**Indy Split: The Big Money Battle That Nearly Destroyed Indy Racing** John Oreovicz, 2021-05-30 Tradition, technology, and personal bravery combined to make the Indianapolis 500 one of the world's most famous sporting events. However, political infighting within the industry--which climaxed with a 12-year Split from 1996 to 2007 between competing forms of Indy car racing--prevented the sport from achieving its potential. The Split seriously tarnished the reputation of the Indianapolis 500 and allowed NASCAR to become America's most popular form of motorsport. But Indy car racing's dysfunction didn't originate in 1996. The story begins in 1945, when a businessman from Terre Haute, Indiana named Tony Hulman rescued the Indianapolis Motor Speedway from potential redevelopment. Over the next 75 years, the Hulman-George family used the stature of the Speedway to carve out a powerful position in American auto racing. Stewardship of the IMS often brought the family into conflict with Indy car competitors. A volatile period in the late 1970s resulted in the formation of Championship Auto Racing Teams (CART), and tensions

ramped up even more when Hulman's grandson, Tony George, assumed power in 1990. The Split forced Indy car fans, sponsors, broadcasters and participants to choose sides. It created confusion and animosity and caused tremendous damage to the sport. With negotiations driven by legendary racer Mario Andretti and actor/racer Paul Newman, The Split was finally resolved in 2008, only for George to walk away less than three years later from the role he so desperately coveted. The long struggle for stability and leadership was finally resolved in 2020 when Roger Penske acquired IMS and the IndyCar Series.

Aerodynamic Drag Mechanisms of Bluff Bodies and Road Vehicles Gino Sovran, 2012-12-06  
These Proceedings contain the papers and oral discussions presented at the Symposium on AERODYNAMIC DRAG MECHANISMS of Bluff Bodies and Road Vehides held at the General Motors Research Laboratories in Warren, Michigan, on September 27 and 28, 1976. This international, invitational Symposium was the twentieth in an annual series, each one having been in a different technical discipline. The Symposia provide a forum for areas of science and technology that are of timely interest to the Research Laboratories as well as the technical community at large, and in which personnel of the Laboratories are actively involved. The Symposia furnish an opportunity for the exchange of ideas and current knowledge between participating research specialists from educational, industrial and governmental institutions and serve to stimulate future research activity. The present world-wide energy situation makes it highly desirable to reduce the force required to move road vehicles through the atmosphere. A significant amount of the total energy consumed for transportation is expended in overcoming the aerodynamic resistance to motion of these vehicles. Reductions in this aerodynamic drag can therefore have a large impact on ground transportation energy requirements. Although aerodynamic development work on road vehides has been performed

for many years, it has not been widely reported or accompanied by much basic research.

Dreaming Of Jupiter Ted Simon, 2012-12-20 Ted Simon is the author of the classic travel book JUPITER'S TRAVELS. It documents his four-year journey round the world by motorbike, travelling through Europe, Africa, South and North America, and Asia. A number one bestseller in the late 1970s, it is still regarded as one of the greatest motorcycle books - indeed, one of the greatest travel books - ever written. In 2001, at the age of 69, Ted Simon decided to retrace his journey, and DREAMING OF JUPITER is the result. It took him two and a half years - during which time he revisited all the countries he had travelled through in the 1970s. He found much had changed, and he reflects upon the increased poverty, political upheavals, environmental issues and indeed the changes in himself. But ultimately, DREAMING OF JUPITER is a hugely inspiring read with a positive message at its heart - that even at the age of 70 you can still set off on an adventure, and be surprised and excited by what life throws at you along the way.

*Stirling Moss 80/80* Peter Russell, 2009

*Crusader* Steve Holter, 2021-06-15 The tale of Crusader, the jet-powered boat of 1952, appears to be a simple one about the ambition of John Cobb and Reid Railton, two unassuming but deeply gifted men, to break the water speed record on Loch Ness only for their efforts to end in tragedy. In fact the story behind that fateful outcome -- Cobb's death on his first high-speed run -- is a complex web of clever design and inspirational endeavour mixed with personality clashes and errors of judgment. After many years of research, including access to a wealth of original documentation, Steve Holter unravels the entire saga of the ill-fated Crusader and presents a compelling detective story. John Cobb: the modest businessman with such a thirst for speed that he wanted to become the fastest man on water as well as on wheels after setting his land speed record of 396.196mph in 1947. Reid Railton: inspired designer and long-time friend behind Cobb's greatest speed accomplishments, notably with the Napier-Railton (holder of the lap record at Brooklands) and the Railton Mobil Special (land speed record car). In-depth study of Railton's innovative 'three-point' hull design for Crusader, with two rear sponsons and a single 'planing shoe' at the front -- plus a De Havilland Ghost jet engine delivering 5,000lb of thrust. Evolution of the design in parallel with testing of scale models, including a miniature jet-powered version evaluated near Portsmouth Harbour. Assessment and description of boat-builder Vosper's wooden construction, under Peter Du Cane's direction. An exhaustive account of proceedings at Loch Ness, where Cobb finally attempted a high-speed run on 29 September 1952 and achieved 206.89mph, faster than anyone had previously gone on water. Analysis of the structural failure that destroyed Crusader and killed Cobb. Much of

the story is told in the words of the key protagonists, drawing in particular on correspondence and written accounts from the key people involved, most notably John Cobb, Reid Railton and Peter Du Cane.

*Jupiter's Travels in Camera* Ted Simon, 2013-11-01 For four years during the 1970s Ted Simon rode a motorcycle around the world, something no-one had ever done before. He described his adventures first in regular bulletins for The Sunday Times and then, after his return, in *Jupiter's Travels*, a book that has become revered as a classic of travel writing. Published by Penguin, *Jupiter's Travels* has sold nearly a million copies in the intervening years and has remained in print throughout that time, remaining a strong seller even today. Ted Simon took a decent SLR camera on the trip, but only a handful of his several thousand color photographs were included in *Jupiter's Travels*. These are now included in the book published to coincide with the 40th anniversary of his ground breaking trip.

Freedomnomics John R. Lott, 2007-06-04 Are free market economies really based on fleecing the consumer? Is the U.S. economy truly just a giant free-for-all that encourages duplicity in our everyday transactions? Is everyone from corporate CEOs to your local car salesman really looking to make a buck at your expense? In *Freedomnomics: Why the Free Market Works and Other Half-Baked Theories Don't*, economist and bestselling author John R. Lott, Jr., answers these and other common economic questions, bravely confronting the profound distrust of the market that the bestselling book *Freakonomics* has helped to popularize. Using clear and hard-hitting examples, Lott shows how free markets liberate the best, most creative, and most generous aspects of our society - while efforts to constrain economic liberty, no matter how well-intentioned, invariably lead to increased poverty and injustice.
