Write Like a Chemist Marin S. Robinson, Fredricka L. Stoller, 2022 *Write Like a Chemist* (2nd ed.) is a one-of-a-kind volume, written to serve as a textbook and resource for chemistry students, post-docs, faculty, and other chemistry professionals. The book focuses on four types of chemistry writing: the journal article, conference abstract, scientific poster, and research proposal. The book includes numerous excerpts from American Chemical Society (ACS) journal articles, ACS conference abstracts, and successful NSF proposals, all serving as excellent models of scientific writing. A model poster is also included. *Write Like a Chemist's* read-analyze-write approach underscores the importance of reading authentic texts, analyzing them, and using them as models for disciplinary writing. Analyses focus on conciseness, level of detail, and formality; organization; writing conventions; grammar and punctuation; and content expressed in prose and graphics. Exercises are included in each chapter. Together, these features turn the complex process of writing into

graduated, achievable tasks. Additional features of the book include the formatting of figures, tables, citations, and references. ACS chemistry writing conventions, as advocated in the ACS Guide to Scholarly Communication (Banik et al., 2020), are modelled throughout. The final chapter provides language tips for troublesome aspects of writing. Separate companion websites include materials for students and faculty. For students, writing on your own guidance, a downloadable poster template, self-study exercises (with answer keys), and proofreading tips are included. For chemistry faculty, answer keys for book exercises, sample grading rubrics, and teaching tips are provided--

The Pathway to Publishing: A Guide to Quantitative Writing in the Health Sciences Stephen Luby, Dorothy L. Southern, 2022-05-30 Writing manuscripts is central to the advance of scientific knowledge. For an early career aspiring scientist, writing first author manuscripts is an opportunity to develop critical skills and to credential their expertise. Writing manuscripts, however, is difficult, doubly so for scientists who use English as a second language. Many science students intentionally avoid a writing-intensive curriculum. Careful, thorough reviews of draft manuscripts are difficult to secure, and experienced scientific supervisors face more demands on their time than they have time available. Weak draft manuscripts discourage supervising scientists investing the time to coach revisions. It is easier for experienced scientists to ignore the request, or to simply rewrite the article. Early career scientists are motivated to address these barriers but specific advice is difficult to find, and much of this advice is behind a pay wall. This essential, open access text presents writing lessons organized as common errors, providing students and early-career researchers with an efficient way to learn, and mentors with a quick-reference guide to reviewing. Error descriptions include specific examples drawn from real-world experiences of other early-career writers, and suggestions for how to successfully address and avoid these in the future. Versions of

this book have been used by Stanford University, UC Davis, Johns Hopkins, and numerous international institutions and organizations for over a decade.

Paper Treasures Lilly Horigan, 2020-05-04 After finally graduating high school, Paige McKinnon is ready to embark on the journey she had been planning for years. Alone, she makes her way to Las Vegas to find her mentally ill and homeless mother. A young woman of faith, she uses only the prompting of God's Spirit and the advice of her aunt to find a place to stay, work, and search for her mother's whereabouts. Her unplanned, but hopeful, trip leads to a quiet community with a big heart in the outskirts of Vegas. Paige meets a woman of faith who encourages and supports her, but Paige hides her reason for being in Vegas even as she accepts a job and assistance from the woman. Paige is amazed by the generosity and vibrancy of the woman. She feels at home around her, but is caught off guard by the woman's loving and good looking son who seems to be at every turn. The young man's life is pleasantly distracted by Paige's beauty and presence, and he hopes to get to know the mysterious girl who is becoming an indirect and daily part of his life. Yet Paige has a specific purpose for being in Vegas and it is not romance. Paige plans her days to find new ways to meet and search the homeless people of Vegas. With the help of her family, letters, and trust in God's sovereignty, she places herself in the midst of the homeless and, at times, risks her safety to find any information on her mother's whereabouts. Not knowing where Paige goes every day after work, the community she is getting to know well grows concerned about her consistent and mysterious leaving for unknown destinations that seem to end in tears.

Biology, Ecology and Management of Aquatic Plants Joseph Caffrey, Philip R.F. Barrett, Maria Teresa Ferreira, Ilidio S.

Moreira, Kevin J. Murphy, Philip Max Wade, 2013-04-17 There is a growing need for appropriate management of aquatic plants in rivers and canals, lakes and reservoirs, and drainage channels and urban waterways. This management must be based on a sound knowledge of the ecology of freshwater plants, their distribution and the different forms of control available including chemical and physical, and biological and biomanipulation. This series of papers from over 20 different countries was generated from the tenth in the highly successful series of European Weed Research Society symposia on aquatic plant management, this being the tenth. It provides a valuable insight into the complexities involved in managing aquatic systems, discusses state-of-the-art control techniques and deals with patterns of regrowth and recovery post-management. Careful consideration is given to the use of chemicals, a practice which has come under scrutiny in recent years. Underpinning the development of such control techniques is a growing body of knowledge relating to the biology and ecology of water plants. The authorship of the papers represents the collective wisdom of leading scientists and experts from fisheries agencies, river authorities, nature conservation agencies, the agrochemical industry and both governmental and non-governmental organisations.
