Apollo's Warriors Michael E. Haas, 1998-05 Presenting a fascinating insider's view of U.S.A.F. special operations, this volume brings to life the critical contributions these forces have made to the exercise of air & space power. Focusing in particular on the period between the Korean War & the Indochina wars of 1950-1979, the accounts of numerous missions are profusely illustrated with photos & maps. Includes a discussion of AF operations in Europe during WWII, as well as profiles of Air Commandos who performed above & beyond the call of duty. Reflects on the need for financial & political support for restoration of the forces. Bibliography. Extensive photos & maps. Charts & tables.

Combat Squadrons of the Air Force; World War II. Maurer Maurer, 1969 This collection of squadron histories has been prepared by the USAF Historical

Division to complement the Division's book, Air Force Combat Units of World War II. The 1,226 units covered by this volume are the combat (tactical) squadrons that were active between 7 December 1941 and 2 September 1945. Each squadron is traced from its beginning through 5 March 1963, the fiftieth anniversary of the organization of the 1st Aero (later Bombardment) Squadron, the first Army unit to be equipped with aircraft for tactical operations. For each squadron there is a statement of the official lineage and data on the unit's assignments, stations, aircraft and missiles, operations, service streamers, campaign participation, decorations, and emblem.

To Save A City: The Berlin Airlift, 1948-1949 [Illustrated Edition] Roger G. Miller, 2015-11-06 Includes 30 Illustrations In this expert survey Air Force Historian Robert Miller explores the Epic story of the Berlin Airlift, the confrontation of Democracy and Communism as the world teetered on the brink of the Third World War. The Berlin blockade (24 June 1948;–12 May 1949) was one of the first major international crises of the Cold War. During the multinational occupation of post-World War II Germany, the Soviet Union blocked the Western Allies' railway, road, and canal access to the sectors of Berlin under allied control. The Soviets offered to drop the blockade if the Western Allies withdrew the newly introduced Deutschmark from West Berlin. In response, the Western Allies organised the Berlin airlift to carry supplies to the people in West Berlin. Aircrews from the United States Air Force, the British Royal Air Force, the Royal Canadian Air Force, the Royal Australian

Air Force, the Royal New Zealand Air Force, and the South African Air Force flew over 200,000 flights in one year, providing up to 8,893 tons of necessities daily, such as fuel and food, to the Berliners. Neither side wanted a war; the Soviets did not disrupt the airlift. By the spring of 1949 the airlift was clearly succeeding, and by April it was delivering more cargo than had previously been transported into the city by rail. On 11 May 1949, the USSR lifted the blockade of West Berlin. The Berlin Crisis of 1948–1949 served to highlight competing ideological and economic visions for post-war Europe, particularly Germany. The clash ultimately led to the division of that country into East and West and to the division of Berlin itself.

Air Commandos Against Japan Carolyn C Y'Blood, 2008-10-01 In 1943 the U.S. Army Air Forces created what would become the Air Commandos, a unit that marked a milestone in tactical operations in support of British ground forces invading Burma. William T. Y'Blood tells the story of how these daring American aviators trained and went into combat using unconventional hit-and-run tactics to confuse the enemy and destroy their lines of communication and supply. The force comprised light planes to evacuate wounded, transports to move heavy cargo, fighters, gliders, helicopters, and more than five hundred men. The book describes how this top-secret force successfully attacked the enemy from the air, resupplied British commandos on the ground, and airlifted the wounded out of the battle area—eventually driving the Japanese out of Burma.

Behind the Light Switch Derek M. Salmi,2019 Author Derek Salmi provides a comprehensive theory of air mobility, examining its five key factors of freedom of movement, command and control, integrated logistics, technology, and training, then illustrating these factors' criticality to mission success through case studies. This guidebook serves as a one-stop shop for military practitioners and civilian policy makers to use in framing current possibilities while spurring imagination for the future.--

Howard Hughes: The Secret Life Charles Higham,2013-09-24 His wealth was legendary. His passions were bizarre. Now, the truth about the money, the madness, and the man behind the enigma. Howard Hughes is one of the best known and least understood men of our times--famed for his wealth, his daring, and his descent into madness. Bestselling biographer Charles Higham goes beyond the enigma to reveal the incredible private life of Howard Hughes: * his romances with the great stars of Hollywood--Katharine Hepburn, Bette Davis, Cary Grant, Tyrone Power, and numerous others * his forays into sadomasochism * his involvement with Richard Nixon and Watergate * his bizarre final years This is a compelling portrait of a unique American figure--in a story as revealing as it is unforgettable.

Animals in Space Colin Burgess, Chris Dubbs, 2007-07-05 This book is as a detailed, but highly readable and balanced account of the history of animal space flights carried out by all nations, but principally the United States and the Soviet Union. It explores the ways in which animal high-altitude and space flight research impacted on space flight biomedicine and technology, and how the results - both successful and disappointing - allowed human beings to then undertake that same hazardous journey with far greater understanding and confidence. This complete and authoritative book will undoubtedly become the ultimate authority on animal space flights.

I Am Amelia Earhart Brad Meltzer, 2014-01-14 We can all be heroes. That's

the inspiring message of this lively, collectible picture book biography series from New York Times bestselling author Brad Meltzer. Kids always search for heroes, so we might as well have a say in it, Brad Meltzer realized, and so he envisioned this friendly, fun approach to biography - for his own kids, and for yours. Each book tells the story of one of America's icons in an entertaining, conversational way that works well for the youngest nonfiction readers, those who aren't quite ready for the Who Was series. Each book focuses on a particular character trait that made that role model heroic. For example, Amelia Earhart refused to accept no for an answer; she dared to do what no one had ever done before, and became the first woman to fly a plane all the way across the Atlantic Ocean. This book follows her from childhood to her first flying lessons and onward to her multi-record-breaking career as a pilot. This engaging series is the perfect way to bring American history to life for young children, and to inspire them to strive and dream.

US Special Ops Fred Pushies, 2016-07 Military author and spec ops expert, Fred Pushes, profiles weapons, missions, vehicles, and iconic commandos from the eighteenth-century to now.

Air Power in the Age of Total War John Buckley, 2006-05-09 Warfare in the first half of the 20th century was fundamentally and irrevocably altered by the birth and subsequent development of air power. This work assesses the role of air power in changing the face of battle on land and sea. Utilizing late-1990s research, the author demonstrates that the phenomenon of air power

was both a cause and a crucial accelerating factor contributing to the theory and practice of total war. For instance, the expansion of warfare to the homefront was a direct result of bombing and indirectly due to the extent of national economic mobilization required to support first rate air power status. In addition, the move away from the principle of total war with the onset of the Cold War and the replacement of air power by ICBMs is thoroughly examined. This work should provide students of international history, war studies, defence and strategic studies with an insight into 20th-century warfare.

Parents, Children, and the Facts of Life Henry V. Sattler, 1952 Father Sattler has written *Parents, Children and the Facts of Life* to help parents fulfill the extremely important duty of training boys and girls to be pure and innocent, and eventually to enter marriage with a noble and holy purpose if God calls them to that state of life. According to the official Catholic teaching, sex education is the duty of the parents, yet many parents still struggle to convey the facts of life to their children in a natural and inspiring way. Applying traditional Catholic principles to very practical questions, Fr. Sattler explains what parents should tell their children, when and how they should tell it, what moral and psychological dangers they must avoid, and what questions they should anticipate. His conversational and down to earth style provides parents with the confidence and practical wisdom to fulfill their role as their children's primary teachers of the facts of life.
