*A Glossary of Words and Phrases in the Oral Performing and Dramatic Literatures of the Jin, Yuan, and Ming* Dale Johnson, 2020-08-06 For many years, the oral performing and dramatic literatures of China from 1200 to 1600 CE were considered some of the most difficult texts in the Chinese corpus. They included ballad medleys, comic farces, Yuan music dramas, Ming music dramas, and the novel *Shuihu zhuan*. The Japanese scholars who first dedicated themselves to study these works in the mid-twentieth century were considered daring. As late as 1981, no comprehensive dictionary or glossary for this literature existed in any language, Asian or Western. *A Glossary of Words and Phrases* fills this gap for Western readers, allowing even a relative novice who has reasonable command of Chinese to read, translate, and appreciate this great body of literature with an ease undreamed of even two decades ago. The Glossary is organized into approximately 8,000 entries based on the reading notes and glosses found in various dictionaries, thesauruses, glossaries, and editions of works from the period. Main entries are listed alphabetically in the pinyin romanization system. In addition to glosses, entries include symbolic annotations, guides to pronunciation, and text citations. The result is a broadly useful glossary serving the needs of students of this literature as well as scholars researching Jin and Yuan

language and its usage.

**Mapping Chengde** Philippe Foret, 2000-06-01 The imperial residence of Chengde was built by two powerful and ambitious Manchu emperors between 1703 and 1780 in the mountains of Jehol. This volume, the first scholarly publication in English on the Manchu summer capital, reveals how this unlikely architectural and landscape enterprise came to help forge a dynasty's multicultural identity and concretize its claims of political legitimacy. Using both visual and textual materials, the author explores the hidden dimensions of landscape, showing how geographical imagination shaped the aesthetics of Qing court culture while proposing a new interpretation of the mental universe that conceived one of the world's most remarkable examples of imperial architecture.

*Bulk Metallic Glasses* C. Suryanarayana, A. Inoue, 2017-11-22 Reflecting the fast pace of research in the field, the Second Edition of Bulk Metallic Glasses has been thoroughly updated and remains essential reading on the subject. It incorporates major advances in glass forming ability, corrosion behavior, and mechanical properties. Several of the newly proposed criteria to predict the glass-forming ability of alloys have been discussed. All other areas covered in this book have been updated, with special emphasis on topics where significant advances have occurred. These include processing of hierarchical surface structures and synthesis of nanophase composites using the chemical behavior of bulk metallic glasses and the development of novel

bulk metallic glasses with high-strength and high-ductility and superelastic behavior. New topics such as high-entropy bulk metallic glasses, nanoporous alloys, novel nanocrystalline alloys, and soft magnetic glassy alloys with high saturation magnetization have also been discussed. Novel applications, such as metallic glassy screw bolts, surface coatings, hyperthermia glasses, ultra-thin mirrors and pressure sensors, mobile phone casing, and degradable biomedical materials, are described. Authored by the world's foremost experts on bulk metallic glasses, this new edition endures as an indispensable reference and continues to be a one-stop resource on all aspects of bulk metallic glasses.

**Enzymes in Food Technology** Robert J. Whitehurst, Barry A. Law, 2002 The second edition of this successful book highlights the widespread use of enzymes in food processing improvement and innovation, explaining how they bring advantages. The properties of different enzymes are linked to the physical and biochemical events that they influence in food materials and products, while these in turn are related to the key organoleptic, sensory and shelf life qualities of foods. Fully updated to reflect advances made in the field over recent years, the book also contains five new chapters.

**Handbook of Food Analysis - Two Volume Set** Leo M.L. Nollet, Fidel Toldra, 2015-06-10 Updated to reflect changes in the industry during the last ten years, The Handbook of Food Analysis, Third Edition covers the new analysis systems, optimization of existing techniques, and automation and

miniaturization methods. Under the editorial guidance of food science pioneer Leo M.L. Nollet and new editor Fidel Toldra, the chapters take an in

**Exchange in Ancient Greece** Sitta von Reden, 1995 Exchange lies at the heart of the economic processes. It is also, as Aristotle maintained, an essential condition for political order. The separation of economic exchange from its social and political implications, commonplace in modern economic theory, would have been meaningless in Ancient Greece. This book is the first sustained attempt to describe the consequences of a cast of thought in which the exchange of goods and the payment of money were viewed as social and political practices. The distinction between reciprocity and redistribution on the one hand and market exchange on the other is abandoned in order to explore the social symbolism of exchange across the boundary between politics and economics. Dr von Reden shows how economically motivated exchange emerged as morally inappropriate behaviour against a cultural background in which the political community was seen as a sacred order similar to that of the family. Drawing on literary and archaeological evidence, including vase painting and the iconography of coinage, she emphasises the overriding importance of the Greek city-state in shaping a notion of commerce opposed to other forms of exchange.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. **Food and Culture** Pamela Goyan Kittler, Kathryn P. Sucher, 2007-06-01 FOOD AND CULTURE is the market-leading text for the cultural foods courses, providing

information on the health, culture, food, and nutrition habits of the most common ethnic and racial groups living in the United States. It is designed to help health professionals, chefs, and others in the food service industry learn to work effectively with members of different ethnic and religious groups in a culturally sensitive manner. Authors Pamela Goyan Kittler and Kathryn P. Sucher include comprehensive coverage of key ethnic, religious, and regional groups, including Native Americans, Europeans, Africans, Mexicans and Central Americans, Caribbean Islanders, South Americans, Chinese, Japanese, Koreans, Southeast Asians, Pacific Islanders, Greeks, Middle Easterners, Asian Indians, and regional Americans.

*Selectivity in Catalysis* Mark E. Davis, Steven L. Suib, American Chemical Society. Meeting, 1993 Discusses recent research and provides tutorial chapters on enhancing selectivity in catalysis through stereoselectivity, reaction pathway control, shape selectivity, and alloys and clusters. Presents an interdisciplinary approach to increasing selectivity in homogeneous and heterogeneous catalysis research. Includes an overview chapter that discusses the current state of the field and offers a perspective on future directions.

Membranes for Food Applications Klaus-Viktor Peinemann, Suzana Pereira Nunes, Lidietta Giorno, 2011-08-04 Edited by an internationally recognized leader in the field, this third volume in the series represents the complete reference to membrane processes in the food industry. The handbook adopts a

highly practical approach to this hot topic, combining the hands-on experience of the expert authors involved. They provide chapters devoted to such varied applications as dairy fractionation, electrodialysis, pressure-driven membrane processes in alcoholic beverages, membrane emulsification, contactors and bioreactors, as well as membranes for food packaging.

**Language Shattered** Maghiel van Crevel, 1996 *Language Shattered* is both a history of poetry from the People's Republic of China and a case study of the oeuvre of a leading Chinese poet. After the stifling orthodoxy of the 1950s and early 1960s, the terror of the Cultural Revolution (1966-1976) brought official Chinese literature to a total standstill. At the same time, disillusioned youths were more or less accidentally exposed to a varied body of foreign literature and began writing underground poetry. In the 1980s this poetry scene, now above ground, became one of pluriformity and proliferation in both official and unofficial circuits. The brutal suppression of the 1989 Protest Movement gave it an exile offshoot. The historical overview in Part I of this book is complemented in Part II by a discussion of Duoduo's poetry. Duoduo's career as a poet reflects the vicissitudes of Chinese Experimental poetry - and his beautiful, headstrong poems merit attention in themselves. They show that Chinese poetry is not just of interest as a chronicle of Chinese politics, but as literature in its own right.

**Milk and Dairy Products in Human Nutrition** Ellen Muehlhoff, Anthony Bennett (Dairy scientist), Deirdre MacMahon (Nutrition consultant), 2013 *Milk and dairy*

products are a vital source of nutrition for many people. They also present livelihood opportunities for farm families, processors and other stakeholders in dairy value chains. Consumers, industry and governments need up-to-date information on how milk and dairy products can contribute to human nutrition and how dairy-industry development can best contribute to increasing food security and alleviating poverty. This publication is unique in drawing together information on nutrition, and dairy-industry development, providing a rich source of useful material on the role of dairy products in human nutrition and the way that investment in dairy-industry development has changed.

**Computer Vision – ECCV 2020** Andrea Vedaldi, Horst Bischof, Thomas Brox, Jan-Michael Frahm, 2020-12-02 The 30-volume set, comprising the LNCS books 12346 until 12375, constitutes the refereed proceedings of the 16th European Conference on Computer Vision, ECCV 2020, which was planned to be held in Glasgow, UK, during August 23-28, 2020. The conference was held virtually due to the COVID-19 pandemic. The 1360 revised papers presented in these proceedings were carefully reviewed and selected from a total of 5025 submissions. The papers deal with topics such as computer vision; machine learning; deep neural networks; reinforcement learning; object recognition; image classification; image processing; object detection; semantic segmentation; human pose estimation; 3d reconstruction; stereo vision; computational photography; neural networks; image coding; image

reconstruction; object recognition; motion estimation.

**Cheese Rheology and Texture** Sundaram Gunasekaran,M. Mehmet Ak,2002-12-23  
Cheese Rheology and Texture is the first reference to bring together the essential information on the rheological and textural properties of cheese and state-of-the-art measurement techniques. This comprehensive resource begins with an overview of cheesemaking technology and detailed descriptions of fundamental rheological test methods. Then

**Person Re-Identification** Shaogang Gong,Marco Cristani,Shuicheng Yan,Chen Change Loy,2014-01-03 The first book of its kind dedicated to the challenge of person re-identification, this text provides an in-depth, multidisciplinary discussion of recent developments and state-of-the-art methods. Features: introduces examples of robust feature representations, reviews salient feature weighting and selection mechanisms and examines the benefits of semantic attributes; describes how to segregate meaningful body parts from background clutter; examines the use of 3D depth images and contextual constraints derived from the visual appearance of a group; reviews approaches to feature transfer function and distance metric learning and discusses potential solutions to issues of data scalability and identity inference; investigates the limitations of existing benchmark datasets, presents strategies for camera topology inference and describes techniques for improving post-rank search efficiency; explores the design rationale and

implementation considerations of building a practical re-identification system.

Recent Trends in Mycological Research Ajar Nath Yadav, 2021-04-14 Fungi range from being microscopic, single-celled yeasts to multicellular and heterotrophic in nature. Fungal communities have been found in vast ranges of environmental conditions. They can be associated with plants epiphytically, endophytically, or rhizospherically. Extreme environments represent unique ecosystems that harbor novel biodiversity of fungal communities. Interest in the exploration of fungal diversity has been spurred by the fact that fungi perform numerous functions integral in sustaining the biosphere, ranging from nutrient cycling to environmental detoxification, which involves processes like augmentation, supplementation, and recycling of plant nutrients--a particularly important process in sustainable agriculture. Fungal communities from natural and extreme habitats help promote plant growth, enhance crop yield, and soil fertility via direct or indirect plant growth promoting (PGP) mechanisms of solubilization of phosphorus, potassium, and zinc, production of ammonia, hydrogen cyanides, phytohormones, Fe-chelating compounds, extracellular hydrolytic enzymes, and bioactive secondary metabolites. These PGP fungi could be used as biofertilizers, bioinoculants, and biocontrol agents in place of chemical fertilizers and pesticides in eco-friendly manners for sustainable agriculture and environments. Along with agricultural applications, medically important fungi play significant role for human

health. Fungal communities are useful for sustainable environments as they are used for bioremediation which is the use of microorganisms' metabolism to degrading waste contaminants (sewage, domestic, and industrial effluents) into non-toxic or less toxic materials by natural biological processes. Fungi could be used as mycoremediation for the future of environmental sustainability. Fungi and fungal products have the biochemical and ecological capability to degrade environmental organic chemicals and to decrease the risk associated with metals, semi-metals, and noble metals either by chemical modification or by manipulating chemical bioavailability. The two volumes of *Recent Trends in Mycological Research* aim to provide an understanding of fungal communities from diverse environmental habitats and their potential applications in agriculture, medical, environments and industry. The books are useful to scientists, researchers, and students involved in microbiology, biotechnology, agriculture, molecular biology, environmental biology and related subjects.

*A History of Chinese Science and Technology* Yongxiang Lu, 2014-10-10 A History of Chinese Science and Technology (Volumes 1, 2 & 3) presents 44 individual lectures, beginning with Ancient Chinese Science and Technology in the Process of Human Civilizations and an Overview of Chinese Science and Technology, and continuing with in-depth discussions of several issues in the History of Science and the Needham Puzzle, interspersed with topics on Astronomy, Arithmetic, Agriculture and Medicine, The Four Great Inventions,

and various technological areas closely related to clothing, food, shelter and transportation. This book is the most authoritative work on the history of Chinese Science and Technology. It is the Winner of the China Book Award, the Shanghai Book Award (1st prize), and the Classical China International Publishing Project (GAPP, General Administration of Press and Publication of China) and offers an essential resource for academic researchers and non-experts alike. It originated with a series of 44 lectures presented to top Chinese leaders, which received very positive feedback. Written by top Chinese scholars in their respective fields from the Institute for the History of Natural Sciences, Chinese Academy of Sciences and many other respected Chinese organizations, the book is intended for scientists, researchers and postgraduate students working in the history of science, philosophy of science and technology, and related disciplines. Yongxiang Lu is a professor, former president and member of the Chinese Academy of Sciences (CAS) and Chinese Academy of Engineering (CAE), and Vice Chairman of the National Congress of China.

Methods for the Study of Marine Benthos Anastasios Eleftheriou, Alasdair McIntyre, 2008-04-15 Ecosystems of the benthic environment are a sensitive index to ecological change, and as such demand long-term and effective monitoring. Methods for the Study of Marine Benthos provides comprehensive information on the tools and techniques available to those working in areas where the declining health of the sea, depletion of

marine resources and the biodiversity of marine life are major concerns. In response to the need for increasingly detailed information on bottom-living communities, this fully revised new edition offers: Contributions from a broad range of internationally recognised experts New information for those compiling environmental impact statements, pollution assessments and working with eco-system management Two separate chapters on Imaging Techniques and Diving Systems A vital tool for all marine and environmental scientists, ecologists, fisheries workers and oceanographers, libraries in all universities and research establishments where these subjects are studied and taught will find this book a valuable addition to their shelves.
