Grand Prix Cars Denis Jenkinson, 2015-10-02 “ In compiling this brief history of Grand Prix racing, along with descriptions of the more successful cars, I have limited myself to the period since World War II as the present day Grand Prix cars are mostly derived from the development and design of the early post war years. Although many ideas were taking shape in the period of the mid-thirties – such as the use of De Dion rear axle layouts, independent front suspension systems and hydraulic brakes – the main interest lay in engine design under a free ruling on capacity. It was not until about 1950 that a renaissance began in chassis design for Grand Prix cars and from then on a great deal of knowledge was gained; enough in fact, to enable roadholding to become a very exact science rather than a hit-and-miss affair. This development in the chassis and the search for improved road holding and higher cornering power was accentuated by the beginning of the era of unsupercharged racing, when power outputs were severely curtailed and speed had to be found by other means ...” (1959 - Denis Jenkinson)

Porsche 70 Years Randy Leffingwell, 2017-09-19 This richly illustrated book offers a complete history of Porsche, Germany's premium sports-car maker. Porsche 70 Years focuses on engineering and design stories, while also paying homage to key players.

Ford GT40 Ray Hutton, 2018-02-06 This sumptuous book tells the story of one of the world's most important racing cars. Always raced in Gulf's iconic

blue-and- orange colours, this Ford GT40, known by its chassis number '1075', won the Le Mans 24 Hours not just once but twice, in 1968 and 1969, and the second victory came after the closest fight ever seen at the finish of this great endurance race. Four other championship wins – at Brands Hatch, Spa, Watkins Glen and Sebring – add to this GT40's distinction as the very best of its breed, driven by 'greats' such as Jacky Ickx, Pedro Rodríguez and Brian Redman. The car's entire competition life is covered in fascinating detail, together with biographies of its drivers and insights into John Wyer's crack team that ran it, all supported by a fine collection of period photographs.

**Austin Healey** Simon Ham, 2018-04-03 This first title in a brand-new series of Porter Profiles throws the spotlight on one of the most successful Big Healeys of all time. It is one of few cars to have such a varied history throughout a racing career that spans its entire life. Registered UJB 143, it was a works entry for the Sebring 12 Hours and Le Mans 24 Hours in 1960. After being sold to the privateer Ecurie Chiltern outfit, it was re-registered DD 300 and returned to the famous French enduro in '61 and '62. It then passed to Healey stalwart John Chatham and would regularly be raced over the next four decades, in everything from Modsports to sprints and finally historic events. The Healey's long and successful career continues with its current owners and it is all covered in this fascinating new book, complete with a superb selection of period photographs.

*Brothers Rodriguez* Carlos Jalife, 2009 Exhaustive research and extensive

Moon-face and Other Stories Jack London, 1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, The Call of the Wild (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including The Sea-Wolf (1904), White Fang (1906), South Sea Tales (1911), and Jerry of the South Seas (1917). One of London's most interesting novels is the semi-autobiographical Martin Eden (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

*The Psychology of Reading* Alan Kennedy, 2017-11-06 Originally published in 1984, this new introductory text fulfilled a need amongst both psychology and education students for a book which dealt with reading in a way that explored areas beyond the strictly practical question of how to teach children to read. Previous books on the psychology of reading had often concentrated on the analytic approach, in which reading had been seen in terms of a set of interconnected sub-skills and the experimental study of these components had become an end in itself. As a result, although great advances had been made in our understanding of certain aspects of the process, psychological studies of reading had increasingly been seen by teachers and others as unduly abstract. The Psychology of Reading goes back to first principles and attempts to set reading in its context alongside other cognitive activities,

particularly those involving memory and perceptual processes. Professor Kennedy argues that it is wrong to set reading apart as a 'skill' when it needs to be understood against a background of work in cognitive psychology. Reading is a social phenomenon concerned with human communication, and in this context it must be seen in terms of an interaction between writer and reader. The book explores the nature of this interaction and the various stylistic and other devices which sustain the 'contract' between reader and writer. In particular, the psychological processes which allow a reader to make sensible assumptions about a writer's intentions are dealt with in detail. No theory of reading, the author argues, should ignore the purpose of the enterprise. Similarly, explaining success and failure in teaching children to read may well hinge on an understanding of what children think reading is about. The style of this book is concise and largely non-technical. The Psychology of Reading will be welcomed as stimulating and demanding by experts and non-specialist general readers alike.

**Brazil** Stephen Kanitz, 1995 Is your company ready to take advantage of the new growth cycle that is beginning in Brazil and should last the next ten years? Few Brazilian experts are as qualified to answer this question as the author of this book, Stephen Charles Kanitz. The original version of this book, written in Portuguese, became a best seller in Brazil only a month after publication. A Harvard MBA, Professor Kanitz is the editor of the Brazilian equivalent of Fortune 500, the 'Best and Biggest' yearbook

published by Exame, Brazil's leading business magazine. As long ago as 1984, Professor Kanitz predicted the recession then awaiting the Brazilian economy. He is no intrinsic optimist. In this book, buttressed with masses of data, figures and examples, Professor Kanitz shows that the years of stagnation have been left behind. To take maximum advantage of this new economic boom, before competitors do, you must become aware that Brazil is ready for a new surge of growth, which will be similar in many respects to the 'economic miracle' of the seventies.

**Principles of Trauma Care** George Tom Shires,1985

Boomtown Saloons Kelly J. Dixon,2005 Boomtown Saloons also offers an equally vivid portrait of the modern historical archaeologist who combines time-honored digging, reconstruction, and analysis methods with such cutting-edge technology as DNA analysis of saliva traces on a 150-year-old pipestem and chemical analysis of the residue in discarded condiment bottles. Dixon's sparkling text and thoughtful interpretation of both physical and documentary evidence reveal a hitherto unknown aspect of material life and culture in one of the West's most storied boomtowns and demonstrate the vital, complex social role that the traditional western saloon served in its community.--
