Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Performance on Behalf of the Environment Richard D. Besel, Jnan A. Blau, 2013-11-26 Human degradation of the environment has been documented by scholars across a range of disciplines: the global temperature of the planet continues to rise, abandoned industrial sites stain once vibrant communities, and questions about the purity of our water and foods linger. In the shadow of these material conditions, concerned citizens have reacted by issuing critiques against careless consumerism and excessive lifestyles. Their hope is to illustrate and inspire alternative ways of living. As part of such efforts and activism, some have turned to performance as a means to investigate matters further, pose challenges and questions, and enact new ways of being and thinking in a globalized world. *Performance on Behalf of the Environment* is a collection of essays from a diverse group of scholars that explore critically the strengths, limitations, and processes of what can be termed environmental performances.

Biofiction Michael Lackey, 2021-07-06 *Biofiction: An Introduction* provides readers with the history, origins, evolution, and legitimization of biofiction, suggesting potential lines of inquiry, exploring criticisms of the literary form, and modeling the process of analyzing and interpreting individual texts. Written for undergraduate and graduate

students, this volume combines comprehensive coverage of the core foundations of biofiction with contemporary and lively debates within the subject. The volume aims to confront and illuminate the following questions: • When did biofiction come into being? • What forces gave birth to it? • How does it uniquely function and signify? • Why has it become such a dominant aesthetic form in recent years? This introduction will give readers a framework for evaluating specific biofictions from writers as varied as Friedrich Nietzsche, George Moore, Zora Neale Hurston, William Styron, Angela Carter, Joyce Carol Oates, and Colm Tóibín, thus enabling readers to assess the value and impact of individual works on the culture at large. Spanning nineteenth-century origins to contemporary debates and adaptations, this book not only equips the reader with a firm grounding in the fundamentals of biofiction but also provides a valuable guide to the uncanny power of the biographical novel to transform cultural attitudes, perspectives, and beliefs.

The Limits of Westernization Jon Thares Davidann, 2020-12-18 The rise of East Asia from the ashes of World War II in the late twentieth century has led to searching questions about the role the region will play in the world. The possibility that China will overtake the United States as a super power suggests the twenty-first century could become an Asian century. Given the dynamism of a new Asia, this study provides a crucial analysis of the origins and development of modern thought in East Asia and the United States, reevaluating the influence of the United States on East Asia in the twentieth century and giving greater voice to East Asians in the growth of their own ideas of modernity. While an abundance of scholarship exists on postwar modernization, there is a gap in the prewar origins and development of modern ideas in the late nineteenth and early twentieth century. In that time, influential intellectuals on both sides of the Pacific shaped modernity by rejecting the old order, and embracing progress, the new domain of science, democracy, racial relativism, internationalism, and civic duty. The book is a seminal work that recalibrates an established narrative of modernity, the West as teacher and the East as pupil. - Prof. Dr. Andreas Niehaus, Head Department Languages and Cultures, Ghent University Jon Thares Davidann forces a course correction in modernity studies with his insightful new book showing how from roughly 1860 to 1950 intellectuals from Japan, China, the United States, and Korea contributed to a hybrid form of modernization in East Asia with indigenous roots. - James I. Matray, California State University, Chico This book is particularly timely given the current interest in the rise of East Asia in global history. Rarely can one interpret both East Asian and American thoughts as exquisitely as Dr. Davidann. He also tries to transcend both modernization theory and anti-imperialist/anti-American perspective. A very ambitious and important contribution to transpacific intellectual history. - Hiroo Nakajima, Osaka University This interactive intellectual history presents an effective argument against civilizational essentialism. It details links in ideas across the Pacific, yet shows that East Asian thinkers led in building the versions of modernity that yielded divergent trajectories for China, Japan, and the U.S. - Patrick Manning, Andrew W. Mellon Professor of World History, Emeritus, University of Pittsburgh This insightful and far-reaching study effectively reframes the scholarship on the development of modern East Asia. Arguing that historians too often have overstated the extent of westernization, Davidann reexamines in rich and colorful detail the roles played by many prominent East Asians and Americans in constructing hybrid modernities. In doing so, he significantly expands our understanding of the modern world on both sides of the Pacific. Joseph M. Henning, Associate Professor of History, Undergraduate Program Director, International and Global Studies In this groundbreaking book, Davidann

dismantles well-worn assumptions about the uniqueness of Western modernity. The remarkable power of East Asian economies demands new explanations for the development of modernity, departing from a singular concept of westernization. Through a close analysis of the intellectual careers of numerous Asians as well as interested Westerners, Davidann argues persuasively for the adoption of new forms of modernity that are unique to East Asian history. The author effectively demonstrates that East Asians modernized on their own terms, creating new social forms and definitions of modernity. The book stands as a much-needed antidote to modernization theory from a previous generation of global historical scholarship, and thus should find an important place on the bookshelf of what is often called The New World History. - Prof. Rick Warner, Wabash College, President, World History Association, 2016-2017 Jon Davidann has written a wide-ranging and well documented exploration of the intellectual contacts and ideological influences across three of the main global centers of scientific and technological transformations and their political ramifications from the late-nineteenth century to the aftermath of World War II. The depths he manages to plumb in his analyses of the writings and public advocacy across cultures of a constellation of major Japanese, Chinese and American thinkers is remarkable for a comparative study and will become essential reading for scholars and students of this turbulent era in world history. - Michael Adas, University at New Brunswick A thoughtful and timely book! Jon Thares Davidann examines the emergence of modernity in the late 19th and 20th centuries by analyzing contributions from prominent East Asian and American intellectuals. In engaging, clear prose, he advances provocative arguments that challenge assumptions that equate modernity with Westernization. Highly recommended! - Emily Rosenberg, author of *Transnational Currents in a Shrinking World* (2014)

Speeches of Note Shaun Usher,2018-12-04 From the author of the New York Times bestseller *Letters of Note* comes a collection of 75 of history's most interesting, profound, and sometimes unknown speeches from a range of scintillating personalities such as Frederick Douglass, Justin Trudeau, Albert Einstein, Meghan Markle, Barbara Jordan, and Ursula K. Le Guin. This thoughtfully curated and richly illustrated collection celebrates oratory old and new, highlighting speeches we know and admire, while also shining a light on profound drafts that were never delivered or have until now been forgotten. From George Bernard Shaw's warm and rousing toast to Albert Einstein in 1930 and the commencement address affectionately given to graduates at Long Island University by Kermit the Frog, to the chilling public announcement (that was thankfully never made) by President Richard Nixon should Neil Armstrong and Buzz Aldrin become stranded on the moon, *Speeches of Note* honors the words and ideas of some of history's most provocative and inspiring personages.

Tom Kundig: Houses Dung Ngo,Tom Kundig,2006-11-09 Architect Tom Kundig is

known worldwide for the originality of his work. This paperback edition of Tom Kundig: Houses, first published in 2006, collects five of his most prominent early residential projects, which remain touchstones for him today. In a new preface written for this edition, Kundig reflects on the influence that these designs continue to have on his current thinking. Each house, presented from conceptual sketches through meticulously realized details, is the product of a sustained and active collaborative process among designer, builder, and client. The work of the Seattle-based architect has been called both raw and refined--disparate characteristics that produce extraordinarily inventive designs inspired by both the industrial structures ubiquitous to his upbringing in the Pacific Northwest and the vibrant craft cultures that are fostered there. --

Terms and Conditions R. Sikoryak, 2017-03-07 Master satirist tackles the contract everyone agrees to but no one reads "Mischievous, pastiche-heavy artist Robert Sikoryak...upped the difficulty level for his long-term conceptual project: Instead of abridging a book, he lifted the complete text of Apple's mind-numbing corporate boilerplate, which users must agree to before accessing iTunes, and mashed it up with art invoking more than a century of comics."—New York Times For his newest project, R. Sikoryak tackles the monstrously and infamously dense legal document, iTunes Terms and Conditions, the contract everyone agrees to but no one reads. In a word for word 94-page adaptation, Sikoryak hilariously turns the agreement on its head—each page features an avatar of Apple cofounder and legendary visionary Steve Jobs juxtaposed with a different classic strip such as Mort Walker's Beetle Bailey, or a contemporary graphic novel such as Craig Thompson's Blankets or Marjane Satrapi's Persepolis. Adapting the legalese of the iTunes Terms and Conditions into another medium seems like an unfathomable undertaking, yet Sikoryak creates a surprisingly readable document, far different from its original, purely textual incarnation and thus proving the accessibility and flexibility of comics. When Sikoryak parodies Kate Beaton's Hark A Vagrant peasant comics with Steve Jobs discussing objectionable material or Homer Simpson as Steve Jobs warning of the penalties of copyright infringement, Terms and Conditions serves as a surreal record of our modern digital age where technology competes with enduringly ironclad mediums.
