**Oil Crops** Johann Vollmann,Istvan Rajcan,2009-09-18 When one is privileged to participate long enough in a professional capacity, certain trends may be observed in the dynamics of how challenges are met or how problems are solved. Agricultural research is no exception in view of how the plant sciences have moved forward in the past 30 years. For example, the once grand but now nearly forgotten art of whole plant physiology has given way almost completely to the more sophisticated realm of molecular biology. What once was the American Society of Plant Physiologists' is now the American Society of Plant Molecular Biology; a democratic decision to indemnify efforts to go beyond the limits of the classical science and actually begin to understand the underlying biological basis for genetic regulation of metabolic mechanisms in plants. Yet, as new technologies open windows of light on the inner workings of biological processes, one might reminisce with faint nostalgia on days long past when the artisans of plant physiology, biochemistry, analytical chemistry and other scientific disciplines ebbed and waned in prominence. No intentional reference is made here regarding Darwinism; the plant sciences always have been extremely competitive. Technology is pivotal. Those who develop and/or implement innovative concepts typically are regarded as leaders in their respective fields. Each positive incremental step helps bring recognition and the impetus to push a scientific discipline forward with timely approaches to address relevant opportunities.

**To Hell and Back** Niki Lauda,2021-04-27 Niki Lauda drove a car for sport, but crossed the line between life and death and fought back to even greater glory. Even people who know nothing of Formula One have heard of his crash at Nurburgring in 1976, when we was dragged from the inferno of his Ferrari so badly injured he was given the last rites. Within 33 days, he was racing again at Monza. His wounds bled, he had no eyelids. He was terrified. A year later, he reclaimed his World Championship title. In To Hell and Back he reveals how he battled fear to stage a comeback that seemed beyond human endurance. Then it's Lauda vs Hunt, an epic rivalry later dramatized in 2013's Hollywood blockbuster Rush, and he looks back on the strict childhood and parental disapproval that he believes gave him an 'addiction to excellence'. There'll never be another like him.

**McLaren MP4/4 Owners' Workshop Manual** Steve Rendle,2018-06-19 The McLaren MP4/4 is the iconic Honda V6 turbo-powered F1 car built by McLaren for the 1988 grand prix season, driven by Ayrton Senna and Alain Prost. Remarkably, the car won all but one race during 1988, and took McLaren's then-new recruit Senna to his first Drivers' World Championship after a season-long battle with team-mate Prost. McLaren achieved an astonishing 10 one-two finishes with the car, and suffered only two car-related retirements during the season. The MP4/4 is still statistically the most dominant F1 car ever built. Ironically, the fact that McLaren was already an enormously successful and well-resourced team prior to 1988 has led to the assumption that producing another winning car in the form of the MP4/4 was simply business as usual. The truth is rather different, with many challenges along the way, mistakes to resolve and, as ever in motor racing, an element of luck, all playing a part in the MP4/4's extraordinary success. A wealth of previously unpublished archive material, including original technical drawings and team documentation, provides fascinating new insight into the design and build of the MP4/4. Produced with the full cooperation of McLaren, and unique access to a race-winning MP4/4 chassis, this manual tells for the first time the accurate story of the design, engineering and operation of one of F1's most iconic cars, featuring extensive and often candid input from the designers, engineers and drivers involved. The McLaren story: Brief history of McLaren prior to the MP4/4 and subsequent history to the present day. Design and build of the MP4/4: The full story of how a completely new car, along with a one-off Honda engine, were designed and built for the 1988 season. The MP4/4 in action: A race-by-race account of the MP4/4's performance in the 1988 World Championship. The anatomy of the MP4/4: Chassis, aerodynamics, suspension, steering, brakes, Honda engine, transmission, wheels and tyres, cockpit and electrics. The drivers: Insight from Alain Prost and test-driver Emanuele Pirro, plus a profile of Ayrton Senna with thoughts from his former teammates. Appendices: Specifications, race results and statistics and full chassis histories.

Ford GT40 Ray Hutton,2018-02-06 This sumptuous book tells the story of one of the world’s most important racing cars. Always raced in Gulf’s iconic blue-and- orange colours, this Ford GT40, known by its chassis number ‘1075’, won the Le Mans 24 Hours not just once but twice, in 1968 and 1969, and the second victory came after the closest fight ever seen at the finish of this great endurance race. Four other championship wins – at Brands Hatch, Spa, Watkins Glen and Sebring – add to this GT40’s distinction as the very best of its breed, driven by ‘greats’ such as Jacky Ickx, Pedro Rodríguez and Brian Redman. The car’s entire competition life is covered in fascinating detail, together with biographies of its drivers and insights into John Wyer’s crack team that ran it, all supported by a fine collection of period photographs.

**Austin Healey** Simon Ham,2018-04-03 This first title in a brand-new series of Porter Profiles throws the spotlight on one of the most successful Big Healeys of all time. It is one of few cars to have such a varied history throughout a racing career that spans its entire life. Registered UJB 143, it was a works entry for the Sebring 12 Hours and Le Mans 24 Hours in 1960. After being sold to the privateer Ecurie Chiltern outfit, it was re-registered DD 300 and returned to the famous French enduro in ’61 and ’62. It then passed to Healey stalwart John Chatham and would regularly be raced over the next four decades, in everything from Modsports to sprints and finally historic events. The Healey’s long and successful career continues with its current owners and it is all covered in this fascinating new book, complete with a superb selection of period photographs.

Alfa Romeo T33/TT/3 Ian Wagstaff,2020-09 The Alfa Romeo T33/TT/3 was produced by Alfa's Autodelta racing department, under the guidance of Carlo Chiti, to compete in the 1972 World Championship for Makes. Hopes were high, as the previously dominant Group 5 racers (including the Porsche 917s and Ferrari 512s) had been outlawed in favour of 3-litre Group 6 cars, such as the Alfa. However, the Alfas struggled to take the fight to the well-developed and reliable Ferrari 312PBs, though scored regular podium positions. The highlight was a second place in the epic Targa Florio Sicilian road race, where Helmut Marko put in a stirring drive to come within seconds of victory. Marko was driving chassis 115.72.002, the most successful of the T33/TT/3 chassis Alfa Romeo T33/TT/3 tells the full story of the T33/TT/3, with an emphasis on the fascinating history of chassis 115.72.002, which competed in seven world championship rounds in 1972. The car would later have a unique second career on the race circuits and hill climbs of Greece, before racing in Japan and South Africa prior to an eventual return to Europe, where it is still a frequent competitor in historic events. The unique history and success of 115.72.002 makes it a worthy addition to Porter Press's acclaimed Exceptional Cars series.
