Holy Blood, Holy Grail Michael Baigent, Richard Leigh, Henry Lincoln, 2007-12-18 Is the traditional, accepted view of the life of Christ in some way incomplete? • Is it possible Christ did not die on the cross? • Is it possible Jesus was married, a father, and that his bloodline still exists? • Is it possible that parchments found in the South of France a century ago reveal one of the best-kept secrets of Christendom? • Is it possible that these parchments contain the very heart of the mystery of the Holy Grail? According to the authors of this extraordinarily provocative, meticulously researched book, not

only are these things possible — they are probably true! so revolutionary, so original, so convincing, that the most faithful Christians will be moved; here is the book that has sparked worldwide controversy. Enough to seriously challenge many traditional Christian beliefs, if not alter them. — Los Angeles Times Book Review Like Chariots of the Gods?...the plot has all the elements of an international thriller. — Newsweek

The Flat Earth as Key to Decrypt the Book of Enoch Zen Garcia,2015-09-26 Shortly after accepting the flat earth as a model for the world, I decided to revisit the Book of the Courses of the Heavenly Luminaries to see if my new understanding would somehow mirror what Enoch was sharing as the motion of the sun and moon. As I began to read chapters 71-82, I found to my utter amazement that I was able to grasp those passages. I knew then that the vision that the angel Uriel had shown to Enoch could only be deciphered if one were to imagine Enoch's description of the revolution of the sun and the moon. As seen from above the flat circular plane of the earth as described by Isaiah; and that Enoch must have been taken up to perhaps where Polaris is, centered directly above the North Pole, and while looking down at the backdrop of the earth, was instructed on the motions of both the sun and moon. Without such conception, it is in my opinion impossible to apply

these descriptions to the model of the earth as a spherical planet.

(Gregory Benford, New York Times bestselling author): In 2066, a black hole is on a collision course with Earth. Can NASA scientist Burt find a solution to save the solar system? ----- \*\*\* USA Today bestseller \*\*\* The year is 2066 and the world is oblivious to the threat it faces. Searching for Extraterrestrial Intelligence H. Paul Shuch, 2011-02-14 This book is a collection of essays written by the very scientists and engineers who have led, and continue to lead, the scientific quest known as SETI, the search for extraterrestrial intelligence. Divided into three parts, the first section, 'The Spirit of SETI Past', written by the surviving pioneers of this then emerging discipline, reviews the major projects undertaken during the first 50 years of SETI science and the results of that research. In the second section, 'The Spirit of SETI Present', the present-day science and technology is discussed in detail, providing the technical background to contemporary SETI instruments, experiments, and analytical techniques, including the processing of the received signals to extract potential alien communications. In the third and final section, 'The Spirit of SETI Future', the book looks ahead to the possible directions that SETI will take in the next 50 years, addressing such important topics as interstellar message construction, the risks and assumptions of interstellar communications, when we might make contact, what aliens might look like and what is likely to happen

in the aftermath of such a contact.

From MTV to Mecca Kristiane Backer, 2012 In the early 1990s Kristiane Backer was one of the very first presenters on MTV (Europe). For some years she lived and breathed the international music scene quickly gaining a cult following amongst viewers and becoming a darling of the European press. As she reached the pinnacle of her success she realised that, despite having all she could have wished for, she was never truly satisfied. Something very important was missing. A fateful meeting with Pakistani cricket hero Imran Khan changed her life. He invited her to his country where she encountered a completely different world to the one she knew, the religion and culture of Islam. A few years later (in 1995), after travelling more widely in the Islamic world and knowing that she had discovered her spiritual path, she embraced Islam in a London mosque. In this private memoir Kristiane Backer tells the story of her conversion and explains how faith, despite the many challenges she faced as she turned her life upside down, at last gave her inner peace and the meaning she had sought.

*Cosmology and Architecture in Premodern Islam* Samer Akkach, 2012-02-01 This fascinating interdisciplinary study reveals connections between architecture, cosmology, and mysticism. Samer Akkach demonstrates how space ordering in premodern Islamic architecture reflects the transcendental and the sublime. The book features many new translations, a number from unpublished sources, and several illustrations. Referencing a wide range of mystical texts, and with a special focus on the works of the great Sufi master Ibn Arabi, Akkach introduces a notion of spatial sensibility that is shaped by religious conceptions of time and space. Religious beliefs about the cosmos, geography, the human body, and constructed forms are all underpinned by a consistent spatial sensibility anchored in medieval geocentrism. Within this geometrically defined and ordered universe, nothing stands in isolation or ambiguity; everything is interrelated and carefully positioned in an intricate hierarchy. Through detailed mapping of this intricate order, the book shows the significance of this mode of seeing the world for those who lived in the premodern Islamic era and how cosmological ideas became manifest in the buildings and spaces of their everyday lives. This is a highly original work that

provides important insights on Islamic aesthetics and culture, on the history of architecture, and on the relationship of art and religion, creativity and spirituality.
