**The Craft of Research, Third Edition** Wayne C. Booth, Gregory G. Colomb, Joseph M. Williams, 2009-05-15 With more than 400,000 copies now in print, *The Craft of Research* is the unrivaled resource for researchers at every level, from first-year undergraduates to research reporters at corporations and government offices. Seasoned researchers and educators Gregory G. Colomb and Joseph M. Williams present an updated third edition of their classic handbook, whose first and second editions were written in collaboration with the late Wayne C. Booth. *The Craft of Research* explains how to build an argument that motivates readers to accept a claim; how to anticipate the reservations of readers and to respond to them appropriately; and how to create introductions and conclusions that answer that most demanding question, "So what?" The third edition includes an expanded discussion of the essential early stages of a research task: planning and drafting a paper. The authors have revised and fully updated their section on electronic research, emphasizing the need to distinguish between trustworthy sources (such as those found in libraries) and less reliable sources found with a quick Web search. A chapter on warrants has also been thoroughly reviewed to make this difficult subject easier for researchers. Throughout, the authors have preserved the amiable tone, the reliable voice, and the sense of directness that have made this book indispensable for anyone undertaking a research project.

A National Strategy for the Elimination of Hepatitis B and C National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on a National Strategy for the Elimination of Hepatitis B and C, 2017-06-30 Hepatitis B and C cause most cases of hepatitis in the United States and the world. The two diseases account for about a million deaths a year and 78 percent of world's hepatocellular carcinoma and more than half of all fatal cirrhosis. In 2013 viral hepatitis, of which hepatitis B virus (HBV) and hepatitis C virus (HCV) are the most common types, surpassed HIV and AIDS to become the seventh leading cause of death worldwide. The world now has the tools to prevent hepatitis B and cure hepatitis C. Perfect vaccination could eradicate HBV, but it would take two generations at least. In the meantime, there is no cure for the millions of people already infected. Conversely, there is no vaccine for HCV, but new direct-acting antivirals can cure 95 percent of chronic infections, though these drugs are unlikely to reach all chronically-infected people anytime soon. This report, the second of two, builds off the conclusions of the first report and outlines a strategy for hepatitis reduction over time and specific actions to achieve them.

**Engineering of Scintillation Materials and Radiation Technologies** Mikhail Korzhik, Alexander Gektin, 2019-09-13 This proceedings book presents dual approaches to examining new theoretical models and their applicability in the search for new scintillation materials and, ultimately, the development of industrial technologies. The ISMART conferences bring together the radiation detector community, from fundamental research scientists to applied physics experts, engineers, and experts on the implementation of advanced solutions. This scientific forum builds a bridge between the different parts of the community and is the basis for multidisciplinary, cooperative research and development efforts. The main goals of the conference series are to review the latest results in scintillator development, from theory to applications, and to arrive at a deeper understanding of fundamental processes, as well as to discover components for the production of new generations of scintillation materials. The book highlights recent findings and hypotheses, key advances, as well as exotic detector designs and solutions, and includes papers on the microtheory of scintillation and the initial phase of luminescence development, applications of the various materials, as well as the development and characterization of ionizing radiation detection equipment. It also touches on the increased demand for cryogenic scintillators, the renaissance of

garnet materials for scintillator applications, nano-structuring in scintillator development, trends in and applications for security, and exploration of hydrocarbons and ecological monitoring.

**A Monastic Renaissance at St Albans** James G. Clark,2004-12-09 A Monastic Renaissance at St Albans is a study of intellectual life at the abbey of St Albans - one of Britain's greatest Benedictine monasteries - during the lifetime of Thomas Walsingham (c.1340-1422), one of the most prolific scholars of the later middle ages. It has always been assumed that the monasteries fell into decline long before the dissolution and that cultural and intellectual activities were largely abandoned as the monks surrendered themselves to high living and low morals. This study challenges this view. Drawing on a wide variety of manuscript sources, it shows that education, independent study, and even the co-ordinated copying of books continued to flourish at St Albans (and its affiliate houses) for much of the fourteenth and fifteenth centuries. In fact the abbey emerged as one of the country's most influential centres of learning, a clearing-house for books and ideas in Ricardian and Lancastrian England. Thomas Walsingham himself played a key part in this renaissance in monastic studies; his works were copied and circulated throughout the St Albans network and his influence acted upon the next generation of monastic readers and writers. Walsingham was not only a compiler of contemporary chronicles but also a Classical scholar of extraordinary originality. His commentary on Ovid's *Metamorphoses*, his re-working of the histories of Alexander of Macedon and the Trojan War, and his *Genealogia deorum gentilium*, are discussed in detail here for the first time. Walsingham's interest in the Classics was shared by many of his St Albans colleagues, and they in turn were members of a wider circle of literary scholars, which included the London schoolmaster, John Seward. The work of these scholars, monastic and secular, points towards a revival of Classical and literary scholarship in England long before Italian humanism and other traces of the continental Renaissance first found their way into the country.

**Genetic and Evolutionary Computing** Thi Thi Zin,Jerry Chun-Wei Lin,Jeng-Shyang Pan,Pyke Tin,Mitsuhiro Yokota,2015-09-03 This volume of Advances in Intelligent Systems and Computing contains accepted papers presented at ICGEC 2015, the 9th International Conference on Genetic and Evolutionary Computing. The conference this year was technically co-sponsored by Ministry of Science and Technology, Myanmar, University of Computer Studies, Yangon, University of Miyazaki in Japan, Kaohsiung University of Applied Science in Taiwan, Fujian University of Technology in China and VSB-Technical University of Ostrava. The conference is intended as an international forum for the researchers and professionals in all areas of genetic and evolutionary computing.

**Swoon: Great Seducers and Why Women Love Them** Betsy Prioleau,Elizabeth Stevens Prioleau,2013-02-04 Casanovas: where are those great romancers of women? In Swoon, Betsy Prioleau gives us a smart, entertaining study of ladies' men, demystifying their character, seductive secrets, and killer charm. Combining history, science, culture, and colorful contemporary research, Prioleau gives us a portrait of the successful seducer that explodes every stereotype and shatters every cliché. Instead of a satanic rake, slick player, or rich, handsome powerbroker, he's an unlikely, often homely Romeo who cares about women and understands what they want. Through analyses of history's legendary lovers and interviews with today's heartthrobs, Prioleau uncovers the surprising seductive secrets that really rock female hearts, from unfeigned ardor to conversational flair. In doing so, she destroys the pick-up artists' advice of such books as *The Game*. Finally, Prioleau critiques the twenty-first-century sexual malaise, especially women's record discontent with men, and argues that it's high time to retrieve and celebrate

the great seducer.
