Major Fungal Diseases of Rice S. Sreenivasaprasad, R. Johnson, 2013-04-17 Major Fungal Diseases of Rice: Recent Advances provides a comprehensive overview of latest research in rice fungal pathology. There are 25 chapters dealing with the blast, sheath blight, sheath rot, brown spot and scald diseases of rice as well as some broader topics. The book covers recent progress in a number of key fundamental aspects such as pathogenicity, pathogen diversity, molecular characterisation, gene cloning, genetics of host resistance and host-pathogen interactions. It also presents the current status and perspectives in strategic and applied areas such as epidemiology, resistance breeding, biological control, induced resistance, seed-borne diseases and quarantine issues and disease management strategies. This book is essential for rice researchers, pathologists and breeders and will also be suitable for cereal and plant pathologists in general, as there is an extensive coverage of recent research advances in rice blast, a model system in plant pathology.

How to Pass OSCP Series: Windows Privilege Escalation Step-By-Step Guide Alan Wang, 2020-11-13 This book is the first of a series of How To Pass OSCP books and focus on techniques used in Windows Privilege Escalation. This is a step-by-step guide that walks you through the whole process of how to escalate privilege in Windows environment using many common techniques. We start by gathering as much information about the target as possible either manually or using automated scripts. Next, we search for misconfigured services or scheduled tasks, insufficient file permission on binaries or services, vulnerable kernel, vulnerable software running with high privileges, sensitive information stored on local files, credential saved in the memory, registry settings that always elevate privileges before executing a binary, hard-coded credential contained in the application configuration files, and many more. Table of Contents Introduction Section One: Windows Configuration Chapter 1: AlwaysInstallElevated Section Two: Domain Controller Chapter 2: Zerologon Section Three: Windows Service Chapter 3: Service - Insecure File Permission Chapter 4: Service - Unquoted Path Chapter 5: Service - Bin Path Chapter 6: Service - Registry Chapter 7: Service - DLL Hijacking Section Four: Scheduled Tasks Chapter 8: Scheduled Tasks Section Five: Windows Registry Chapter 9: Autorun Chapter 10: Startup Applications Section Six: Windows Kernel Chapter 11: Kernel - EternalBlue Chapter 12: Kernel - MS15-051 Chapter 13: Kernel - MS14-058 Section Seven: Potato Exploits Chapter 14: Juicy Potato Chapter 15: Rogue Potato Section Eight: Password Mining Chapter 16: Password Mining - Memory Chapter 17: Password Mining - Registry Chapter 18: Password Mining - SiteList Chapter 19: Password Mining - Unattended Chapter 20: Password Mining - Web.config Section Nine: UAC Bypass Chapter 21: User Account Control Bypass For more information, please visit <http://www.howtopassoscp.com/>.

Impact Werner Goldsmith, 2001-11-01 Carefully organized, skillfully written text examines stereomechanical impact; vibrational aspects of impact; contact phenomena produced by the impact of elastic bodies; dynamic processes involving plastic strains; results of impact experiments and dynamic properties of materials. Well-illustrated treatment presumes some knowledge of partial differential equations, operational calculus, and elasticity. 284 illustrations.

Moon-face and Other Stories Jack London, 1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the

Far North, as is the book that brought him recognition, *The Call of the Wild* (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including *The Sea-Wolf* (1904), *White Fang* (1906), *South Sea Tales* (1911), and *Jerry of the South Seas* (1917). One of London's most interesting novels is the semi-autobiographical *Martin Eden* (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

Molecular Aspects of Host-Pathogen Interactions Society for General Microbiology. Symposium, M. A. McCrae, Society for General Microbiology, 1997-05-13 Reports the latest advances in defining the molecular basis of infection in both bacterial and viral systems.

Electron Microscopy of Plant Pathogens Kurt Mendgen, Dietrich-Eckhardt Lesemann, 2012-12-06 Plants, fungi, and viruses were among the first biological objects studied with an electron microscope. One of the two first instruments built by Siemens was used by Helmut Ruska, a brother of Ernst Ruska, the pioneer in constructing electron microscopes. H. Ruska published numerous papers on different biological objects in 1939. In one of these, the pictures by G. A. Kausche, E. Pfankuch, and H. Ruska of tobacco mosaic virus opened a new age in microscopy. The main problem was then as it still is today, to obtain an appropriate preparation of the specimen for observation in the electron microscope. Beam damage and specimen thickness were the first obstacles to be met. L. Marton in Brussels not only built his own instrument, but also made considerable progress in specimen preparation by introducing the impregnation of samples with heavy metals to obtain useful contrast. His pictures of the bird nest orchid root impregnated with osmium were revolutionary when published in 1934. It is not the place here to recall the different techniques which were developed in the subsequent years to attain the modern knowledge on the fine structure of plant cells and of different plant pathogens. The tremendous progress obtained with tobacco mosaic virus is reflected in the chapter by M. Wurtz on the fine structure of viruses in this Volume. New cytochemical and immunological techniques considerably surpass the morphological information obtained from the pathogens, especially at the host-parasite interface.

Sheath Rot Disease of Rice K. Manibhushan Rao, Rao Manibhushan, K. Manibhushan Rao, 1996 Sheath rot (ShR) has been known almost for a century, but was restricted to South East Asia and the Indian Subcontinent. Occurrence of the disease became widespread in mid 1970s when the high yielding technology was introduced by planting improved N-responsive cultivars. Today, ShR is a major constraint in rice production in irrigated as well as rainfed, upland rice. The disease has been reported in many rice growing countries and its spread causes concern because of its transmission and dissemination. The causal fungi, *Sarocladium* spp, have biological association with rice tungro virus, mites, stem-borers and mealy bugs and therefore increases the ShR incidence as well as severe yield losses. Scant information is available on the biology of the causal organism both in vitro and in vivo. Although a few tall cvs have been identified as resistant, almost all the high-yielding, improved cvs are susceptible to ShR. Biology of the ShR pathogens, host range, varietal resistance and future perspectives were discussed and the importance for a holistic approach to disease control was emphasized. Contents Chapter 1: History and distribution; Chapter 2: Symptomatology; Chapter 3: Disease Development; Disease incidence; Chapter 4: Disease Severity and Yield Loss; Linear and multiple regression analysis (MRA), Factors affecting yield loss; Chapter 5: Causal Organism; Nomenclature, Taxonomy, Type species, Morphology, Species concept, Light microscopic studies, SEM studies, Physiology, Carbon and nitrogen utilization, Sporulation, Toxins, Enzymes, Biochemical constituents, Mycelial constituents; Protein profile, Serological relationship, Crossed immunoelectrophoresis; Chapter 6: Pathogenicity; Mode of infection, Virulence of the isolates; Chapter 7: Host Range; Chapter 8: Disease Cycle; Chapter 9: Varietal Resistance; Method of inoculation, Method of scoring; Chapter 10: Host-Pathogen Interaction; N-fertilization, Phenol metabolism, PO/PPO, Plant hormones, Interaction with other stem attacking rice pathogens; Chapter 11: Disease Resistance; Induced resistance,

Phytoalexins; Chapter 12: Disease Control; Breeding for disease resistance, Chemical control, Biological control, Antagonists, Soil amendments, Biofertilizers, Remedial measures; Chapter 13: Future Perspectives; Preamble, Host-pathogen interaction at molecular level, Induced host resistance, Biocontrol strategies.

Kumba Africa Sampson Ejike Odum, 2020-11-03 'KUMBA AFRICA', is a compilation of African Short Stories written as fiction by Sampson Ejike

Odum, nostalgically taking our memory back several thousands of years ago in Africa, reminding us about our past heritage. It digs deep into the traditional life style of the Africans of old, their beliefs, their leadership, their courage, their culture, their wars, their defeat and their victories long before the emergence of the white man on the soil of Africa. As a talented writer of rich resource and superior creativity, armed with in-depth knowledge of different cultures and traditions in Africa, the Author throws light on the rich cultural heritage of the people of Africa when civilization was yet unknown to the people. The book reminds the readers that the Africans of old kept their pride and still enjoyed their own lives. They celebrated victories when wars were won, enjoyed their New yam festivals and villages engaged themselves in seasonal wrestling contest etc; Early morning during harmattan season, they gathered firewood and made fire inside their small huts to hit up their bodies from the chilling cold of the harmattan. That was the Africa of old we will always remember. In Africa today, the story have changed. The people now enjoy civilized cultures made possible by the influence of the white man through his scientific and technological process. Yet there are some uncivilized places in Africa whose people haven't tested or felt the impact of civilization. These people still maintain their ancient traditions and culture. In everything, we believe that days when people paraded barefooted in Africa to the swamp to tap palm wine and fetch firewood from there farms are almost fading away. The huts are now gradually been replaced with houses built of blocks and beautiful roofs. Thanks to modern civilization. Donkeys and camels are no longer used for carrying heavy loads for merchants. They are now been replaced by heavy trucks and lorries. African traditional methods of healing are now been substituted by hospitals. In all these, I will always love and remember Africa, the home of my birth and must respect her cultures and traditions as an AFRICAN AUTHOR.

Sheath Blight Disease of Rice K. Manibhushan Rao, 1995 Sheat blight (ShB) is considered as one of the serious diseases of rice in Asian countries and the USA. The increase in ShB incidence is largely due to changes in the rice cultivation methods as well as in the use of early-maturing, semi-dwarf, high-yielding and N-responsive cultivars. Against this background, this monographic study is aimed primarily presenting the status of our knowledge by compiling the literature available as well as the author's own experience on rice diseases over three decades. The book is meant primarily for the graduate students, rice pathologists and extension workers. This compendium should not only stimulated further research but also will be used for ShB management. It traces the history of the disease, the casual agents, its nomenclature, taxonomy, morphology, physiology, variability, histopathology and ultra structure. It is profusely illustrated with excellent plates and number of tables which project the current status in a better way. Also information has been given on the disease management by induced resistance as well as biocontrol and the future resistance as well as biocontrol and the future perspectives on this important rice disease. Contents Chapter 1: History and Distribution; Chapter 2: Symptomatology; Chapter 3: Disease Development; Chapter 4: Yield Losses; Chapter 5: Causal Organism; Nomenclature, Taxonomy, Morphology, Cell and molecular biology, Physiology, Sclerotial growth and maturation, Variability; Chapter 6: Pathogenicity; Chapter 7: Host Range; Chapter 8: Environmental Conditions; Chapter 9: Disease Cycle; Chapter 10: Histopathology; Host penetration, Host colonization, Ultrastructure; Chapter 11: Varietal Resistance; Method of inoculation, The efficacy of the scale, Comparison of the assessment methods; Chapter 12: Physiology of Host-Pathogen Interaction; Carbohydrate metabolism, Nitrogen metabolism, Nitrogen fertilization, Phosphorus and potash fertilization, Detection of fungal mass in situ; Chapter 13: Disease Resistance; Phenol metabolism, Pheno biosynthetic enzymes, Changes in phenol constituents, Effect of PAA on phenol metabolism, Oxidized products of chlorogenic acid, Induced resistance, Genetic basis of host resistance, Stability of horizontal resistance; Chapter 14: Disease Control; Chemical control, Antibiotics, Biological control; Chapter 15: Challenges for the Future; Preamble, Economic losses, Cultural practices, Host resistance, Biocontrol potential.

True Crime Writings in Colonial India Shampa Roy,2020-08-10 The emergent culture of crime writings in late 19th century colonial Bengal (India) is an interesting testimony to how literature is shaped by various material forces including the market. This book deals with true crime writings of the late 1800s published by 'lowbrow publishing houses' — infamous for publishing 'sensational' and the 'vulgar' literature — which had an avid bhadrak (genteel) readership. The volume focuses on select translations of true crime writings by Bakaulah and Priyanath Mukhopadhyay who worked as darogas (Detective Inspectors) in the police department in mid-late nineteenth century colonised Bengal. These published accounts of cases investigated by them are among the very first manifestations of the crime genre in India. The writings reflect their understandings of criminality and guilt, as well as negotiations with colonial law and policing. Further, through a selection of cases in which women make an appearance either as victims or offenders, (or sometimes as both,) this book sheds light on the hidden gendered experiences of the time, often missing in mainstream Bangla literature. Combining a love for suspense with critical readings of a cultural phenomenon, this book will be of much interest to scholars and researchers of comparative literature, translation studies, gender studies, literary theory, cultural studies, modern history, and lovers of crime fiction from all disciplines.

Red Hat Fedora Core 6 Unleashed Andrew Hudson,Paul Hudson,2007 Continuing with the tradition of offering the most comprehensive coverage of Red Hat Linux on the market, Fedora Core 6 Unleashed includes new and additional material based on the latest release of Red Hat's Fedora Core Linux distribution. Incorporating an advanced approach to presenting information about Fedora, the book aims to provide the best and latest information that intermediate to advanced Linux users need to know about installation, configuration, system administration, server operations, and security. Fedora Core 6 Unleashed thoroughly covers all of Fedora's software packages, including up-to-date material on new applications, Web development, peripherals, and programming languages. It also includes updated discussion of the architecture of the Linux kernel, USB, KDE, GNOME, Broadband access issues, routing, gateways, firewalls, disk tuning, GCC, Perl, Python, printing services (CUPS), wireless support, international support (Unicode 5.0 support), Java programs support (Eclipse), and security.
