**First Timers and Old Timers** Kenneth L. Untiedt, 2012 The Texas Folklore Society has been

alive and kicking for over one hundred years now, and I don't really think there's any mystery as to what keeps the organization going strong. The secret to our longevity is simply the constant replenishment of our body of contributors. We are especially fortunate in recent years to have had papers given at our annual meetings by new members--young members, many of whom are college or even high school students. These presentations are oftentimes given during sessions right alongside some of our oldest members. We've also had long-time members who've been around for years but had never yet given papers; thankfully, they finally took the opportunity to present their research, fulfilling the mission of the TFS: to collect, preserve, and present the lore of Texas and the Southwest. You'll find in this book some of the best articles from those presentations. The first fruits of our youngest or newest members include Acayla Haile on the folklore of plants. Familiar and well-respected names like J. Rhett Rushing and Kenneth W. Davis discuss folklore about monsters and the classic 'widow's revenge' tale. These works--and the people who produced them--represent the secret behind the history of the Texas Folklore Society, as well as its future.--Kenneth L. Untiedt

### **The Lost Secret of Speaking Perfect English**

Peter F. Bulmer, 2014-03 Do you want to learn The Lost Secret of Speaking Perfect English? The Moving Mouth Dictionary technique provides a very simple approach to perfecting English speaking and pronunciation. The book takes a down-to-earth approach for speaking clear English, as it breathes some fresh air into the stuffy corridors of academic learning. It is geared to help students and business people speak impressive and naturally clear English, taking much of the guessing out of pronunciation and spelling. English will become more of a physical activity,

rather than a cerebral academic subject. The key is in identifying and improving specific types of reverse and forward mouth movements, actions based on using simple vertical mouth movement notations that have simple associations with key phonetics sounds for specific letters. The technique's forward and reverse mouth movements combined with a natural English rhythm also helps trigger and access vocabulary and verbs, while aiding in word retention, fluency and auto correcting. The book features a dictionary of over 11,000 words, including some of the most difficult words in the English language, which have been broken down, putting these notations into mouthables. The process draws heavily on early humans' natural ability to howl and growl, using their mouths vertically. Hence, the lost connection between our near ancestors can aid our ability to speak clear English, an ability we have lost and need to rediscover. About the Author Originally from the Yorkshire Dales in England, Peter F. Bulmer developed his presentational skills as a marketing and export director traveling and selling to different cultures throughout the world. Now retired and based in Europe, he still coaches bankers, consultants, and marketing people in perfecting their English presentation and communication skills. *Global Entertainment Media* Tanner Mirrlees, 2013  
A critical cultural materialist introduction to the study of global entertainment media. In *Global Entertainment Media*, Tanner Mirrlees undertakes an analysis of the ownership, production, distribution, marketing, exhibition and consumption of global films and television shows, with an eye to political economy and cultural studies. Among other topics, Mirrlees examines: Paradigms of global entertainment media such as cultural imperialism and cultural globalization.

The business of entertainment media: the structure of capitalist culture/creative industries (financers, producers, distributors and exhibitors) and trends in the global political economy of entertainment media. The governance of global entertainment media: state and inter-state media and cultural policies and regulations that govern the production, distribution and exhibition of entertainment media and enable or impede its cross-border flow. The new international division of cultural labor (NICL): the cross-border production of entertainment by cultural workers in asymmetrically interdependent media capitals, and economic and cultural concerns surrounding runaway productions and co-productions. The economic motivations and textual design features of globally popular entertainment forms such as blockbuster event films, TV formats, glocalised lifestyle brands and synergistic media. The cross-cultural reception and effects of TV shows and films. The World Wide Web, digitization and convergence culture.

*Biofuel Production Technologies: Critical Analysis for Sustainability* Neha Srivastava, Manish Srivastava, P. K. Mishra, Vijai Kumar Gupta, 2020-03-23 Production and utilization of sustainable energy toward maintaining a clean environment is a major challenge. At the same time, the continued depletion of fossil fuels and the global dependency on non-renewable fuels is a chief concern. Moreover, the long-term economic and environmental issues associated with the high utilization of fossil fuel, such as global warming, are also important, particularly in the context of the predicted increase in the global population to around 5 billion by 2050. In recent years, researchers have been investigating alternative, renewable fuels to replace fossil fuels. Of the various options, biofuels are especially attractive due to their low production

costs and the fact that they are pollution free. Also known as transportation fuels, their energy is derived from biological resources or through the biological processes. Biofuels such as biohydrogen, biomethane, biogas, ethanol and butanol offer a number of advantages and can be economically produced from cellulosic biomass. As such, they can play a vital role in sustainably meeting future energy demands. Biofuels have the potential to become a global primary energy source, offering significant reductions in greenhouse gas emissions as well as opportunities to increase economic and social development in rural communities and reduce the problems associated with waste disposal. However, low yields and lack of process technology are some of the aspects that need to be addressed. This book offers an overview of existing biofuels and the technologies to solve the problems associated with their practical implementation. Evaluating the biofuel options and discussing the opportunities and risks in relation to resources, technologies, practices, markets and policy, it provides insights into the development of economically viable bioenergy industries.

Adaptive, tolerant and efficient composite structures Martin Wiedemann, Michael Sinapius, 2014-09-20 Composite structures are most efficient in performance and production cost when combined with smart materials making them adaptable to changing operational conditions. The specific production processes of composites offer the possibility to integrate more functions thus making the structure more valuable. Active functions can be realized by smart materials, e.g. morphing, active vibration control, active structure acoustic control or structure health monitoring. The foundation is a sound understanding of materials, design methods, design principles, production technologies and

adaptronics. Along the complete process chain this disciplines together deliver advanced lightweight solutions for applications ranging from mechanical engineering to vehicles, airframe and finally space structures. This book provides the scientific foundations as well as inspiring new ideas for engineers working in the field of composite lightweight structures.

*The Green Republic* Sterling Evans,2010-06-28  
With over 25 percent of its land set aside in national parks and other protected areas, Costa Rica is renowned worldwide as the green republic. In this very readable history of conservation in Costa Rica, Sterling Evans explores the establishment of the country's national park system as a response to the rapid destruction of its tropical ecosystems due to the expansion of export-related agriculture. Drawing on interviews with key players in the conservation movement, as well as archival research, Evans traces the emergence of a conservation ethic among Costa Ricans and the tangible forms it has taken. In Part I, he describes the development of the national park system and the grand contradiction that conservation occurred simultaneously with massive deforestation in unprotected areas. In Part II, he examines other aspects of Costa Rica's conservation experience, including the important roles played by environmental education and nongovernmental organizations, campesino and indigenous movements, ecotourism, and the work of the National Biodiversity Institute.

*Politics, Development and Security in Oceania*  
David Hegarty,Darrell Tryon,2013-04-01 French and Australian collaborative research in the humanities and the social sciences in the South Pacific has grown and intensified significantly over the past two decades, beginning with the international symposium Changing Identities in the

Pacific at the Dawn of the Twenty-First Century held at the Australian Embassy in Paris in 1997 ... In April 2006, another French-government sponsored international symposium, AGORA (Ateliers Gouvernance et Recherche Appliquée) was held at IRD (Institut de Recherche pour le Développement), Noumea, New Caledonia, major themes being governance and economic development, again bringing together Francophone and Anglophone scholars from France and the Pacific region. This was followed in October 2009 by two conjoint Francophone/Anglophone conferences, held at the IRD Centre in Noumea, Stability, Security and Development in Oceania, preceded by AGORA-2, an international conference on Anglophone research in the humanities and the social sciences in the Francophone Pacific, sponsored by the French Government and the Government of New Caledonia. The first of these conferences was sponsored by the French Fonds Pacifique and the State, Society and Governance Program at The Australian National University. An edited selection of presentations from this symposium constitutes the present volume.--Preface.

**Space-Age Acronyms** Reta C. Moser, 2012-12-06  
Acronym agglomeration is an affliction of the age, and there are acronym addicts who, in their weakness, find it impossible to resist them. More than once in recent months my peers have cautioned me about my apparent readiness to use not only acronyms, but abbreviations, foreign isms, codes, and other cryptic symbols rather than common, ordinary American words. Many among us, though, either have not received or have chosen to ignore such advice. As a consequence, what we write and speak is full of mystery and confusion. It is then for the reader and listener and for the writer and speaker that Reta C. Moser has compiled this guide. Its effective application to the art of communication is urged. Such use should help avoid

many of the misunderstandings involving terminology which occur daily. Although such misunderstandings are certainly crucial in humanistic and social situations, they are often of immediate import and the trigger to disaster in scientific, technical, and political situations. Some 15,000 acronyms and 25,000 definitions are provided (a 50- and 47 -percent increase over the 1964 edition!), with due credit to Miss Moser's diligence in making the compilation and with the acknowledgment that the acronymical phenomenon is very much with us. This edition, like the first, is certain to be of value to writers, librarians, editors, and others who must identify and deal with acronyms.

**Introductory Grammar of Amharic** Wolf Leslau, 2000  
This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a

free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

*Globalism, Nationalism, Tribalism* Paul James, 2006-04-20 'Paul James has written a magnificent account of the world's current condition, one that highlights the complexities and contradictions with which people, communities, and nations must contend and that does so in a compelling and creative style. Stressing the interaction between global and local forces, his writing style is lively and compelling as well as peppered with a wide range of citations, from Woman's Day to the Cambodian Daily (on the same page!)' - James N Rosenau, University Professor of International Affairs, The George Washington University *Globalism, Nationalism, Tribalism* establishes a new basis for understanding the changing nature of polity and community and offers unprecedented attention to these dominant trends. Paul James charts the contradictions and tensions we all encounter in an era of increasing globalization, from genocide and terrorism to television and finance capital. Globalism is treated as an uneven and layered process of spatial expansion, not simply one of disorder, fragmentation or rupture. Nor is it simply a force of homogenization. Nationalism is taken seriously as a continuing and important formation of contemporary identity and politics. James rewrites the modernism theories of the nation-state without devolving into the postmodernist assertion that all is invention or surface gloss. Tribalism is given the attention it has long warranted and is analyzed as a continuing and changing formation of social life, from the villages of Rwanda to the cities of the West. Theoretically adept and powerfully argued, this is the first comprehensive analysis that brings these crucial themes of contemporary life together.

*Functional Food and Human Health* Vibha Rani, Umesh C. S. Yadav, 2018-10-12 Global health and the increasing incidence of various diseases are a cause for concern, and doctors and scientists reason that the diet, food habits and lifestyle are contributing factors. Processed food has reduced the nutritional value of our diet, and although supplementing foods with various additives is considered an alternative, the long-term impact of this is not known. Many laboratories around the world are working to identify various nutritional components in our daily food and their effect on human health. These have been classified as Nutraceuticals or functional food, and they may have preventive and therapeutic effects in a number of pathologies associated with modern dietary habits and lifestyles. This book addresses various aspects of this issue, revitalizing the discussion and consolidating the latest research on nutritional and functional food and their effects in in-vitro, in-vivo and human clinical studies.

Impunity Michael Miklaucic, 2020-02-25 A serious and effective effort to meet the challenges of illicit power in the 21st century will require technology, global partnership, and an integrated, comprehensive campaign driven by international commitment and broad political will. Of the many important lessons that emerge from these essays the most important is to be skeptical of concepts that divorce conflict from its political and human nature, particularly those that promise fast, cheap victories through technology while ignoring the need to confront illicit power in war and transition.

Opuntia spp.: Chemistry, Bioactivity and Industrial Applications Mohamed Fawzy Ramadan, Tamer E. Moussa Ayoub, Sascha

Rohn,2021-09-27 The *Opuntia* fruits, commonly known as cactus pears or prickly pears, have been suggested by the Food and Agriculture Organization to be a promising and strategic crop in regions suffering from lack of water. In Mexico, India, South Africa, and the Mediterranean, the *Opuntia* fruits have become popular due to their nutritive value and health-promoting benefits, including antioxidant, antiulcerogenic and antiatherogenic traits and protective effects against LDL oxidation. Additionally, readily absorbable sugars, high vitamin C and mineral content, and a pleasant flavour make *Opuntia* tailor-made for novel foods. Due to their ecological advantages, high functional value, and health-related traits, *Opuntia* fruits can be highly exploited in different food processing applications. For instance, *Opuntia* cactus fruits are used for the preparation of juices and marmalades; *Opuntia* cactus plants are used to feed animals in African and Latin American countries; Peruvian farmers cultivate *Opuntia* cactus for growing the cochineal (*Dactylopius coccus*) insect and producing the natural dye carmine; and the commercial production of food and non-food products from *Opuntia* has been established in Mexico, USA and several Mediterranean countries. *Opuntia* spp.: Chemistry, Bioactivity and Industrial Applications creates a multidisciplinary forum of discussion on *Opuntia* cactus with special emphasis on its horticulture, post-harvest, marketability, chemistry, functionality, health-promoting properties, technology and processing. The text includes detailed discussion of the impact of traditional and innovative processing on the recovery of high-added value compounds from *Opuntia* spp. by-products. Later chapters explore the potential applications of *Opuntia* spp. in food, cosmetics and pharmaceutical products.
