*Fairchild Republic A-10 Thunderbolt II* Steve Davies,2017-06-10 Dubbed 'Warthog' - or just 'Hog' - by those who fly and maintain it, the Fairchild Republic A-10 Thunderbolt II is the world's undisputed close air support attack jet. As tough as it is ugly, it has built a fearsome reputation as a tank buster and infantry killer in conflicts around the globe, and its GAU-8 Avenger 30mm cannon strikes fear into the hearts of all unlucky enough to be on the wrong side of it.he A-10 was clutched from the jaws of retirement by the 1991 Gulf War. At the time of the conflict, the United States Air Force was making plans to shed it's A-10 fleet, citing obsolescence and redundancy. As the ensuing conflict showed, nothing could have been further from the truth, and no other airframe could have provided the US and Coalition commanders with the sort of forward air control, close air support, combat search and rescue, and tank busting capabilities that the Hog did. Since then the A-10 has delivered capabilities to battlefield commanders in the Balkans (1990s), Afghanistan (2001 onwards) and the second Gulf War (2003 onwards), and Libya (2011). A-10s have flown around 11 per cent of Operation Inherent Resolve sorties (striking IS targets in Iraq) since combat operations began in August 2014.

**Fairchild Republic A-10 Thunderbolt II** Peter C. Smith,2021-01-31 A comprehensive account of the origins, design, and history of the A-10A Warthog: “Highly recommended.” —AMPS Indianapolis Includes photos The Fairchild-Republic A-10A Close Support aircraft has become a legend over its long front line life. Known as the Warthog due to her unusual appearance, this little aircraft has built up an awesome reputation in the specialized ground-attack role, where her accuracy and deadliness are widely recognized as the best of their kind. Hard lessons from World War II, which were reinforced by the bitter experience of the Vietnam War two decades later, showed it was both impracticable and cost-inefficient to use supersonic fighter jets in the close air support mission. A requirement was therefore drawn up for a plane capable of carrying a heavy and varied load of ordnance, which had good endurance and unprecedented maneuverability and could survive heavy ground fire—thus the A-10 was born. But by the time it came into service its role had changed to that of a tank-buster in the defense of Western Europe in the face of the overwhelming numbers of Soviet battle armor. With her straight wing, twin tails, and turbine engines mounted high on her rear fuselage, this single-seat aircraft certainly presented a unique appearance. But all these features served a vital role, as Peter C. Smith explains in this highly detailed study. Although the Warthog’s expected missions on the plains of Germany did not materialize, she did destroy hundreds of Soviet-built tanks during the Gulf wars. The A-10 has also flown almost continuous missions over the Balkans, against the Taliban in Afghanistan, and ISIS in Iraq and Syria. This beautifully illustrated and comprehensive volume brings the A-10’s incredible story right up to date.

**Sierra Hotel : flying Air Force fighters in the decade after Vietnam** ,2001 In February 1999, only a few weeks before the U.S. Air Force spearheaded NATO's Allied Force air campaign against Serbia, Col. C.R. Anderegg, USAF (Ret.), visited the commander of the U.S. Air Forces in Europe. Colonel Anderegg had known Gen. John Jumper since they had served together as jet forward air controllers in Southeast Asia nearly thirty years earlier. From the vantage point of 1999, they looked back to the day in February 1970, when they first controlled a laser-guided bomb strike. In this book Anderegg takes us from glimmers of hope like that one through other major improvements in the Air Force that came between the Vietnam War and the Gulf War. Always central in Anderegg's account of those changes are the people who made them. This is a very personal book by an officer who participated in the transformation he describes so vividly. Much of his story revolves around the Fighter Weapons School at Nellis Air Force Base (AFB), Nevada, where he served two tours as an instructor pilot specializing in guided munitions.

**Air Force Combat Units of World War II** Maurer Maurer,1961

Combat Squadrons of the Air Force; World War II. Maurer Maurer,1969 This collection of squadron histories has been prepared by the USAF Historical Division to complement the Division's book, Air Force Combat Units of World War II. The 1,226 units covered by this volume are the combat (tactical) squadrons that were active between 7 December 1941 and 2 September 1945. Each squadron is traced from its beginning through 5 March 1963, the fiftieth anniversary of the organization of the 1st Aero (later Bombardment) Squadron, the first Army unit to be equipped with aircraft for tactical operations. For each squadron there is a statement of the official lineage and data on the unit's assignments, stations, aircraft and missiles, operations, service streamers, campaign participation, decorations, and emblem.

*Douglas A1 Skyraider Owners' Workshop Manual* Tony Hoskins,2017-12-12 The Skyraider became legendary for its ability to soak up battle damage and still keep flying. It was eventually replaced in the US Navy by the swept-wing jet A-6 Intruder and A-7 Corsair. Radar-equipped Skyraiders were operated by the Royal Navy (1951-62) as airborne early warning aircraft, while the French Air Force bought ex-US Navy Skyraiders for use in the Algerian War in the 1960s, and in the 1970s during the civil war in Chad where they were flown by French mercenary pilots.

**Visual Aircraft Recognition** U. S. Army,2013-01-14 This manual is primarily a ready reference to assist the ground observer in aircraft recognition and identification. It provides information on current operational aircraft of the United States and foreign countries, which may be observed worldwide in the combat area. It can be used as source material for personnel conducting unit training in visual aircraft recognition. The procedures in this publication apply throughout the US Army. The data is based on the best information available at the time of publication; however, it is not all-inclusive because of some classification guidelines. This publication, by nature, has a built-in time lag, and some aircraft may still be under development or classified at the time of writing, but may be fielded or unclassified at, or after, publication.

**No Better Place to Die** Robert M. Murphy,2009-01-01 The you-are-there story of one of the most ferocious small-unit combats in US history . . .As part of the massive Allied invasion of Normandy, three airborne divisions were dropped behind enemy lines to sow confusion in the German rear and prevent panzer reinforcements from reaching the beaches. In the dark early hours of D-Day, this confusion was achieved well enough, as nearly every airborne unit missed its drop zone, creating a kaleidoscope of small-unit combat. Fortunately for the Allies, the 505th Regimental Combat Team of the 82nd Airborne Division hit on or near its drop zone. Its task was to seize the vital crossroads of Ste M?re Eglise, and to hold the bridge over the Merderet River at nearby La Fi?re. Benefiting from dynamic battlefield leadership, the paratroopers reached the bridge, only to be met by wave after wave of German tanks and infantry desperate to force the crossing.Reinforced by glider troops, who suffered terribly in their landings from the now-alert Germans, the 505th not only held the vital bridge for three days but launched a counterattack in the teeth of enemy fire to secure their objective once and for all, albeit at gruesome cost. In No Better Place to Die, Robert M. Murphy provides an objective narrative of countless acts of heroism, almost breathtaking in its you are there detail. No World War II veteran is better known in 82nd Airborne circles than Robert M. (Bob) Murphy. A Pathfinder and member of A Company, 505th PIR, Bob was wounded three times in action, and made all four combat jumps with his regiment, fighting in Sicily, Italy, Normandy, and Holland. He was decorated for valor for his role at La Fi?re, and is a Chevalier of the French Legion of Honor. After the war, he was instrumental in establishing the 505th RCT Association.A selection of the Military Book Club

*American Women and Flight since 1940* Deborah G. Douglas,2014-07-11 Women run wind tunnel experiments, direct air traffic, and fabricate airplanes. American women have been involved with flight from the beginning, but until 1940, most people believed women could not fly, that Amelia Earhart was an exception to the rule. World War II changed everything. It is on the record thatwomen can fly as well as men, stated General Henry H. Arnold, commanding general of the Army Air Forces. The question became Should women fly? Deborah G. Douglas tells the story of this ongoing debate and its impact on American history. From Jackie Cochran, whose perseverance led to the formation of the Women's Army Service Pilots (WASP) during World War II to the recent achievements of Jeannie Flynn, the Air Force's first woman fighter pilot and Eileen Collins, NASA's first woman shuttle commander, Douglas introduces a host of determined women who overcame prejudice and became military fliers, airline pilots, and air and space engineers. Not forgotten are stories of flight attendants, air traffic controllers, and mechanics. American Women and Flight since 1940 is a revised and expanded edition of a Smithsonian National Air and Space Museum reference work. Long considered the single best reference work in the field, this new edition contains extensive new illustrations and a comprehensive bibliography.

Defending Air Bases in an Age of Insurgency Shannon Caudill,Air University Press,2014-08 This anthology discusses the converging operational issues of air base defense and counterinsurgency. It explores the diverse challenges associated with defending air assets and joint personnel in a counterinsurgency environment. The authors are primarily Air Force officers from security forces, intelligence, and the office of special investigations, but works are included from a US Air Force pilot and a Canadian air force officer. The authors examine lessons from Vietnam, Iraq, Afghanistan, and other conflicts as they relate to securing air bases and sustaining air operations in a high-threat counterinsurgency environment. The essays review the capabilities, doctrine, tactics, and training needed in base defense operations and recommend ways in which to build a strong, synchronized ground defense partnership with joint and combined forces. The authors offer recommendations on the development of combat leaders with the depth of knowledge, tactical and operational skill sets, and counterinsurgency mind set necessary to be effective in the modern asymmetric battlefield.

*The Cutting Edge* Mark A. Lorell,Hugh P. Levaux,United States. Air Force,Project Air Force (U.S.),1998 The proposition that innovation is critical in the cost-effective design and development of successful military aircraft is still subject to some debate. RAND research indicates that innovation is promoted by intense competition among three or more industry competitors. Given the critical policy importance of this issue in the current environment of drastic consolidation of the aerospace defense industry, the authors here examine the history of the major prime contractors in developing jet fighters since World War II. They make use of an extensive RAND database that includes nearly all jet fighters, fighter-attack aircraft, and bombers developed and flown by U.S. industry since 1945, as well as all related prototypes, modifications, upgrades, etc. The report concludes that (1) experience matters, because of the tendency to specialize and thus to develop system-specific expertise; (2) yet the most dramatic innovations and breakthroughs came from secondary or marginal players trying to compete with the industry leaders; and (3) dedicated military R&D conducted or directly funded by the U.S. government has been critical in the development of new higher-performance fighters and bombers.

The Tomcat was developed for the US Navy's Naval Fighter Experimental (VFX) program following the collapse of the F-111B project.
