*The Vought F4U Corsair* Martin W. Bowman, 2019-12-27 This fully illustrated history of the iconic American fighter plane examines its development and combat experience through WWII and beyond. First flown in 1940, the Vought F4U Corsair was the fastest fighter in the world and the fastest US aircraft of any description. Powered by a huge 18-cylinder Pratt and Whitney Double Wasp engine, the first Corsairs were capable of speeds up to 417 miles per hour. This figure would rise to nearly 450mph in later versions. The F4U entered service with the US Navy in September 1942 and over time was extensively used by the US Marines, Royal Navy and Royal New Zealand Air Force. Famous squadrons that flew these planes—like VMF-214 'The Black Sheep' and VF-17 'Jolly Rogers'—maintained their superiority over the Japanese for the rest of the war. After the Second World War the Corsair was used with distinction by the French in Indo-China and again by the US Navy in Korea. Since then, Corsairs have remained a favorite among warbird enthusiasts the world over. This comprehensive book examines the engineering of the Corsairs alongside a detailed history of their development and usage in combat. Illustrated with scores of rare and previously unpublished photographs, Vought F4U Corsair is the perfect book for any fan of the 'bent wing bird'.

**F4U Corsair vs Ki-84 "Frank"** Edward M. Young, 2016-05-19 The Vought Corsair was the first American single-engined fighter to exceed 400 mph and establish dominance over the legendary Mitsubishi Type Zero-sen. The Ki-84 Hayate was introduced by the Japanese specifically to counter this growing American dominance of the skies over the Pacific. Built in greater numbers than any other late war Japanese fighter, nearly 3000 were completed between 1944 and 1945. This volume examines the clashes between the Corsair and Ki-84 in the closing stages of the war, revealing how Corsair pilots had to adapt their techniques and combat strategies to adapt to these newer types. It also reveals how the kill rate was largely driven by the reduced quality of fighter pilots after the high casualty rates inflicted on the Japanese air force during the air battles over the Solomon Islands.

**Vought F4U Corsair** James D'Angina, 2014-11-20 With over 12,500 produced, the Vought F4U Corsair is one of the icons of mid-20th century military aviation. It was as a Marine Corps aircraft that the Corsair was to become famous, fighting through World War II and Korea. Able to outperform its contemporaries, notably the A6M Zero, the Corsair combined speed, resilience and firepower. It also served in Indochina and Algeria, and in 1969's 'Soccer War' between Honduras and El Salvador, Corsairs were flown by both sides and fought the last propeller-aircraft dogfights in history. This highly illustrated volume recounts the design and development history of one of the most iconic fighters in military aviation history.

Modelling the F4U Corsair Brett Green, 2012-02-20 The F4U Corsair's combat career was longer than that of almost any other World War II fighter aircraft. Its success led to its service around the globe, and it was employed by the US Navy, British Fleet Air Arm and the Royal New Zealand Air Force. After the war, the Corsair also served with the French Navy, in various Latin American Air Forces, and with forces fighting in Korea. This book showcases seven separate Corsair variants modelled across 1/32, 1/48 and 1/72 scales. Among the aircraft featured are an F4U-1 Birdcage, an F4U-1A from VF-17 'Jolly Rogers', a Fleet Air Arm Corsair Mk.II, a Korean War F4U-4 and an F4U-7 French Corsair.

Was the direct descendant of the F4F Wildcat of which, according to forecasts, it had to be a valid replacement for the Navy aircraft carrier in order to better combat the way to the Japanese fighters. According to statistics gathered by the Defense, 75% of enemy planes shot down by American aircraft operating from aircraft carriers in all theaters of war is to be credited all'Hellcat. In addition to the 4,947 Japanese and German equipment culled from F6F operating from aircraft carriers, the Hellcat which started from bases on land destroyed 209 enemy aircraft, bringing the total number of victories in all the world the military sector in 5156. The Vought F4U Corsair was undoubtedly the best fighter of World War II based on aircraft carriers. **Corsair** David Doyle,2018 The F4U Corsair, designed by Vought and produced by that firm, as well as, Goodyear and Brewster Aeronautical Corporation, would not only rack up an impressive 11:1 kill ratio against its foes in WWII, but go on to serve through the Korean War as well. The iconic inverted gull wing of the aircraft, along with its distinctive whistling sound made the Corsair unmistakable to friend and foe alike. The Corsair was remarkable not only in serving the US Navy and Marine Corps in two wars, but also remaining in production through 1952. The Corsair was also the mount of some of the nation's most distinguished aces, including Gregory Pappy Boyington, Ken Walsh, and Tom Blackburn. Through carefully researched photos, many of which have never before been published and which are reproduced in remarkable clarity, the history and details of this iconic aircraft are revealed. Part of the Legends of Warfare series.

*Vought F4u Corsair: Volume 2* Tomasz Szlagor,Leszek Wieliczko,2014-10-19 The second volume carries on the story of the F4U Corsair by examining its development and operational service in later stages of the World War Two. By early 1944 the Corsair well proved its worth in combat. Finally qualified for carrier operations, it began to challenge the Hellcat's status of the US Navy's primary fighter aircraft. The F4U-1D, capable of carrying nearly a ton of bombs and eight rocket missiles, excelled both in aerial combat and ground attacks. It's fighter-bomber capabilities were put to good use during the little-known campaigns in the Marshalls, Marianas and Palau Islands, as well as in the Philippines, which are related here in unparalleled detail. Much attention is dedicated to the initial deployment of the Corsair (both night and day fighters) aboard US Navy carriers, spanning the period between February 1944 and March 1945, which culminated in the first raids against Japan. Meanwhile, Vought and Goodyear engineers continued to improve and refine the Corsair. New, more powerful engines enabled them to develop two more versions before the war's end - the ultimate Corsair (Vought F4U-4) and the Super Corsair (Goodyear F2G-1/2). Their story is related in the opening chapter. A separate chapter is devoted to camouflage and markings of British and New Zealand's Corsairs, with a brief resume of the aircraft's service in the two air forces. The book is further supplemented by numerous data in tabular form, color profiles of five representative aircraft and 1/48 scale drawings of various versions.

Chance Vought F4u Corsair Andrzej R. Zbiegniewski,2010-01-05 The second part of a monograph on F4U Corsair covers changes made in their late variants from F4U-1D to F4U-7 and their camouflage and markings. Each variant is specified and described. The book discusses the combat use of F4Us in FAA units, late U.S. Navy campaigns in the PTO during WW2 and the battles against Soviet MiG-15s during the Korean War. The subsequent chapters are devoted to French use of Corsairs in Indochina and F4U's service in the Honduran and Salvadoran air forces during the Soccer War in 1969. The book includes technical data, lists of F4U squadrons as of September 1945, USMC & USN Corsair aces and many more. Free 1:48 and 1:72 decals for 7 schemes: F4U-1D, flown by 2/Lt. Marvin S. F4u Corsair in Action - Hardcover Jim Sullivan, 2015 Updated and expanded edition. Bringing to mind the exploits of Pappy Boyington and his Blacksheep Squadron and Tommy Blackburn with the Jolly Rogers, the Corsair is among the most formidable US fighters of WWII. The F4U maintained a kill ratio of 11:1 according to the US Navy and went on to serve in Korea, holding its own in the early years of the Jet Age. The Corsair was first conceived as a high-speed, high-altitude fighter for the Navy in 1938 when Chance Vought's design team drew up plans for a fighter with an 1,800-hp engine and a huge 13-foot propeller. The Corsair's famous inverted gull wing design was introduced to allow prop clearance. Handling problems delayed the aircraft's deployment aboard carriers, but Marine Corps pilots quickly took to the powerful, rugged fighter and VMF-124, the first Marine squadron to fly the Corsair in combat, also produced the first Corsair air ace, Kenneth A. Walsh, by the summer of 1943. A total of 12,571 Corsairs were built between 1940 and 1952, most of them by Vought, but hundreds by Goodyear and Brewster as those companies' assembly lines had to be pressed into service to meet soaring demand for the remarkable aircraft. This exhaustive volume surveys the history of the Corsair from its first prototype to the restored warbirds that have continued to delight air show audiences to the present day.
