Competition Car Aerodynamics Simon McBeath,2011-04-15 Aerodynamics is a science in itself, and is one of the most important factors in modern competition car design. This fully updated second edition covers all aspects of aerodynamics, including both downforce and drag. This complex subject is

explained in down-to-earth terms, with the aid of numerous illustrations, including color CFD (Computational Fluid Dynamics) diagrams to demonstrate how aerodynamic devices work, as well as wind-tunnel studies.

Grand Prix Cars Denis Jenkinson, 2015-10-02 “ In compiling this brief history of Grand Prix racing, along with descriptions of the more successful cars, I have limited myself to the period since World War II as the present day Grand Prix cars are mostly derived from the development and design of the early post war years. Although many ideas were taking shape in the period of the mid-thirties – such as the use of De Dion rear axle layouts, independent front suspension systems and hydraulic brakes – the main interest lay in engine design under a free ruling on capacity. It was not until about 1950 that a renaissance began in chassis design for Grand Prix cars and from then on a great deal of knowledge was gained; enough in fact, to enable roadholding to become a very exact science rather than a hit-and-miss affair. This development in the chassis and the search for improved road holding and higher cornering power was accentuated by the beginning of the era of unsupercharged racing,

when power outputs were severely curtailed and speed had to be found by other means ...” (1959 - Denis Jenkinson)

The Automotive Chassis Giancarlo Genta,L. Morello,2008-12-26 This work serves as a reference concerning the automotive chassis, i.e. everything that is inside a vehicle except the engine and the body. It is the result of a decade of work mostly done by the FIAT group, who supplied material, together with other automotive companies, and sponsored the work. The first volume deals with the design of automotive components and the second volume treats the various aspects of the design of a vehicle as a system.

Formula 1 Car by Car 1990-99 Peter Higham,2021-05-18 The formative years of the 1950s are explored in this fourth installment of Evro's decade-by-decade series covering all Formula 1 cars and teams. When the World Championship was first held in 1950, red Italian cars predominated, from Alfa Romeo, Ferrari and Maserati, and continued to do so for much of the period. But by the time the decade closed, green British cars were in their ascendancy, first Vanwall and then rear-engined

Cooper playing the starring roles, and BRM and Lotus having walk-on parts. As for drivers, one stood out above the others, Argentine Juan Manuel Fangio, becoming World Champion five times. Much of the fascination of this era also lies in its numerous privateers and also-rans, all of which receive their due coverage in this complete work. Year-by-year treatment covers each season in fascinating depth, running through the teams -- and their various cars -- in order of importance. Alfa Romeo's supercharged 11/2-litre cars dominated the first two years, with titles won by Giuseppe Farina (1950) and Fangio (1951). The new marque of Ferrari steamrollered the opposition in two seasons run to Formula 2 rules (1952-53), Alberto Ascari becoming champion both times, and the same manufacturer took two more crowns with Fangio (1956) and Mike Hawthorn (1958). Maserati's fabulous 250F, the decade's most significant racing car, propelled Fangio to two more of his five championships (1954 and 1957). German manufacturer Mercedes-Benz stepped briefly into Formula 1 (1954-55) and won almost everything with Fangio and up-and-coming Stirling Moss. Green finally beat red when the Vanwalls, driven by Moss and Tony Brooks, won the inaugural constructors' title (1958). Then along

came Cooper, rear-engine pioneers, to signpost Formula 1's future when Jack Brabham became World Champion (1959).

Soil Chemistry Daniel G. Strawn, Hinrich L. Bohn, George A. O'Connor, 2020-01-28 Provides comprehensive coverage of the chemical interactions among organic and inorganic solids, air, water, microorganisms, and the plant roots in soil This book focuses on the species and reaction processes of chemicals in soils, with applications to environmental and agricultural issues. Topics range from discussion of fundamental chemical processes to review of properties and reactions of chemicals in the environment. This new edition contains more examples, more illustrations, more details of calculations, and reorganized material within the chapters, including nearly 100 new equations and 51 new figures. Each section also ends with an important concepts overview as well as new questions for readers to answer. Starting with an introduction to the subject, Soil Chemistry, 5th Edition offers in-depth coverage of properties of elements and molecules; characteristics of chemicals in soils; soil water chemistry; redox reactions in soils; mineralogy and weathering processes in soils; and chemistry

of soil clays. The book also provides chapters that examine production and chemistry of soil organic matter; surface properties of soil colloids; adsorption processes in soils; measuring and predicting sorption processes in soils; soil acidity; and salt-affected soils. Provides a basic description of important research and fundamental knowledge in the field of soil chemistry Contains more than 200 references provided in figure and table captions and at the end of the chapters Extensively revised with updated figures and tables Soil Chemistry, 5th Edition is an excellent text for senior-level soil chemistry students.

Driven by Desire Alan Wilson, 2011-10-15 From a five-year-old girl racing 60mph micro-midgets in South Africa, to a Formula One driver in the British Championship during her first full year of racing in the UK, and on to becoming the first and only woman ever to win a Formula One race, Desire Wilson was a winner bested by very few of her male rivals. But single-seater racing was just the start of Desire's ascent in motorsport. She won two FIA World Championship Sports Car Endurance races in 1980, and went on to compete in well over 120 types of race car at more than 100 race tracks around

the world. Always competitive, she earned a reputation for an intense, no-nonsense approach to racing, shrugging off the media glamour to focus on the hard grind of staying competitive in one of the world's toughest sporting arenas. Moving to the male-dominated world of North American racing, Desire became a pioneer for women racing in the harsh world of Indy Cars, facing discrimination, financial problems, and other obstacles ranging from tragedy to farce. Her career is unique in the world of racing, encompassing everything from club racing to Formula One and World Championship sports cars, to the evil monsters of the IndyCar World Series - the world's fastest race cars. Hers is a story of hardships, fun, tragedy, perseverance, injury, and the amazing behind-the-scenes world masked by the public face and glamour of racing. It tells, too, of the consequences of politics and discrimination in the male world of professional auto racing.

A Chequered Life Richard Heseltine, 2013-11-15 This is the first and only account of the Chequered Flag race team and its charismatic founder, Graham Warner. It charts the highs and lows, the victories and losses, and features interviews with the man himself and several star drivers of

the 1960s and '70s. Accompanied by 150 photographs, many previously unpublished, plus a look at Graham's subsequent career as a fighter aircraft expert and restorer, this is a unique story of a fascinating life in motorsport.

Race Car Aerodynamics J Katz, 1996-03-08 The first book to summarize the secrets of the rapidly developing field of high-speed vehicle design. From F1 to Indy Car, Drag and Sedan racing, this book provides clear explanations for engineers who want to improve their design skills and enthusiasts who simply want to understand how their favorite race cars go fast. Explains how aerodynamics win races, why downforce is more important than streamlining and drag reduction, designing wings and venturis, plus wind tunnel designs and more.

Quotable Star Trek Jill Sherwin, 2012-10-09 Organised into categories such as friendship, diplomacy and management, Quotable Star Trek demonstrates the truly universal appeal of Gene

Roddenberry's extraordinary creation. Words of wit, wisdom and compelling insight applicable to everyday life have been selected from over 500 hours of television episodes and eight Star Trek motion pictures. For more than thirty years the Star Trek universe has used its much-loved characters and consistently literate scripts to argue thought-provoking ideas, to tackle moral dilemmas, to deal with issues of humanity and responsibility, or to come up with intriguing solutions to seemingly intractable problems. Quotable Star Trek selects over 300 pages of gems which together encapsulate that unique and inimitable spirit.

Stirling Moss Scrapbook 1955 Stirling Moss, Philip Porter, 2007-09-01 The Stirling Moss Scrapbook 1955 is packed with intriguing detail, superb illustrations and a plethora of period cuttings from around the world. Throughout his career he created his personal scrapbooks, several volumes per year, and he kept a diary and photo albums, too. This book dips into his personal records and is spiced throughout with treasures to delight and fascinate. These are supplemented by period comments and many of his anecdotes. Moss has a fund of stories and is refreshingly non-PC!

The Little Ensign ,1879

Kris Meeke Simon McBride,2010-11 The story of how Kris Meeke and Peugeot UK won the Intercontinental Rally Championship in their rookie year, from the disastrous opening round in Monte Carlo, to the ecstasy of winning the Sanremo rally and the championship in the same weekend.--Back cover.

Racing Camaros Steve Holmes,2021-03-12 Chevrolet created the Camaro in response to the runaway sales success of the Ford Mustang, the first pony car. The Mustang went on sale in April 1964, and by August that same year, General Motors launched an intensive program to bring its own pony car to market. In September 1966, the Camaro went on sale. Chevrolet wanted the Camaro to be better than the Mustang in every area, including style, ride-quality, and performance. To that end, with the Mustang having already achieved so much racing success, Chevrolet wanted to beat it on the track also. Racing Camaros: An International Photographic History 1966 - 1984 is a photographic celebration of road racing Camaros throughout the world. It focuses on production-based cars, rather

than the heavily modified tube-frame silhouette machines that began appearing in the late 1970s. Included are images of big-budget factory-supported cars competing in the Trans-Am series, right through to low-buck independents, and cars competing throughout the world. For the first time, the international road racing representation of the Camaro is featured in a book, which includes countless photos that have never been published. Technical detail is provided throughout, from concept and design, right through its racing career, and the challenges and developments that took place to make it a winner. Only period images have been used. This is a true photographic history depicting the global popularity of the Chevrolet Camaro as a road racing car.

Inspired to Design Nigel Bennett, 2013-10-15 Nigel Bennett's unique autobiography describes his life and career, from growing-up influenced by car design, to his education and the building of his 750 specials. He describes his work as Firestone Development Manager, recounting many tales of the outstanding designers and drivers of the period. Detailing his work in Formula 1, as a Team Lotus engineer, and then as Team Ensign designer, he also covers his Indycar designs at Theodore, Lola

Cars and Penske Cars. Life after his retirement, his involvement in boat design and with modern F1 teams, are also recounted.

Porsche 70 Years Randy Leffingwell, 2017-09-19 This richly illustrated book offers a complete history of Porsche, Germany's premium sports-car maker. Porsche 70 Years focuses on engineering and design stories, while also paying homage to key players.

Bruce McLaren Bruce McLaren, 2018-01-09 Originally published in 1964, Bruce McLaren's autobiography *From the Cockpit* is a classic motor racing memoir. So scarce and expensive are original copies that Evro Publishing, in collaboration with McLaren, is reissuing a facsimile version for all fans to enjoy. In his own words, Bruce describes his inspiring climb up the ladder of motor racing success, culminating in the inception of Bruce McLaren Motor Racing Ltd in 1963. Engaging to read, his book provides fascinating insight into not only his accomplishments but also his unique character, charm and tenacity. In his own words, 'Life is measured in achievement, not in years alone.'

Overcoming childhood illness: a rare disease stopped Bruce walking for two years and meant long

spells in hospital. Early competition in New Zealand with a modified Austin Seven. The recipient of New Zealand's first 'Driver to Europe' scheme, his results in his first season away from home included fifth place in the 1958 German Grand Prix with a works Cooper. McLaren became the youngest Grand Prix winner in the 1959 United States GP for Cooper, as team-mate to Jack Brabham in the year the Australian won his first World Championship title. The ups and downs of his life in Formula 1 up to the end of 1963, from winning at Monaco in 1962 to crashing at the Nurburgring and ending up in hospital - where the idea for this book was born. The story concludes with the formation of his own team, initially to run modified Cooper chassis, and Bruce's emotional victory in the 1964 New Zealand Grand Prix.

Automotive Art Project JAMES. RENDLE. PAGE,Steve Rendle,2021-03 Claude Nahum was brought up surrounded by all things automotive. The son of Bernar Nahum, considered to be the father of the Turkish automotive industry, Claude was fascinated by cars and engineering from an early age.

Claude's career led him into automotive design, research and engineering, before eventually heading and growing the Kiraça group trading company in Europe, all the while maintaining his link with the automotive world. As Claude's career progressed, he began collecting and racing cars, and the growth of his stable led to him establishing The N Collection. Wishing to create a distinctive tribute to his favourite cars, Claude commissioned six leading artists, and gave them free rein to depict each of 25 cars from his collection in their own inimitable style. The Automotive Art Project showcases that work.
