Genome Mapping and Genomics in Animal-Associated Microbes Vishvanath Nene,Chittaranjan Kole,2008-11-24 Achievements and progress in genome mapping and the genomics of microbes supersede by far those for higher plants and animals, in part due to their enormous economic implication but also smaller genome size. In the post-genomic era, whole genome sequences of animal-associated microbes are providing clues to depicting the genetic basis of the complex host-pathogen relationships and the evolution of parasitism; and to improving methods of controlling pathogens. This volume focuses on a globally important group of intracellular prokaryotic pathogens which affect livestock animals. These include Brucella, Mycobacterium, Anaplasma and Ehrlichia, as well as the protozoan pathogens Cryptosporidium and Theileria, for which genome sequence data is available. Insights from comparative genomics of the microbes described provide clues to the adaptation involved in host-microbe interactions, as well as resources potentially useful for application in future research and product development.

Amazonian Ethnobotanical Dictionary James A. Duke,2018-02-06 The Amazonian Ethnobotanical Dictionary presents an exciting new rainforest book, designed and conceived in the rainforest and dedicated to its preservation. The book contains concise accounts of the various uses to which prominent Amazonian plants are put by the local rainforest inhabitants. Although emphasis is placed on plant foods and forest medicines, there is also commentary on other relevant applications, including natural artifacts, house construction, natural pesticides, and ornamental and fodder plants. More than 1,000 species are covered and over 200 illustrated. An index to Spanish and English names leads to the scientific name, and the index to plants provides its medicinal application. There are even suggestions on how to eat palm grubs and how to make an Amazonian salad dressing. All royalties from the book are donated to the Amazonian Center for Environmental Education and Research (ACEER) in order to continue its preservation of one of the world's most diverse forests.

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Tourism and Development Richard Sharpley,David J. Telfer,2002 This text explores the role of tourism as a potential contributor to socio-economic development in destination areas. Establishing a link between tourism studies and development studies, it considers what is meant by development, the processes through which development may be achieved and, in particular, a number of fundamental issues related to the use of tourism as a development agent. In so doing, it challenges conventional thinking about the relationship between tourism and development.

Chromosome Engineering in Plants P.K. Gupta,T. Tsuchiya,1991-05-13 This two-volume work surveys the entire range of general aspects of chromosome research on plants. This first volume is divided into two sections. Section A consists of 11 chapters covering the entire range of general aspects of chromosome research in plants (including a chapter on genetic engineering in crop improvement). Section B is devoted to cytogenetics of cereals and millets (wheat, rye, barley, triticale, oats, maize, rice, pearl millet, and minor millets). More than one chapter is devoted to the same crop to give a detailed treatment of chromosome research (including molecular biology) in these crops. The second volume deals with cytogenetics of plant materials including legumes, vegetable and oil crops, sugar crops, forage crops, fibre crops, medicinal crops and ornamentals. This work will be useful both as a reference work and a teaching aid to satisfy a wide range of workers. Every chapter has been written by an expert who has been involved in chromosome research on a particular plant material for many years.

Hearing Impairment and Disability Ariel Tenenbaum,Joav Merrick,Mohd N. Zakaria,2020 Much research has been conducted to provide researchers and hearing healthcare professionals with updated information in regard to hearing assessments, results interpretation and case management. This ongoing research is particularly imperative to guide clinicians with optimized methods in assessing and managing pediatric patients with hearing impairment and disability. As such, tremendous research efforts have been made in determining the most optimum methods in assessing hearing using both subjective and objective tests. Since hearing loss can occur due to disrupted peripheral and/or central auditory pathway, there is also a growing interest to study children with auditory processing disorder (APD). Even though notable achievements have been observed in understanding APD, more research is required, particularly in establishing a gold standard APD test and its specific interventions. Additionally, having an objective test such as speech-evoked auditory brainstem response is beneficial to understand how speech sounds are encoded within the brainstem region in hearing-impaired children, as well as in those with compromised neural function. In this book, we have gathered research from Malaysia and India in this field and hope it will be of interest to our readers--
