This pack brings to life the excitement of the Formula One experience. The first large paper sculpture recreates the famous Fanglo driving his Maserati 250F. Another feat of paper engineering shows us the inside of an Arrows transporter, revealing how cars are packed into the trailer. No amount of detail is spared as a turn of the page provides an intricate look inside a modern Formula One cockpit, putting us in the driver's seat. All the details of a pit stop can be viewed on a pop-up in which each crew member plays out his clearly defined role. In a treat for the true Formula One enthusiast, a complete three-dimensional Ferrari pop-up shows the genuine complexities of the vehicle. The inclusive booklets, driver cards, and racetrack plans give detailed factual information that every Formula One fan will value. Red/blue filter glasses, included in the pack, give an x-ray view of the internal working of the modern racing car and allow diagrams of good and bad driving techniques to come to life on the page. Multinational Enterprises and the Global Economy John H. Dunning, Sarianna M. Lundan, 2008-01-01 For many years to come this volume. . . is surely going to be the ultimate reference work on international business. . . thanks to Dunning and Lundan, have at their disposal, a wealth of relevant data, as well as theoretical and empirical analyses, which will enable them to assess the capabilities, contributions and challenges posed by the multinational enterprises to the global economy. Seev Hirsch, International Business Review Multinational Enterprises and the Global Economy has become a classic in international business. . . Yet , the book s second edition is even better than the first, in part because of Professor Dunning s wise decision to choose Dr Lundan as his co-author and to draw upon her deep knowledge of various strands of research on business government relations and the societal effects of firm behaviour. . . In addition to being a remarkably useful reference book, Multinational Enterprises and the Global Economy is the first book any IB doctoral student should read to understand the significance and richness of IB scholarship as it has developed over the past 50 years. Alain Verbeke, Journal of International Business Studies The second edition of Multinational Enterprises and the Global Economy provides unparalleled coverage not only of the literature relevant to IB research but also of the evolution of IB in the world economy. Dunning and Lundan offer powerful insights into the societal effects of MNEs and the role of business government relations in the IB context. Journal of International Business Studies This wonderful book offers the definitive synthesis of the modern literature on the economic aspects of international business. It is encyclopedic yet full of incisive insights. It is a

creative masterpiece which unbundles the DNA of the multinational enterprise and shows how it is the cornerstone of the field of international business. Alan M. Rugman, University of Reading, UK The rise of the multinational enterprise, and the consequent globalisation of the world economy, was arguably the single most important phenomenon of the second half of the twentieth century. This magisterial book, written by two leading authorities, examines this phenomenon in depth. It explains how foreign investment by multinationals diffused advanced technologies and novel management methods, driving productivity growth in Europe, Asia and North America; however, economic inequalities were reinforced as rich countries attracted more foreign investment than poor ones. This new edition of a classic work is not only an authoritative guide to contemporary multinational business, but a major historical resource for the future. Mark Casson, University of Reading, UK This thoroughly updated and revised edition of a widely acclaimed, classic text will be required reading for academics, policymakers and advanced students of international business worldwide. Employing a distinctive and unified framework, this book draws together research across a range of academic fields to offer a synthesis of the determinants of MNE activity, and its effects on the economic and social well-being of developed and developing countries. Unique to the new edition is its focus on the institutional underpinnings of the resources and capabilities of MNEs, and the role of MNE activity in transmitting and facilitating institutional change. Since the initial publication of this book more than a decade ago, the economic, managerial and social implications of globalisation and technological advancement have become even more varied and prominent. Accompanying these developments, there has been a rise in

scholarly interest in interdisciplinary research addressing the important challenges of an ever-changing physical and human environment. Drawing on articles and books from international business and economics, as well as economic geography, political economy and strategic management, a systematic overview of the developments in scholarly thinking is prese

The International Vehicle Aerodynamics Conference IMechE,2014-11-12

Aerodynamics has never been more central to the development of cars, commercial vehicles, motorbikes, trains and human powered vehicles, driven by the need for efficiency: reducing carbon dioxide emissions, reducing fuel consumption, increasing range and alleviating problems associated with traffic congestion. Reducing vehicle weight makes it more challenging to ensure that they are stable and handle well over a wide range of environmental conditions. Lighter structures are also more vulnerable to aerodynamically induced vibration. Alongside this, customers demand an environment that is quiet, comfortable and maintains their vision of the world around them in all weathers. These aims must be met by designing vehicles that engage customers emotionally, promoting the brand values of manufacturers and operators. This can only be done by collaboration between designers and aerodynamicists. Examine the latest developments in vehicle aerodynamic development Explore opportunities to network and share experiences

around different areas Focus on future challenges and the engineering knowledge and technology required to resolve them Discuss other areas of development including handling and stability, tyre aerodynamics and modelling, aeroacoustics and fluid structure interaction

Formula One: The Champions Maurice Hamilton, 2020-03-03 Since the Grand Prix's start in 1950 just 33 men have achieved the accolade of F1 World Champion. For the first time, legendary F1 commentator Maurice Hamilton and award-winning photographers Bernard and Paul-Henri Cahier bring the heroes of this iconic sport together, in a stunning photographic portrayal of the poise, skill and winning mindset that separates the fast from the furious, the elite from the talented. With exclusive quotes from icons such as Lewis Hamilton and Nico Rosberg, and including Maurice's historic interviews with the sport's lost heroes - including James Hunt and Ayrton Senna - F1: The Champions is a beautiful tribute to the most ferocious of sports and the incredible sportsmen who drive at the edge in pursuit of greatness.

A Monastic Renaissance at St Albans James G. Clark, 2004-12-09 A Monastic Renaissance at St Albans is a study of intellectual life at the abbey of St Albans - one of Britain's greatest Benedictine monasteries - during the lifetime of Thomas Walsingham (c.1340-1422), one of the most prolific scholars of the later middle ages. It has always been assumed that the monasteries fell into decline long before the dissolution and that cultural and intellectual activities were largely abandoned as the monks surrendered themselves to high living and low morals. This study challenges this view. Drawing on a wide variety of manuscript sources, it shows that education, independent study, and even

the co-ordinated copying of books continued to flourish at St Albans (and its affiliate houses) for much of the fourteenth and fifteenth centuries. In fact the abbey emerged as one of the country's most influential centres of learning, a clearing-house for books and ideas in Ricardian and Lancastrian England. Thomas Walsingham himself played a key part in this renaissance in monastic studies; his works were copied and circulated throughout the St Albans network and his influence acted upon the next generation of monastic readers and writers. Walsingham was not only a compiler of contemporary chronicles but also a Classical scholar of extraordinary originality. His commentary on Ovid's *Metamorphoses*, his re-working of the histories of Alexander of Macedon and the Trojan War, and his *Genealogia deorum gentilium*, are discussed in detail here for the first time. Walsingham's interest in the Classics was shared by many of his St Albans colleagues, and they in turn were members of a wider circle of literary scholars, which included the London schoolmaster, John Seward. The work of these scholars, monastic and secular, points towards a revival of Classical and literary scholarship in England long before Italian humanism and other traces of the continental Renaissance first found their way into the country.

Lewis Hamilton Frank Worrall, 2018-11-30 The biography of the record-breaking world champion After equalling Michael Schumacher's records in both race wins, and world titles, in 2020, Lewis Hamilton became the joint-most successful racing driver of all time - and the most dominant and successful Briton ever to drive in Formula 1. Hamilton's debut season in 2007 won him fans around the world, and his place in Formula 1 history was sealed the following year when he became the youngest ever world champion. In the

years since, he has created headlines on and off the track with his rivalries with Max Verstappen, Nico Rosberg and Sebastian Vettel and relationships that have landed him on the front pages of the tabloids. However, despite the media glare, he has continued to prove his incredible talent and tenacity and remains utterly dominant in his sport. In this insightful biography, bestselling sports author Frank Worrall traces the slipstream of Hamilton's incredible career as the fastest driver on the planet. This is the story of the young man who went from being the rookie Sir Jackie Stewart said 'has rewritten the rule book' to a world champion many times over, and become Britain's greatest ever sportsman in the process.

19. Internationales Stuttgarter Symposium Michael Bargende, Hans-Christian Reuss, Andreas Wagner, Jochen Wiedemann, 2019-05-24 In einer sich rasant verändernden Welt sieht sich die Automobilindustrie fast täglich mit neuen Herausforderungen konfrontiert: Der problematischer werdende Ruf des Dieselmotors, verunsicherte Verbraucher durch die in der Berichterstattung vermischte Thematik der Stickoxid- und Feinstaubemissionen, zunehmende Konkurrenz bei Elektroantrieben durch neue Wettbewerber, die immer schwieriger werdende öffentlichkeitswirksame Darstellung, dass ein großer Unterschied zwischen Prototypen, Kleinserien und einer wirklichen Großserienproduktion besteht. Dazu kommen noch die Fragen, wann die mit viel finanziellem Einsatz entwickelten alternativen Antriebsformen tatsächlich einen Return of

Invest erbringen, wer die notwendige Ladeinfrastruktur für eine Massenmarkttauglichkeit der Elektromobilität bauen und finanzieren wird und wie sich das alles auf die Arbeitsplätze auswirken wird. Für die Automobilindustrie ist es jetzt wichtiger denn je, sich den Herausforderungen aktiv zu stellen und innovative Lösungen unter Beibehaltung des hohen Qualitätsanspruchs der OEMs in Serie zu bringen. Die Hauptthemen sind hierbei, die Elektromobilität mit höheren Energiedichten und niedrigeren Kosten der Batterien voranzutreiben und eine wirklich ausreichende standardisierte und zukunftsichere Ladeinfrastruktur darzustellen, aber auch den Entwicklungspfad zum schadstofffreien und CO₂-neutralen Verbrennungsmotor konsequent weiter zu gehen. Auch das automatisierte Fahren kann hier hilfreich sein, weil das Fahrzeugverhalten dann – im wahrsten Sinne des Wortes – kalkulierbarer wird. Dabei ist es für die etablierten Automobilhersteller strukturell nicht immer einfach, mit der rasanten Veränderungsgeschwindigkeit mitzuhalten. Hier haben Start-ups einen großen Vorteil: Ihre Organisationsstruktur erlaubt es, frische, unkonventionelle Ideen zügig umzusetzen und sehr flexibel zu reagieren. Schon heute werden Start-ups gezielt gefördert, um neue Lösungen im Bereich von Komfort, Sicherheit, Effizienz und neuen Kundenschnittstellen zu finden. Neue Lösungsansätze, gepaart mit Investitionskraft und Erfahrungen, bieten neue Chancen auf dem Weg der Elektromobilität, der Zukunft des Verbrennungsmotors und ganz allgemein für das Auto der Zukunft.
