Drawing Futures Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture.Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie.Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

Jim Clark Eric Dymock,2017-04-01 Out of print for twenty years, a new edition of Jim Clark 'Tribute to a Champion' by Eric Dymock will be published in the spring. Lightly edited and completely redesigned in colour throughout, this eagerly sought classic of motor racing celebrates the life and achievements of Jim Clark (1936-1968), World Champion 1963 and 1965. In the new book, Eric Dymock details his place in motor racing history and total command of Formula 1, portraying him as an individual, nail-biting and insecure, yet the greatest driver in any sort of motor sport. From a Scottish farming family Clark rewrote the annals of American racing at Indianapolis, coming second at his first attempt in 1963, winning in 1965. He seemed a match for any odds during eight dangerous years at the top of motor racing, yet died in an unlikely accident at a minor event at Hockenheim on April 7th 1968. Genius at the wheel was not enough. Rivals' subsequent safety campaigns saved countless lives on and off the track. Eric Dymock observed Clark from before he ever sat in a racing car, covering his professional career as member of The Motor magazine staff from 1962, and then as specialist motor racing correspondent from 1966. This book has photographs of Jim Clark's birthplace, home, memorabilia and archive material from the Jim Clark Room at Duns. The measured analysis throws light on the tense mood of Formula 1 in the hazardous 1960s when Clark narrowly missed four consecutive world titles. Misfortune in the closing laps of the final race of the season twice denied him a unique quartet. Some of his other records remain secure however. Clark's eight grand slams (pole position, leading every lap, fastest lap and winning a Grand Prix - his closest rivals Alberto Ascari and Michael Schumacher managed only five) is unlikely to be matched. The new edition will go on sale in the spring at regular bookshop prices for a new generation of Formula 1 fans, as the 50th anniversary of Clark's accident approaches.

Molecular Signaling in Spermatogenesis and Male Infertility Rajender Singh,2019-11-06 Spermatogenesis involves the coordination of a number of signaling pathways, which culminate into production of sperm. Its failure results in male factor infertility, which can be due to hormonal, environmental, genetic or other unknown factors. This book includes chapters on most of the signaling pathways known to contribute to spermatogenesis. Latest research in germ cell signaling like the role of small RNAs in spermatogenesis is also discussed. This book aims to serve as a reference for both clinicians and researchers, explaining possible causes of infertility and exploring various treatment methods for management through the basic understanding of the role of molecular signaling. Key Features Discusses the signaling pathways that contribute to successful spermatogenesis Covers comprehensive information about Spermatogenesis at one place Explores the vital aspects of male fertility and infertility Explains the epigenetic regulation of germ cell development and fertility Highlights the translational opportunities in molecular signaling in testis

Ernst Neufert, Peter Neufert Nicole Delmes,Johannes Kister,Lilian Pfaff,Michael Kasiske,2014 The numerous designs by Ernst Neufert (1900-1986) and his son, Peter Neufert (1925-1999), which ranged from residences to industrial and office buildings, helped define twentieth-century German architecture. Especially influential, of course, were the many years that Ernst Neufert taught at the Technical University of Darmstadt as well as his Bauentwurfslehre, a theory of architectural design that continues to be a standard work to this day. The Neuferts' buildings stand for Modernism and the rebuilding of Germany after World War II. Ernst Neufert, for instance, designed the strictly functional Quelle distribution center in Nuremberg. Prestressed concrete offered technical opportunities for Peter Neufert's bold experiments in form, which clearly distinguished his buildings in the late sixties from those of his father. Using large-format photographs, this volume documents the first stage of six selected building projects by the two architects and attests to the quality and relevance of their designs.

High Speed Catamarans and Multihulls Liang Yun,Alan Bliault,Huan Zong Rong,2018-10-29 High speed catamaran and multihull high speed marine vessel have become very popular in the last two decades. The catamaran has become the vessel of choice for the majority of high speed ferry operators worldwide. There have been significant advances in structural materials, and structural design has been combined with higher power density and fuel efficient engines to deliver ferries of increasing size. The multihull has proven itself to be a suitable configuration for active power projection across oceans as well as for coastal patrol and protection, operating at high speedd for insertion or retrieval with a low energy capability. At present there is no easily accessible material covering the combination of hydrodynamics, aerodynamics, and design issues including structures,

powering and propulsion for these vehicles. Coverage in High Speed Catamarans and Multihulls includes an introduction to the history, evolution, and development of catamarans, followed by a theoretical calculation of wave resistance in shallow and deep water, as well as the drag components of the multihull. A discussion of vessel concept design describing design characteristics, empirical regression for determination of principal dimensions in preliminary design, general arrangement, and methods is also included. The book concludes with a discussion of experimental future vehicles currently in development including the small waterplane twin hull vessels, wave piercing catamarans, planing catamarans, tunnel planing catamarans and other multihull vessels.

War in the Tribal Zone R. Brian Ferguson, Neil L. Whitehead, 2000-01 In this text, the editors aim to make it impossible for researchers and theorists to treat preindustrial warfare without addressing the larger contexts within which all societies are embedded.

Ecosystems Biodiversity Oscar Grillo, Gianfranco Venora, 2011-12-16 Ecosystems can be considered as dynamic and interactive clusters made up of plants, animals and micro-organism communities. Inevitably, mankind is an integral part of each ecosystem and as such enjoys all its provided benefits. Driven by the increasing necessity to preserve the ecosystem productivity, several ecological studies have been conducted in the last few years, highlighting the current state in which our planet is, and focusing on future perspectives. This book contains comprehensive overviews and original studies focused on hazard analysis and evaluation of ecological variables affecting species diversity, richness and distribution, in order to identify the best management strategies to face and solve the conservation problems.

Rapid Diagnosis of Mycoplasmas Itzhak Kahane, Amiram Adoni, 2012-12-06 This compendium is the result of the FEMS Workshop on Rapid Diagnosis of Mycoplasmas which I organized and which took place in Jerusalem, Israel, August 11-23, 1991. The first week's sessions were held at a resort on the outskirts of Jerusalem and consisted of lectures and discussions. This part was modelled along the lines of the Gordon Conference in the USA, i.e., in an intimate atmosphere in which everyone could mix and exchange ideas, and was very beneficial. About 100 scientists from around the world attended the first week. During the first week, the biology, molecular biology and pathophysiology of mycoplasmas, as well as all the main diagnostic methods were covered, including both conventional and the newer technologies. The session on mycoplasmas in the human urogenital tracts was held in conjunction with the Israel Society for the Study and Prevention of Sexually Transmitted Disease. The second week was a laboratory session and was held at the Hebrew University-Hadassah Medical School campus in Ein Karem, Jerusalem. All experiments were conducted by eminent specialists in their field. The lab session had 36 participants from 19 countries who used the most modern techniques for the diagnosis of mycoplasmas in medicine, veterinary medicine and agriculture. The efficacy of several commercial kits were also tested at this time. I want to again thank everyone who helped and supported this workshop, as well as the authors of the various chapters.

Handbook on Cyanobacteria Percy M. Gault, Harris J. Marler, 2009 Cyanobacteria, also known as blue-green algae, blue-green bacteria or cyanophyta, is a phylum of bacteria that obtain their energy through photosynthesis. They are a significant component of the marine nitrogen cycle and an important primary producer in many areas of the ocean, but are also found in habitats other than the marine environment; in particular, cyanobacteria are known to occur in both freshwater and hypersaline inland lakes. They are found in almost every conceivable environment, from oceans to fresh water to bare rock to soil. Cyanobacteria are the only group of organisms that are able to reduce nitrogen and carbon in aerobic conditions, a fact that may be responsible for their evolutionary and ecological success. Certain cyanobacteria also produce cyanotoxins. This new book presents a broad variety of international research on this important organism.
