The Library Screen Scene Renee Hobbs, Liz Deslauriers, Pam Steager, 2019 In the past two decades, several U.S. states have explored ways to mainstream media literacy in school curriculum. However one of the best and most accessible places to learn this necessary skill has not been the traditional classroom but rather the library. In an increasing number of school, public, and academic libraries, shared media experiences such as film screening, learning to computer animate, and video editing promote community and a sense of civic engagement. The Library Screen Scene reveals five core practices used by librarians who work with film and media: viewing, creating, learning, collecting, and connecting. With examples from more than 170 libraries throughout the United States, the book shows how film and media literacy education programs, library services, and media collections teach patrons to critically analyze moving image media, uniting generations, cultures, and communities in the process.

The Future of Aging ,2010-07-28 Just as the health costs of aging threaten to bankrupt developed countries, this book makes the scientific case that a biological bailout could be on the way, and that human aging can be different in the future than it is today. Here 40 authors argue how our improving understanding of the biology of aging and selected technologies should enable the successful use of many different and complementary methods for ameliorating aging, and why such interventions are appropriate based on our current historical, anthropological, philosophical, ethical, evolutionary, and biological context. Challenging concepts are presented together with in-depth reviews and paradigm-breaking proposals that collectively illustrate the potential for changing aging as never before. The proposals extend from today to a future many decades from now in which the control of aging may become effectively complete. Examples include sirtuin-modulating pills, new concepts for attacking cardiovascular disease and cancer, mitochondrial rejuvenation, stem cell therapies and regeneration, tissue reconstruction, telomere maintenance, prevention of immunosenescence, extracellular rejuvenation, artificial DNA repair, and full deployment of nanotechnology. The Future of Aging will make you think about aging differently and is a challenge to all of us to open our eyes to the future therapeutic potential of biogerontology.

Nanocosmetics Arun Nanda,Sanju Nanda,Tuan Anh Nguyen,Susai Rajendran,Yassine Slimani,2020-05-06 Nanotechnology is key to the design and manufacture of the new generation of

cosmetics. Nanotechnology can enhance the performance and properties of cosmetics, including colour, transparency, solubility, texture, and durability. Sunscreen products, such as UV nano-filters, nano-TiO₂ and nano-ZnO particles, can offer an advantage over their traditional counterparts due to their broad UV-protection and non-cutaneous side effects. For perfumes, nano-droplets can be found in cosmetic products including Eau de Toilette and Eau de Parfum. Nanomaterials can also be used in cosmetics as transdermal drug delivery systems. By using smart nanocontainers, active compounds such as vitamins, antioxidants, nutrients, and anti-inflammatory, anti-infective agents, can be delivered effectively. These smart nanocontainers are typically related with the smart releasing property for their embedded active substances. These smart releases could be obtained by using the smart coatings as their outer nano-shells. These nano-shells could prevent the direct contact between these active agents and the adjacent local environments. Nanocosmetics: Fundamentals, Applications and Toxicity explores the formulation design concepts and emerging applications of nanocosmetics. The book also focuses on the mitigation or prevention of their potential nanotoxicity, potential global regulatory challenges, and the technical challenges of mass implementation. It is an important reference source for materials scientists and pharmaceutical scientists looking to further their understanding of how nanotechnology is being used for the new generation of cosmetics. Outlines the major fabrication and formulation design concepts of nanoscale products for cosmetic applications Explores how nanomaterials can safely be used for various applications in cosmetic products Assesses the major challenges of using nanomaterials for cosmetic applications on a large scale

Antibiotics and Bacterial Resistance Wiley, 2013-01-14 The need for novel antibiotics is greater now than perhaps anytime since the pre-antibiotic era. Indeed, the recent collapse of many

pharmaceutical antibacterial groups, combined with the emergence of hypervirulent and pan-antibiotic-resistant bacteria has severely compromised infection treatment options and led to dramatic increases in the incidence and severity of bacterial infections. This collection of reviews and laboratory protocols gives the reader an introduction to the causes of antibiotic resistance, the bacterial strains that pose the largest danger to humans (i.e., streptococci, pneumococci and enterococci) and the antimicrobial agents used to combat infections with these organisms. Some new avenues that are being investigated for antibiotic development are also discussed. Such developments include the discovery of agents that inhibit bacterial RNA degradation, the bacterial ribosome, and structure-based approaches to antibiotic drug discovery. Two laboratory protocols are provided to illustrate different strategies for discovering new antibiotics. One is a bacterial growth inhibition assay to identify inhibitors of bacterial growth that specifically target conditionally essential enzymes in the pathway of interest. The other protocol is used to identify inhibitors of bacterial cell-to-cell signaling. This e-book — a curated collection from eLS, WIREs, and Current Protocols — offers a fantastic introduction to the field of antibiotics and antibiotic resistance for students or interdisciplinary collaborators.

An Introduction to Acoustical Holography B. P. Hildebrand, 2013-11-11 Since the first papers by E. N. Leith and J. Upatnieks on the subject of holography appeared in 1961, there has been a virtual explosion of research activity in the field. More than 500 papers and articles on holo

graphy have appeared in the last ten years. Many applications of holography have been proposed, and some of these are beginning to enter the realm of usefulness. One of the applications that appears to hold great promise is acoustic imaging by means of holography. The first papers on this subject appeared in 1966, but already research activity in the field is burgeoning. Three symposia devoted to acoustical holography have been held and the papers published in book form. The purpose of this book is to bring together the results of research in acoustical holography, some of it as yet unpublished, under one cover so that workers in holography, nondestructive testing, medical imaging, underwater imaging, and seismic exploration can decide whether this new technique can be useful to them.

Higher Education and Work John Brennan, Maurice Kogan, Ulrich Teichler, 1996 This book examines the relationship between higher education and the world of work. It offers an international perspective on this relationship and considers the extent to which recent developments are national, or whether universal trends exist.

Event Policy Malcolm Foley, David McGillivray, Gayle McPherson, 2012-06-12 As the event management field expands, there has been an emergence of a distinctive 'events' policy field of study and a need for more advanced texts that look at this subject with a multidisciplinary research and theoretical orientation. *Events Policy: From Theory to Strategy* is the first text to embrace this new direction in the field of events management. Its main aim is to locate the phenomena of events (and festivity) within a theoretical and strategic framework and, in doing so, demonstrate the links between the development of events in policy-making and the theoretical exploration of the role of events as policy. Building on a strong coherent framework, the book explores the conceptual terrain in which events and festivities are located, evaluates the range of theoretical perspectives pertinent

to the study of events policy, appraises the socio-economic and socio-cultural implications of event-led policies internationally and draws together the main theoretical and event policy issues for the future. It utilizes a good range of international cases, from Dubai, Singapore, New Orleans and Glasgow, to help demonstrate the relationships between theory and strategy, and includes useful features to help students understand the subject and deepen their knowledge of the events policy terrain. This groundbreaking volume will be essential reading for students, researchers and academics of events and other related disciplines.

Events as a Strategic Marketing Tool, 2nd Edition Dorothé Gerritsen, Ronald van Olderen, 2020-03-19 Fully updated and with new case studies throughout, this second edition reviews the way organizations use events to connect with their visitors. It covers the development of the experience economy, the steps from strategy to concept, event design and touchpoints. It also considers the areas of marketing within which experiences play a role, such as branding, relationship marketing and city marketing. Concluding with a chapter on effect measurement and evaluation, and including a wealth of internationally relevant examples, the book gives a thorough insight into the way events can help reach strategic marketing goals.

Gender, Violence, Refugees Susanne Buckley-Zistel, Ulrike Krause, 2017-08-01 Providing nuanced accounts of how the social identities of men and women, the context of displacement and the experience or manifestation of violence interact, this collection offers conceptual analyses and in-depth case studies to illustrate how gender relations are affected by displacement, encampment and return. The essays show how these factors lead to various forms of direct, indirect and structural violence. This ranges from discussions of norms reflected in policy documents and practise, the relationship between relief structures and living conditions in camps, to forced military recruitment and forced return, and covers countries in Africa, Asia and Europe.
