Voyage of the Paper Canoe Nathaniel H. (Nathaniel Holmes) Bishop, 2018-06-27 Voyage of the Paper Canoe; a geographical journey of 2500 miles, from Quebec to the Gulf of Mexico, during the years 1874-5 by Nathaniel H. (Nathaniel Holmes) Bishop CHAPTER IX. FROM NORFOLK TO CAPE HATTERAS. THE ELIZABETH RIVER. - THE CANAL. - NORTH LANDING RIVER. - CURRITUCK SOUND. - ROANOKE ISLAND. - VISIT TO BODY ISLAND LIGHT-HOUSE. - A ROMANCE OF HISTORY. - PAMPLICO SOUND. - THE PAPER CANOE ARRIVES AT CAPE HATTERAS. On Saturday morning, December 5, I left the pier of the Old Dominion Steamship Company, at Norfolk, Virginia, and, rowing across the water towards Portsmouth, commenced ascending Elizabeth River, which is here wide and affected by tidal change. The old navy yard, with its dismantled hulks lying at anchor in the stream, occupies both banks of the river. About six miles from Norfolk the entrance to the Dismal Swamp Canal is reached, on the left bank of the river. This old canal runs through the Great Dismal Swamp, and affords passage for steamers and light-draught vessels to Elizabeth City, on the Pasquotank River, which empties into Albemarle Sound to the southward. The great cypress and juniper timber is penetrated by this canal, and schooners are towed into the swamp to landings where their cargoes are delivered. We are delighted to publish this classic book as part of our extensive Classic Library collection. Many of the books in our collection have been out of print for decades, and therefore have not been accessible to the general public. The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature, and our view is that this is a significant literary work, which deserves to be brought back into print after many decades. The contents of the vast majority of titles in the Classic Library have been scanned from the original works. To ensure a high quality product, each title has been meticulously hand curated by our staff. Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work. We hope that you will enjoy this wonderful classic work, and that for you it becomes an enriching experience.

Voyage of the Paper Canoe; a Geographical Journey of 2500 Miles, from Quebec to the Gulf of Mexico, During the Years 1874-5 Nathaniel Holmes Bishop, 2018-07-09 Voyage of the Paper Canoe; a geographical journey of 2500 miles, from Quebec to the Gulf of Mexico, during the years 1874-5 By Nathaniel Holmes Bishop On Saturday morning, December 5, I left the pier of the Old Dominion Steamship Company, at Norfolk, Virginia, and, rowing across the water towards Portsmouth, commenced ascending Elizabeth River, which is here wide and affected by tidal change. The old navy yard, with its dismantled hulks lying at anchor in the stream, occupies both banks of the river. About six miles from Norfolk the entrance to the Dismal Swamp Canal is reached, on the left bank of the river. This old canal runs through the Great Dismal Swamp, and affords passage for steamers and light-draught vessels to Elizabeth City, on the Pasquotank River, which empties into Albemarle Sound to the southward. The great cypress and juniper timber is penetrated by this canal, and schooners are towed into the swamp to landings where their cargoes are delivered. In the interior of the Dismal Swamp is Drummond's Lake, named after its discoverer. It is seven miles long by five miles wide, and is the feeder of the canal. A branch canal connects it with the main

canal; and small vessels may traverse the lake in search of timber and shingles. Voyagers tell me that during heavy gales of wind a terrible sea is set in motion upon this shoal sheet of water, making it dangerous to navigate. Bears are found in the fastnesses of the swamp. The Dismal Swamp Canal was dug in the old days of the wheelbarrow and spade. The Albemarle and Chesapeake Canal, the entrance to which is sixteen miles from Norfolk, on the right or east bank of the Elizabeth River, and generally known as the new canal, was commenced about the year 1856, and finished in 1859. It is eight miles and a half in length, and connects the Elizabeth and North Landing rivers. This canal was dug by dredging-machines. It is kept in a much better state for navigation, so far as the depth of water is concerned, than the old canal, which from inattention is gradually shoaling in places; consequently the regular steam-packets which ply between Elizabeth City and Norfolk, as well as steamers whose destinations are further north, have given up the use of the Dismal Swamp Canal, and now go round through Albemarle Sound up the North River, thence by a six-mile cut into Currituck Sound, up North Landing River, and through the new canal to the Elizabeth River and into Chesapeake Bay. The shores of the Elizabeth are low and are fringed by sedgy marshes, while forests of second-growth pine present a green background to the eye. A few miles above Norfolk the cultivation of land ceases, and the canoeist traverses a wilderness. We are delighted to publish this classic book as part of our extensive Classic Library collection. Many of the books in our collection have been out of print for decades, and therefore have not been accessible to the general public. Humble Homes, Simple Shacks, Cozy Cottages, Ramshackle Retreats, Funky Forts Dr Derek Diedricksen, 2012-02-01 This Old House meets Wayne's World in this zany guide to designing and building tiny homes Derek Diedricksen has always had a love for small, modest houses ever since his father gave him the book *Tiny Tiny Houses* by Lester Walker for his tenth birthday. Combining his artistic abilities, wild imagination, and his passion for small houses, he self-published *Humble Homes, Simple Shacks, Cozy Cottages, Ramshackle Retreats, Funky Forts, and Whatever the Heck Else we could Squeeze in Here* in 2009. This book is a collection of Diedricksen's creative/imaginative sketches for building small houses, shacks, cottages, and forts. The sketches are accompanied with hand-written commentary, both instructive and comical. Derek's main purpose is to get your creative juices flowing and encourage you to get off the couch and use your hands. Believing that specific building plans squash

creativity, he avoids too many detailed instructions, giving you the chance to put your own creative spin on your very own small abode (even if it is just in your imagination).

Expanded Animation Jeremiah Diephuis, Jürgen Hagler, Alexander Wilhelm, Michael Lankes, 2019-04-30 The symposium Expanded Animation was initiated in 2013 and offered a first approach to the expanded field of computer animation. In the meantime, it has become an established part of the Ars Electronica Animation Festival and the international competition Prix Ars Electronica Computer Animation. Every year under an overarching theme, the symposium has researched the field of technology and art, animation and aesthetics, investigated the collapsing boundaries in digital animation and explored positions and future trends. Much like the first conferences on computer animation at Ars Electronica in the 1980s, practice and theory are equally important. The richly illustrated publication Expanded Animation. The Anthology features contributions from speakers and artist positions from the past five years and presents an overview of the prize winners in Computer Animation.

Surviving a tough family upbringing, along with the trauma of finding out the truth about his father at a young age, Lenny beat the odds. With a riotous warmth and his trademark energy, in *Who Am I, Again?* he tells the heart-breakingly honest and inspirational story of his youth. X-15 Photo Scrapbook Tony R. Landis, Dennis R. Jenkins, 2003 The North American X-15 was the last in a line of manned rocket-powered research airplanes built during the 1950s to explore ever-faster and higher flight regimes. This was an era before computers were commonplace, and the only way to investigate the unknown was to go there. The program was launched in 1954 specifically to produce the first hypersonic (velocities greater than five times the speed of sound) manned aircraft. Forward-thinking researchers also decided to design the airplane to fly to the edge of space, long before the manned space program had begun in earnest. An in-depth history of the X-15 program may be found in *Hypersonic: The Story of the North American X-15* by Dennis R. Jenkins and Tony R. Landis. This book is a collection of illustrations that were assembled for Hypersonic but would not fit into the finished work. Since many of these are significant and most have never before been published, it was decided to print this scrapbook as a companion volume to Hypersonic. With over 350 b/w and 50 color photos, this scrapbook provides an excellent visual look at a very exciting research program. Dimensions (width x height): 9 x 9 inches # of pages

108 # of color photographs: 400 b/w & color photos

How to Build Sci-fi Model Spacecraft Richard Marmo, 2004 Science fiction is more popular now than it has ever been, as seen by the number of interesting and imaginative science-fiction books, magazines, movies, and television shows produced each year. The scale modeling world has embraced the science-fiction phenomenon by offering a number of detailed and creative scale-model spaceship and diorama kits. In *How To Build Sci-Fi Model Spacecraft*, author Richard Marmo guides readers through a number of step-by-step buildups of styrene and resin kits. He offers helpful advice on subjects from basic kit assembly to more advanced methods like combining kits and customizing kits with unique, scratch-built pieces. Readers will learn the creative methods that allow them to add a personal touch to their kit and increase its overall detail, quality, and accuracy.

X-Planes Photo Scrapbook Dennis R. Jenkins, 2004 9x9, 450 black & white, photos and 50 color photos The X-Planes conjure up images of Chuck Yeager first breaking the sound barrier in the X-1 or of the black, bullet-shaped X-15 streaking through the skies at over Mach 6. But there have been 48 more X-designations assigned, as well as a host of other experimental aircraft that did not fall into the formal X-series. Some of these investigated very low-speed flight, vertical take-off, or were technology demonstrators for production military aircraft. Others were missiles, or gliders. One was supposed to be a spacecraft. Tony R. Landis and Dennis R. Jenkins have assembled an outstanding collection of photographs documenting the X-Planes. These photographs come from government and company archives as well as personal and public collections. Hundreds of photos - some in color and many never-before-seen - detail the modern history of experimental flight.

Hidden Alliances Elisabeth Schimana, 2020-02-18 Where are all of the women in the avant-garde electronic music

scene? Anyone who thinks they do not exist is totally wrong. It is, however, a fact that hardly anyone has done any research on them or written about them. Wondering about a world allegedly lacking in female electronic musicians, Elisabeth Schimana began a search in the late 1990s and the initial results of her research went into her performance Portrait 01 - Die Futuristin (Portrait 01 - the female futurists). Her research brought her into the sphere of electronic music, which culminated in the founding of the IMA- Institute for Media Archaeology. Now, this publication presents twenty female artists and their work. The artists create a somewhat different picture of the creation and development of electronic music. This illustrated volume is as intriguing as it is fascinating, and, above all, a significant portrait of this new history.
