Papertoy Monsters Brian Castleforte, 2010-12-29 A breakthrough paper-folding book for kids—paper airplanes meet Origami meets Pokemon. Papertoys, the Internet phenomenon that's hot among graphic designers and illustrators around the world, now comes to kids in the coolest new book. Created and curated by Brian Castleforte, a graphic designer and papertoy pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia, Chile, even Jackson, Tennessee), Papertoy Monsters offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful and hip, combining the edginess of anime with the goofy fun of Uglydolls and other collectibles. Plus each character comes with its own back-story. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask. Yucky Chuck, the lunchbox creature born in the deepest depths of your school bag. Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the hairy grandpa monster with his very own moustache collection.

Radiation Hormesis T. D. Luckey, 2020-10-28 Radiation Hormesis presents the only critical review of the effects of whole-body exposure to low doses of ionizing radiation in animals. This is a must read book for radiobiologists, health-conscious individuals, and serious environmentalists. Topics discussed include our radiation environment, radiation hormesis in cancer mortality, growth and development, reproduction and mutation, immunity, and cancer. Data is presented that indicates that low doses of ionizing radiation may actually be beneficial to human health. This information could invalidate the zero thesis and linear models

used by most regulatory agencies. The implications regarding eliminating linear models and accepting radiation hormesis are also discussed.

Ranging from superhero mythology to pillars of art history, his work is populated with a vast and constantly growing arsenal of original characters such as MC Supersized, the obese fast-food mascot featured in the hit movie Supersize

Me; and Abraham Obama, which fused America's 16th and 44th Presidents, an image that was posited by the media as having directly impacted the 2008 election. Natal Astrology, Part 2 C. C. Zain, 2014-02 This book is part 2 of the tenth course in a series of 21 Brotherhood of Light Courses by C. C. Zain on the Hermetic Sciences, Astrology, Alchemy, Tarot, Kabbalah and the Occult. It is an intermediate to advanced level astrology course on calculating and interpreting natal horoscope progressions and transits. Originally entitled Predicting Events, this book teaches the student how to calculate and interpret Secondary (Major), Minor and Transit progressed aspects of a natal chart. Tracking movement of the planets in the chart after birth reveals probable future trends through indicating the manner in which an individual's astral (unconscious mind) thought cell structures are

stimulated and work to attract activities and events into the life. With this information the individual may seize opportunities or take precautionary action, and through various techniques presented in the book, initiate mental and physical actions to achieve the most desirable outcome. Learn how to calculate and interpret the Hermetic system of major (secondary) and minor progressions, how transit aspects act as triggers for major progressions, and how to rectify a horoscope when the exact birth time is unknown. This book is recommended for advanced students and professionals and for intermediate students who have studied Course 2, Astrological Signatures, and the first two chapters of Course 8, Horary Astrology, and Course 10-1, Natal Astrology: Delineating the Horoscope, by C. C. Zain.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.
