuine complexities of the vehicle. The final spread allows us to rotate the crankshaft of a V10 racing engine to see the pistons in action. The inclusive booklets, driver cards, and racetrack plans give detailed factual information that every Formula One fan will value. Red/blue filter glasses, included in the pack, give an x-ray view of the internal working of the modern racing car and allow diagrams of good and bad driving techniques to come to life on the page. All of this can be enjoyed to the background sounds of a CD recording of a day at the races.

Formula 1: Car by Car Peter Higham,2017-02-15 This book is the first in a multi-volume, decade-by-decade series covering the entire history of Formula 1 through its teams and cars. The series launches with the 1960s, when the British came to predominate after the rule of Italian and German manufacturers in the previous decade. All ten World Champions of the decade came from the English-speaking world – Britain, the USA, Australia and New Zealand – and most of the successful cars were British-built too, from Cooper, BRM, Lotus and Brabham. This was an era when small teams and privateers were involved in significant numbers and they are all covered, all the way to the most obscure and unsuccessful. This book shines new light on many areas of the sport and will be treasured by all Formula 1 enthusiasts. Year-by-year treatment covers each season in fascinating depth, running through the teams – and their various cars – in order of importance. Works teams form the core of the book: BRM, Ferrari and Lotus participated throughout the decade, while Cooper, Porsche, Honda, Brabham, Eagle, McLaren and Matra were the other winning marques. Privateer teams in all their colourful diversity are a special dimension of this book, topped by Rob Walker Racing, the finest privateer operation in Formula 1 history, and a winner in this decade with Stirling Moss and Jo Siffert. Privateers range from well-known names to one-race wonders long forgotten by even the most dedicated enthusiasts. Over 400 photos – in colour wherever possible – show every type of car raced by every team, presenting a comprehensive survey of all participants. The sweep of the decade covers rapid technical development, including monocoque chassis, ever-wider tyres and aerodynamic wings. Detailed text includes car specifications and technical essentials.

Inspired to Design Nigel Bennett,2013-10-15 Nigel Bennett's unique autobiography describes his life and career, from growing-up influenced by car design, to his education and the building of his 750 specials. He describes his work as Firestone Development Manager, recounting many tales of the outstanding designers and drivers of the period. Detailing his work in Formula 1, as a Team Lotus engineer, and then as Team Ensign designer, he also covers his Indycar designs at Theodore, Lola Cars and Penske Cars. Life after his retirement, his involvement in boat design and with modern F1 teams, are also recounted.

Racing Camaros Steve Holmes,2021-03-12 Chevrolet created the Camaro in response to the runaway sales success of the Ford Mustang, the first pony car. The Mustang went on sale in April 1964, and by August that same year, General Motors launched an intensive program to bring its own pony car to market. In September 1966, the Camaro went on sale. Chevrolet wanted the Camaro to be better than the Mustang in every area, including style, ride-quality, and performance. To that end, with the Mustang having already achieved so much racing success, Chevrolet wanted to beat it on the track also. *Racing Camaros: An International Photographic History 1966 – 1984* is a photographic celebration of road racing Camaros throughout the world. It focuses on production-based cars, rather than the heavily modified tube-frame silhouette machines that began appearing in the late 1970s. Included are images of big-budget factory-supported cars competing in the Trans-Am series, right through to low-buck independents, and cars competing throughout the world. For the first time, the international road racing representation of the Camaro is featured in a book, which includes countless photos that have never been published. Technical detail is provided throughout, from concept and design, right through its racing career, and the challenges and developments that took place to make it a winner. Only period images have been used. This is a true photographic history depicting the global popularity of the Chevrolet Camaro as a road racing car.

Automotive Art Project JAMES. RENDLE. PAGE,Steve Rendle,2021-03 Claude Nahum was brought up surrounded by all things automotive. The son of Bernar Nahum, considered to be the father of the Turkish automotive industry, Claude was fascinated by cars and engineering from an early age. Claude's career led him into automotive design, research and engineering, before eventually heading and growing the Kiraça group trading company in Europe, all the while maintaining his link with the automotive world. As Claude's career progressed, he began collecting and racing cars, and the growth of his stable led to him establishing The N Collection. Wishing to create a distinctive tribute to his favourite cars, Claude commissioned six leading artists, and gave them free rein to depict each of 25 cars from his collection in their own inimitable style. The Automotive Art Project showcases that work.

The British at Indianapolis Ian Wagstaff,2010-12-15 The British at Indianapolis recounts the history of the Indianapolis 500 race through the eyes and actions of those British born or British citizens who have driven in

it, or been involved in any other way - be it as a designer, mechanic, or official. It also examines the British built cars that have won the Indy 500 and the significance of the rear engined revolution brought to the Indianapolis Motor Speedway by Cooper in 1961, and elevated to success by Lotus and Lola. It includes such names as Jim Clark, Graham Hill, Nigel Mansell and 2010 Indy 500 champion, and two times winner, Dario Franchitti.

The Light Car Company Rocket Clive Neville,2020-09 The Light Car Company Rocket was the brainchild of former racing driver Chris Craft and design genius Gordon Murray, who relentlessly chased his goal of building the lightest production road car of all time. Starting with a clean sheet of paper, Murray's unique creation made extensive use of bespoke components and was crammed with the technological brilliance for which he's renowned. Today, it has a cult following and is recognised by die-hard enthusiasts and the motoring cognoscenti as being a landmark achievement in sports car history. Written by Rocket owner Clive Neville and designed by Rick Ward - the man who originally penned the car's badge and all of its publicity material - this book tells the full history of a fascinating car.
