Ford GT40 Ray Hutton,2018-02-06 This sumptuous book tells the story of one of the world's most important racing cars. Always raced in Gulf's iconic blue-and- orange colours, this Ford GT40, known by its chassis number '1075', won the Le Mans 24 Hours not just once but twice, in 1968 and 1969, and the second victory came after the closest fight ever seen at the finish of this great endurance race. Four other championship wins – at Brands Hatch, Spa, Watkins Glen and Sebring – add to this GT40's distinction as the very best of its breed, driven by 'greats' such as Jacky Ickx, Pedro Rodríguez and Brian Redman. The car's entire competition life is covered in fascinating detail, together with biographies of its drivers and insights into John Wyer's crack team that ran it, all supported by a fine collection of period photographs.

Austin Healey Simon Ham,2018-04-03 This first title in a brand-new series of Porter Profiles throws the spotlight on one of the most successful Big Healeys of all time. It is one of few cars to have such a varied history throughout a racing career that spans its entire life. Registered UJB 143, it was a works entry for the Sebring 12 Hours and Le Mans 24 Hours in 1960. After being sold to the privateer Ecurie Chiltern outfit, it was re-registered DD 300 and returned to the famous French enduro in '61 and '62. It then passed to Healey stalwart John Chatham and would regularly be raced over the next four decades, in everything from Modsports to sprints and finally historic events. The Healey's long and successful career continues with its current owners and it is all covered in this fascinating new book, complete with a superb selection of period photographs.

Toward a Sociology of Education John Beck,Chris Jenks,Nell Keddie,Michael F. D. Young,2020-03-10 By including material from literary, philosophical, and anthropological sources, and by selecting readings which consider educational practice both within and beyond formal educational contexts, this book broadens the character of sociological inquiry in education. The editors bring together material they have found valuable when working with students of education and sociology at all levels. Many of these articles and extracts are either inaccessible or have not been reprinted. The collection should stimulate inquiry about the assumptions underlying current debates on curriculum, streaming, school organization, methods of teaching, and preconceived notions of ability.

An Introduction to Quantitative Methods for Historians Roderick Floud, 2013-11-05 Many statements made by historians are quantitative statements, involving the use of measurable historical evidence. The historian who uses quantitative methods to analyse and interpret such information needs to be well acquainted with the particular methods and techniques of analysis and to be able to make the best use of the data that are available. There is an increasing need for training in such methods and in the interpretation of the large volume of literature now using quantitative techniques. Dr Floud's text, which is relevant to all branches of historical inquiry, provides a straightforward and intelligible introduction for all students and research workers. The simpler and more useful techniques of descriptive and analytical statistics are described, up to the level of simple linear regression. Historical examples are used throughout, and great attention is paid to the need to ensure that the techniques are consistent with the quality of the data and with the historical problems they are intended to solve. Attention is paid to problems of the analysis of time series, which are of particular use to historians. No previous knowledge of statistics is assumed, and the simple mathematical techniques that are used are fully and clearly explained, without the use of more mathematical knowledge than is provided by an O-level course. A bibliography is provided to guide historians towards the most useful further reading. This student friendly text was first published in 1973.
