The Diabetes Textbook Joel Rodriguez-Saldana,2019-06-27 Diabetes has become a worldwide health problem, the global estimated prevalence approaches ten percent and the burden of this disease in terms of morbidity and mortality is unprecedented. The advances acquired through the knowledge of the mechanisms of the disease and the variety of therapeutic approaches contrast with the inability of private and public health systems in underdeveloped and even developed countries to achieve the goals of treatment. This paradox has been described in many sources: the surge of scientific advances contrast with an unprecedented amount of human suffering. Thus, a patient centered and an evidence based approach with the capacity to produce measurable clinical and economic outcomes is required. The purpose of this textbook is multiple: to offer a comprehensive resource covering all aspects of outpatient management; to address diabetes as a health problem from an epidemiological, economic and clinical perspective; to discuss the role of social determinants of health on the worldwide increase in diabetes; to highlight the challenges and obstacles in providing adequate care; and to outline a multidisciplinary approach to management in which medical visits retain their importance as part of a team comprising the patient, his or her family and a multidisciplinary group of health professionals who are able to move beyond the traditional approach of diabetes as a disease and greatly improve outcomes.

Rhythms of the Afro-Atlantic World Ifeoma C.K. Nwankwo,Mamadou Diouf,2010-11-22 Collecting essays by fourteen expert contributors into a trans-oceanic celebration and critique, Mamadou Diouf and Ifeoma Kiddoe Nwankwo show how music, dance, and popular culture turn ways of remembering Africa into African ways of remembering. With a mix of Nuyorican, Cuban, Haitian, Kenyan, Senegalese, Trinidagonian, and Brazilian beats, Rhythms of the Afro-Atlantic World proves that the pleasures of poly-rhythm belong to the realm of the discursive as well as the sonic and the kinesthetic. ---Joseph Roach, Sterling Professor of Theater, Yale University As necessary as it is brilliant, Rhythms of the Afro-Atlantic World dances across, beyond, and within the Black Atlantic Diaspora with the aplomb and skill befitting its editors and contributors. ---Mark Anthony Neal, author of Soul Babies: Black Popular Culture and the Post-Soul Aesthetic Along with linked modes of religiosity, music and dance have long occupied a central position in the ways in which Atlantic peoples have enacted, made sense of, and responded to their encounters with each other. This unique collection of essays connects nations from across the Atlantic---Senegal, Kenya, Trinidad, Cuba, Brazil, and the United States, among others---highlighting contemporary popular, folkloric, and religious music and dance. By tracking the continuous reframing, revision, and erasure of aural, oral, and corporeal traces, the contributors to Rhythms of the Afro-Atlantic World collectively argue that music and dance are the living evidence of a constant (re)composition and (re)mixing of local sounds and gestures. Rhythms of the Afro-Atlantic World distinguishes itself as a collection focusing on the circulation of cultural forms across the Atlantic world, tracing the paths trod by a range of music and dance forms within, across, or beyond the variety of locales that constitute the Atlantic world. The editors and contributors do so, however, without assuming that these paths have been either always in line with national, regional, or continental boundaries or always transnational, transgressive, and perfectly hybrid/syncretic. This collection seeks to reorient the discourse on cultural forms moving in the Atlantic world by being attentive to the specifics of the forms---their specific geneses, the specific uses to which they are put by their creators and consumers, and the specific ways in which they travel or churn in place. Mamadou Diouf is Leitner Family Professor of African Studies, Director of the Institute of African Studies, and Professor of History at Columbia University. Ifeoma Kiddoe Nwankwo is Associate Professor of English at Vanderbilt University. Jacket photograph by Elias Irizarry

Classical and Quantum Dynamics in Condensed Phase Simulations Bruce J Berne,Giovanni Ciccotti,David F Coker,1998-06-17 The school held at Villa Marigola, Lerici, Italy, in July 1997 was very much an educational experiment aimed not just at teaching a new generation of students the latest developments in computer simulation methods and theory, but also at bringing together researchers from the condensed matter computer simulation community, the biophysical chemistry community and the quantum dynamics community to confront the shared problem: the development of methods to treat the dynamics of quantum condensed phase systems. This volume collects the lectures delivered there. Due to the focus of the school, the contributions divide along natural lines into two broad groups: (1) the most sophisticated forms of the art of computer simulation, including biased phase space sampling schemes, methods which address the multiplicity of time scales in condensed phase problems, and static equilibrium methods for treating quantum systems; (2) the contributions on quantum dynamics, including methods for mixing quantum and classical dynamics in condensed phase simulations and methods capable of treating all degrees of freedom quantum-mechanically. Integrating Zooarchaeology and Paleoethnobotany Amber VanDerwarker, Tanya M. Peres, 2010-01-22 In recent years, scholars have emphasized the need for more holistic subsistence analyses, and collaborative publications towards this endeavor have become more numerous in the literature. However, there are relatively few attempts to qualitatively integrate zooarchaeological (animal) and paleoethnobotanical (plant) data, and even fewer attempts to quantitatively integrate these two types of subsistence evidence. Given the vastly different methods used in recovering and quantifying these data, not to mention their different preservational histories, it is no wonder that so few have undertaken this problem. Integrating Zooarchaeology and Paleoethnobotany takes the lead in tackling this important issue by addressing the methodological limitations of data integration, proposing new methods and innovative ways of using established methods, and highlighting case studies that successfully employ these methods to shed new light on ancient foodways. The volume challenges the perception that plant and animal foodways are distinct and contends that the separation of the analysis of archaeological plant and animal remains sets up a false dichotomy between these portions of the diet. In advocating qualitative and quantitative data integration, the volume establishes a clear set of methods for (1) determining the suitability of data integration in any particular case, and (2) carrying out an integrated qualitative or quantitative approach.

Traces of Contamination Eloy E. Merino, H. Rosi Song, 2005 Exposing two general perspectives, both manifestations of an authoritarian past that still holds a relationship with the present, this collection reveals the ideological legacy of the past and its experience as a distressing conditioner of the present. The dissonant elements of post-Franco discourse critically analyzed by our contributors challenge the seamless narrative that tells the successful story of the Spanish transition to democracy.--BOOK JACKET.

Fundamentals of Pediatric Surgery Peter Mattei, Peter F. Nichol, Michael D. Rollins, II, Christopher S. Muratore, 2016-10-01 The previous edition of this book was based on a simple but essential philosophy: provide a practical and up-to-date resource for the practicing surgeon detailing the specific needs and special considerations surrounding the surgical care of children. The second edition of Fundamentals of Pediatric Surgery stays true to the philosophy of the original with several significant enhancements. As well as encompassing the most up-to-date and practical clinical information for the experienced surgeon written in a straightforward narrative style, each chapter provides a rationale for the proposed approach based on the scientific evidence available in the literature and the author's personal clinical experience, supplies a detailed algorithm or clinical protocol in a graphic format, initiates a discussion regarding unanswered questions and proposals for future studies, and includes a list of suggested readings. Chapters cover in great detail a broad range of pediatric general surgery topics, including disorders of all major organ systems of the abdomen and thorax, congenital anomalies presenting in the newborn period, and a variety of maladies germane to the growing field of fetal surgery. The authors also provide authoritative discussions of therapeutic methods and surgical techniques that range from the traditional to the modern, including time-honored open operations, contemporary minimally invasive interventions, and emerging technologies such as single-site and robotic surgery. Written by experts in the field, Fundamentals of Pediatric Surgery, Second Edition is a definitive source of readily available clinical information that residents, fellows or attending surgeons can use to take care of actual patients in real time.

An Early Self Susanne Zepp, 2014-11-19 What role has Jewish intellectual culture played in the development of modern Romance literature? Susanne Zepp seeks to answer this question through an examination of five influential early modern texts written between 1499 and 1627: Fernando de Rojas's *La Celestina*, Leone Ebreo's *Dialoghi d'amore*, the anonymous tale *Lazarillo de Tormes* (the first picaresque novel), Montaigne's *Essais*, and the poetical renditions of the Bible by João Pinto Delgado. Forced to straddle two cultures and religions, these Iberian conversos (Jews who converted to Catholicism) prefigured the subjectivity which would come to characterize modernity. As New Christians in an intolerant world, these thinkers worked within the tensions of their historical context to question norms and dogmas. In the past, scholars have focused on the Jewish origins of such major figures in literature and philosophy. Through close readings of these texts, Zepp moves the debate away from the narrow question of the authors' origins to focus on the innovative ways these authors subverted and transcended traditional genres. She interprets the changes that took place in various literary genres and works of the period within the broader historical context of the sixteenth and seventeenth centuries, demonstrating the extent to which the development of early modern subjective consciousness and its expression in literary works can be explained in part as a universalization of originally Jewish experiences.

An Overview of the Pre-suppression Society of Jesus in Spain Patricia W. Manning, 2020-11-30 In An Overview of the Pre-suppression Society of Jesus in Spain, Patricia W. Manning offers a survey of the Society of Jesus in Spain from its origins in Ignatius of Loyola's early preaching to the aftereffects of its expulsion. Rather than nurture the nascent order, Loyola's homeland was often ambivalent. His pre-Jesuit freelance sermonizing prompted investigations. The young Society confronted indifference and interference from the Spanish monarchy and outright opposition from other religious orders. This essay outlines the order's ministerial and pedagogical activities, its relationship with women and with royal institutions, including the Spanish Inquisition, and Spanish members' roles in theological debates concerning casuistry, free will, and the immaculate conception. It also considers the impact of Jesuits' non-religious writings.

Knowledge of the Pragmatici, 2020-03-31 Knowledge of the pragmatici sheds new light on pragmatic normative literature (mainly from the religious sphere), a genre crucial for the formation of normative orders in early modern Ibero-America. Long underrated by legal historical scholarship, these media – manuals for confessors,

catechisms, and moral theological literature – selected and localised normative knowledge for the colonial worlds and thus shaped the language of normativity. The eleven chapters of this book explore the circulation and the uses of pragmatic normative texts in the Iberian peninsula, in New Spain, Peru, New Granada and Brazil. The book reveals the functions and intellectual achievements of pragmatic literature, which condensed normative knowledge, drawing on medieval scholarly practices of ‘epitomisation’, and links the genre with early modern legal culture. Contributors are: Manuela Bragagnolo, Agustín Casagrande, Otto Danwerth, Thomas Duve, José Luis Egío, Renzo Honores, Gustavo César Machado Cabral, Pilar Mejía, Christoph H. F. Meyer, Osvaldo Moutin, and David Rex Galindo.

The Mercenary Mediterranean Hussein Fancy, 2016-03-22 Over the course of the thirteenth and fourteenth centuries, the Christian kings of Aragon recruited thousands of foreign Muslim soldiers to serve in their armies and as members of their royal courts. Based on extensive research in Arabic, Latin and Romance sources, 'The Mercenary Mediterranean' explores this little-known and misunderstood history.

Biography of a Mexican Crucifix Jennifer Scheper Hughes, 2010 In 1543, in a small village in Mexico, a group of missionary friars received from a mysterious Indian messenger an unusual carved image of Christ crucified. The friars declared it the most poignantly beautiful depiction of Christ's suffering they had ever seen. Known as the Cristo Aparecido (the Christ Appeared), it quickly became one of the most celebrated religious images in colonial Mexico. Today, the Cristo Aparecido is among the oldest New World crucifixes and is the beloved patron saint of the Indians of Totolapan. In *Biography of a Mexican Crucifix*, Jennifer Scheper Hughes traces popular devotion to the Cristo Aparecido over five centuries of Mexican history. Each chapter investigates a single incident in the encounter between believers and the image. Through these historical vignettes, Hughes explores and reinterprets the conquest of and mission to the Indians; the birth of an indigenous, syncretic Christianity; the violent processes of independence and nationalization; and the utopian vision of liberation theology. Hughes reads all of these through the popular devotion to a crucifix that over the centuries becomes a key protagonist in shaping local history and social identity. This book will be welcomed by scholars and students of religion, Latin American history, anthropology, and theology.

Race, Equity, and Education Pedro Noguera, Jill Pierce, Roey Ahram, 2015-11-14 This powerful and timely analysis takes stock of race and education sixty years after the historic Brown vs. Board of Education decision. This volume examines education as one of the most visible markers for racial disparities in the US as well as one of its most visible frontiers for racial justice. Featuring original research, educators' insights, and perspectives from communities of color, it documents the complex impact of social/educational policy on social progress. Chapters on charter schools, curriculum content, performance measurement, and disproportionalities in special education referrals shed light on entrenched inequities that must be confronted. The book also makes it clear that leveling the playing field calls for not only better schools, but also addressing pervasive social problems such as poverty and housing segregation. Included in the coverage: School Policy is Housing Policy: Deconcentrating Disadvantage to Address the Achievement Gap. Charter Schooling, Race Politics, and an Appeal to History. The Data Quality Movement for the Asian American and Pacific Islander community: an unresolved civil rights issue. Critical Ethnic Studies in High School Classrooms: Academic Achievement via Social Action. Mexican American Educational Stagnation: The Role of Generational Status, Parental Narratives and Educator Messages. p/pp Pinpointing crucial issues and opportunities for solutions, *Race, Equity, and Education* has immediate salience for educators and researchers studying the intersection of race and education.
