Introduction to Management of Reverse Logistics and Closed Loop Supply Chain Processes Donald F. Blumberg,2004-11-29 Increasing legislative and environmental pressure requires businesses to become more responsive to products that either have been returned or that are at the end of their useful lives. From Cave Man to Cave Martian Manfred "Dutch" von Ehrenfried,2019-04-05 This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a "Short Stay" Opposition Class mission to Mars as the first mission rather than the "Long Stay" concept requiring a mission that is too long, too dangerous and too costly for man's first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.

Craft and Heritage Susan Surette,Elaine Cheasley Paterson,2021-10-21 This collection of 19 original essays argues for a critical and sustained engagement between the fields of craft and heritage. The book's interdisciplinary and international array of authors consider how heritage and craft institutions, policies, practices and audiences encounter the constraints and opportunities of production, recognition and exhibition. Case studies spanning 125 years raise and address questions concerning authenticity and commodification, innovation and improvisation, diasporas and decolonization, global economies and national and professional identities. Authors also analyse mechanisms through which craft mobilises and has been harnessed by heritage processes and designations. Examples range from an Irish village at the 1893 Chicago World's Fair and the role of chronopolitics in contemporary Vietnamese pottery, to the invisibility of crochet within Swedish heritagisation processes and the application of game theory in a ceramics museum. With section one considering citizenship and identity, section two sustainability and section three dynamic craft in cultural institutions, *Craft and Heritage* interrogates how craft objects, makers and processes intersect with current heritage concerns and practices.

Almost a decade later, WellPreserved.ca is an extraordinary resource for both beginners and experts alike. Their much-anticipated first cookbook showcases seven different preserving techniques—waterbath canning, pressure canning, dehydrating, fermenting, cellaring, salting & smoking, and infusing—and takes readers on a trip to the market in twenty-five ingredients. From apples, pears, peaches and rhubarb, to asparagus, peppers, mushrooms, and tomatoes, and covering a variety of meat and fish, Batch teaches you everything you need to know to get the most out of your kitchen. With their signature approachable and fun style, Joel and Dana showcase techniques for a variety of skill levels, explain how to batch your recipes to make two preserves at once, give you multiple options for preserving in ten minutes or less, and serve up mouthwatering center-of-the-plate meals that take your preserves from the pantry to the table. Tasting Rome Katie Parla,Kristina Gill,2016-03-29 A love letter from two Americans to their adopted city, *Tasting Rome* is a showcase of modern dishes influenced by tradition, as well as the rich culture of their surroundings. Even 150 years after unification, Italy is still a divided nation where individual regions are defined by their local cuisine. Each is a mirror of its city's culture, history, and geography. But cucina romana is the country's greatest standout. *Tasting Rome* provides a complete picture of a place that many love, but few know completely. In sharing Rome's celebrated dishes, street food innovations, and forgotten recipes, journalist Katie Parla and photographer Kristina Gill capture its unique character and reveal its truly evolved food culture—a culmination of 2000 years of history. Their recipes acknowledge the foundations of Roman cuisine and demonstrate how it has transitioned to the variations found today. You'll delight in the expected classics (cacio e pepe, pollo alla romana, fiore di zucca); the fascinating but largely undocumented Sephardic Jewish cuisine (hraiimi con couscous, brodo di pesce, pizzarelle); the authentic and tasty offal (guanciale, simmenthal di coda, insalata di nervitti); and so much more. Studded with narrative features that capture the city's history and gorgeous photography that

highlights both the food and its hidden city, you'll feel immediately inspired to start tasting Rome in your own kitchen. eBook Bonus Material: Be sure to check out the directory of all of Rome's restaurants mentioned in the book!

Adhesives and Adhesive Tapes Gerhard Gierenz, Werner Karmann, 2008-09-26 Adhesion is among the oldest technologies known to mankind, but the technology of adhesives began to boom with the developments in chemistry in the early 1900s. The last few years have seen tremendous progress in the performance of adhesives, allowing two pieces to be connected inseparably. Modern adhesives perform so well that more sophisticated joining methods, e.g. welding, can often be replaced by adhesion, meaning that adhesives have found new areas of application. This book allows readers to quickly gain an overview of the adhesives available and to select the best adhesive for each purpose.

Philosophy of Artificial Intelligence Rajakishore Nath, 2009 This book deals with the major philosophical issues in the theoretical framework of Artificial Intelligence (AI) in particular and cognitive science in general. The researchers in AI are concerned with the issues of consciousness, human subjectivity, creativity, etc. Cognitive Science and AI argue that consciousness can be artificially created and comprehended in the function of robots. The robotic activities explain the mechanism involved in computation, language processing, sensing the information, etc. Contrary to this thesis, the philosophical study tries to show that human consciousness, thinking, imagination, etc. are much larger concepts and need to be delved into in the broad theoretical framework. This book is a critique of the mechanistic theory of mind. It shows the basic foundation of AI and its limitations in explaining the activities of the human mental life. Machine-functionalism fails to account for the subjective nature of consciousness and the creativity involved in the conscious acts. There are two aspects of this thesis-- the epistemological and the metaphysical. Epistemologically, the subject of consciousness intimately knows the raw feelings or the qualia. Metaphysically speaking, however, the raw feelings are real in the sense that they are part of the furniture of the mental world. Therefore, we can hardly deny that the mental world is real.
