**The Mechanic** Marc 'Elvis' Priestley,2017-11-02 Meet Marc 'Elvis' Priestley: the former number-one McLaren mechanic, and the brains behind some of Formula One's greatest ever drivers. Revealing the most outrageous secrets and fiercest rivalries, The Mechanic follows Priestley as he travels the world working in the high-octane atmosphere of the F1 pit lane. While the spotlight is most often on the superstar drivers, the mechanics are the guys who make every World Champion, and any mistakes can have critical consequences. However, these highly skilled engineers don't just fine-tune machinery and crunch data through high-spec computers. These boys can seriously let their hair down. Whether it's partying on luxury yachts or gravity-defying photos aboard aeroplanes, this is a world which thrills on and off the track. This is Formula One, but not like you've seen it before.

*The Mechanic's Tale* Steve Matchett,2010-12-16 Essential reading for anyone interested in life behind-the-scenes at Formula One. He gives eye-witness views of the great drivers, including Michael Schumacher, Nigel Mansell, Alain Prost and Ayrton Senna. He also talks of key Benetton personalities, and explains how the team was transformed into a strong, competitive organisation, winning three World Championships. An essential for real Formula 1 enthusiasts for almost 30 years, this annual , this book also reviews in its second part the main new technical developments devised by the various teams during the covered seasons. The book is illustrated by more than 500 color technical designs, created by Piola himself.

Formula One and Beyond Max Mosley, 2015 For almost 50 years, Max Mosley has been involved in motor racing, having seen the sport at all levels: as a driver, a team owner (with March) and, between 1993 and 2009, as President of the FIA, motor sport's governing body. In partnership with Bernie Ecclestone, he helped transform Formula One into a multi-billion-pound global brand. Now, in this fascinating and revealing memoir, Mosley gives a compelling insight into the sport and its most influential figures and biggest stars - it is a book that no fan of Formula One can afford not to read. But Mosley's story goes far beyond motor sport, as his life and career have taken him through an extraordinary range of experiences, from being brought up as the son of Oswald and Diana Mosley, who were interned during the war, and having to deal with the taint of the family name; through his vital campaigns for road safety that have helped to save many thousands of lives; and on to the recent intrusions into his private life that led to a famous court case against the Murdoch press. It is a book that sheds new light on events from Formula One through to Ecclestone's controversial donation of a million pound to the Labour party. It is packed with behind-the-scenes gossip, vital business tips and some hilarious stories.--Wheelers.

*Senna Versus Prost* Malcolm Folley, 2009-05-07 In the late eighties and early nineties, Formula One was at its most explosive, with thrilling races, charismatic drivers, nail-biting climaxes - and the most deadly rivalry ever witnessed in sport. Two of Formula One's most honoured champions and iconic figures drove together for McLaren for two seasons, and their acrimonious and hostile relationship extended even after one of them had left the team. ALAIN PROST, France's only F1 world champion, the intelligent, smooth driver with the epithet 'Le Professeur'. AYRTON SENNA, the mercurial kid from a privileged background in Sao Paulo who would become the most intense and ruthless racing driver the world has ever seen. It was a story that would have a tragic ending. As the great rivals raced to victory, their relationship deteriorated badly, beginning with the breaking of a gentleman's agreement, and public spats followed, culminating in Prost accusing Senna of deliberately trying to ride him off the circuit, and fearful that the Brazilian would get someone killed with his daring overtaking feats. And the final, sad act of this drama happened at the San Marino Grand prix at Imola in May 1994, when Senna was killed. Featuring a rare interview with Prost, and insight from Martin Brundle, Damon Hill, Sir Frank Williams, Bernie Ecclestone, Derek Warwick, Johnny Herbert, Gerhard Berger, plus McLaren insiders and other F1 figures, Malcolm Folley provides us with a breath-taking account of one of the all-time classic sporting rivalries.

*Introducing New Materials in the Automotive Industry* Fredrik Henriksson, 2017-11-15 Passenger vehicles are central to Western society, and contribute to a significant part of our greenhouse gas emissions. In order to reduce emissions, the automotive industry as a whole is working to

reduce mass in passenger vehicles in order to reduce energy consumption. One way to reduce mass is to introduce lightweight materials in the body of the vehicle. This research aims to explore the relationship between product and production system when introducing new materials. Besides a theoretical review and an industry-centered technological mapping, four case studies have been conducted during the course of this licentiate thesis. Two case studies were conducted with engineering design students working as development teams, one case study with the author as the developer and finally one case study in an industrial environment at a product owning company with in-house production. The goal of the case studies has been to increase the collective knowledge of how product development decisions affect production development decisions, and vice versa, when developing passenger vehicles in new materials. In the following analysis of case study outcomes, a number of factors important for introducing new materials are discussed. The relationship between product and production is investigated, both in terms of how the production system affects the product and how the product affects the production system. The outcome from this analysis is a mapping of important factors for automotive industry companies to understand and identify when looking at introducing new materials in existing production systems. Finally, a suggestion for future research efforts is presented.

**A Monastic Renaissance at St Albans** James G. Clark, 2004-12-09 A Monastic Renaissance at St Albans is a study of intellectual life at the abbey of St Albans - one of Britain's greatest Benedictine monasteries - during the lifetime of Thomas Walsingham (c.1340-1422), one of the most prolific scholars of the later middle ages. It has always been assumed that the monasteries fell into decline long before the dissolution and that cultural and intellectual activities were largely abandoned as the monks surrendered themselves to high living and low morals. This study challenges this view. Drawing on a wide variety of manuscript sources, it shows that education, independent study, and even the co-ordinated copying of books continued to flourish at St Albans (and its affiliate houses) for much of the fourteenth and fifteenth centuries. In fact the abbey emerged as one of the country's most influential centres of learning, a clearing-house for books and ideas in Ricardian and Lancastrian England. Thomas Walsingham himself played a key part in this renaissance in monastic studies; his works were copied and circulated throughout the St Albans network and his influence acted upon the next generation of monastic readers and writers. Walsingham was not only a compiler of contemporary chronicles but also a Classical scholar of extraordinary originality. His commentary on Ovid's *Metamorphoses*, his re-working of the histories of Alexander of Macedon and the Trojan War, and his *Genealogia deorum gentilium*, are discussed in detail here for the first time. Walsingham's interest in the Classics was shared by many of his St Albans colleagues, and they in turn were members of a wider circle of literary scholars, which included the London schoolmaster, John Seward. The work of these scholars, monastic and secular, points towards a revival of Classical and literary scholarship in England long before Italian humanism and other traces of the continental Renaissance first found their way into the country.

*Formula 1 Car by Car 1990-99* Peter Higham,2021-05-18 The formative years of the 1950s are explored in this fourth installment of Evro's decade-by-decade series covering all Formula 1 cars and teams. When the World Championship was first held in 1950, red Italian cars predominated,

from Alfa Romeo, Ferrari and Maserati, and continued to do so for much of the period. But by the time the decade closed, green British cars were in their ascendancy, first Vanwall and then rear-engined Cooper playing the starring roles, and BRM and Lotus having walk-on parts. As for drivers, one stood out above the others, Argentine Juan Manuel Fangio, becoming World Champion five times. Much of the fascination of this era also lies in its numerous privateers and also-rans, all of which receive their due coverage in this complete work. Year-by-year treatment covers each season in fascinating depth, running through the teams -- and their various cars -- in order of importance. Alfa Romeo's supercharged 11/2-litre cars dominated the first two years, with titles won by Giuseppe Farina (1950) and Fangio (1951). The new marque of Ferrari steamrolled the opposition in two seasons run to Formula 2 rules (1952-53), Alberto Ascari becoming champion both times, and the same manufacturer took two more crowns with Fangio (1956) and Mike Hawthorn (1958). Maserati's fabulous 250F, the decade's most significant racing car, propelled Fangio to two more of his five championships (1954 and 1957). German manufacturer Mercedes-Benz stepped briefly into Formula 1 (1954-55) and won almost everything with Fangio and up-and-coming Stirling Moss. Green finally beat red when the Vanwalls, driven by Moss and Tony Brooks, won the inaugural constructors' title (1958). Then along came Cooper, rear-engine pioneers, to signpost Formula 1's future when Jack Brabham became World Champion (1959).
