Examining all facets of everyday web-life, she shows that racial and ethnic stereotypes, or 'cybertypes' are hardwired into our online interactions: Identity tourists masquerade in chat rooms as Asian\_Geisha or Alatiniover. Web directories sharply delimit racial categories. Anonymous computer users are assumed to be white. Lively, provocative, *Cybertypes* takes up computer relationship between race, ethnicity and technology and offers a candid and nuanced understanding of identity in the information age.

Thinking Like Your Editor: How to Write Great Serious Nonfiction and Get It Published Susan Rabiner, Alfred Fortunato, 2010-09-27 Distilled wisdom from two publishing pros for every serious nonfiction author in search of big commercial success. Over 50,000 books are published in America each

year, the vast majority nonfiction. Even so, many writers are stymied in getting their books published, never mind gaining significant attention for their ideas—and substantial sales. This is the book editors have been recommending to would-be authors. Filled with trade secrets, *Thinking Like Your Editor* explains: • why every proposal should ask and answer five key questions; • how to tailor academic writing to a general reader, without losing ideas or dumbing down your work; • how to write a proposal that editors cannot ignore; • why the most important chapter is your introduction; • why simple structure, complex ideas is the mantra for creating serious nonfiction; • why smart nonfiction editors regularly reject great writing but find new arguments irresistible. Whatever the topic, from history to business, science to philosophy, law, or gender studies, this book is vital to every serious nonfiction writer.

**Science at the Bar** Sheila Jasanoff, 2009-07-01 Issues spawned by the headlong pace of developments in science and technology fill the courts. How should we deal with frozen embryos and leaky implants, dangerous chemicals, DNA fingerprints, and genetically engineered animals? The realm of the law, to which beleaguered people look for answers, is sometimes at a loss—constrained by its own assumptions and practices, Sheila Jasanoff suggests. This book exposes American law's long-standing involvement in constructing, propagating, and perpetuating a variety of myths about science and technology. *Science at the Bar* is the first book to examine in detail how two powerful American institutions—both seekers after truth—interact with each other. Looking at cases involving product liability, medical malpractice, toxic torts, genetic engineering, and life and death, Jasanoff argues that the courts do not simply depend on scientific findings for guidance—they actually influence the production of science and technology at many different levels. Research is conducted and interpreted to answer legal questions. Experts are selected to be credible on the witness stand. Products are redesigned to reduce the risk of lawsuits. At the same time the courts emerge here as democratizing agents in disputes over the control and deployment of new technologies, advancing and sustaining a public dialogue about the limits of expertise. Jasanoff shows how positivistic views of science and the law often prevent courts from realizing their full potential as centers for a progressive critique of science and technology. With its lucid analysis of both scientific and legal modes of reasoning, and its recommendations for scholars and policymakers, this book will be an indispensable resource for anyone who hopes to understand the changing configurations of science, technology, and the law in our litigious society.

**The Christian Writer's Manual of Style** Zondervan, 2010-05-11 An essential tool for writers, editors, proofreaders, designers, copywriters, production managers, and marketers too. The Christian Writer's Manual of Style is an essential tool not only for writers of religious materials, but for their editors, proofreaders, designers, copywriters, production managers, and even marketers. Also included are rarely found items such as: • an author's guide to obtaining permissions • guidelines for using American, British, and Mid-Atlantic styles • discussions of inclusive language, profanity, and ethnic sensitivities • discussions of Internet and computer-related language style • a list of problem words • style issues regarding words from major world religions • a discussion of handling brand names in text • a list of common interjections • issues of type design, paper, copy-fit This edition has been completely updated since the 1988 edition and contains more than twice as much information as the previous edition.
