A number of papers deal with historical aspects of Greek lexicography covering all phases of the language, i.e. ancient, medieval and modern, as well as the interrelations of Greek to neighboring languages. In addition, other papers address more formal issues, such as morphological, semantic and syntactic problems that are relevant to the study of Greek lexicography, as well as the study of individual words. The work is of special interest to scholars on the long standing problems of diachronic semantics, historical morphology and word formation, and to all those interested in etymology and the study of words of the Greek language.

Civilization Helen Fewster (Editor),2020-09 From the beginning of human history, the one thing that has defined us is our talent for making things, from basic technology and everyday objects, such as bowls and hand axes, to high-tech inventions, such as supersonic aircraft, smart devices, and Mars rovers. Objects speak volumes about a civilization, telling us how our ancestors lived - as well as what they believed in and valued. A bronze cat mummy shows us how highly the ancient Egyptians valued their feline companions, while a mechanical tiger toy tells the story of rising tensions between an Indian sultan and European colonisers. With stunning, specially commissioned photography, Civilization shows you the objects that our ancestors treasured - from the jewellery worn by the Mesopotamians to the prized ritual vessels used by the people of the Shang dynasty - and gives you an insight into what gave each culture its own identity. From astrolabes and aeroplanes to vacuum cleaners and X-rays, DK uses its hallmark visual style to weave the extraordinary legacy of our creativity into a unique view of world history that will change the way you see the objects all around us.--Publisher.
