Profiles in Operations Research Arjang A. Assad,Saul I. Gass,2011-06-28 Profiles in Operations Research: Pioneers and Innovators recounts the development of the field of Operations Research (OR), the science of decision

making. The book traces the development of OR from its military origins to a mature discipline that is recognized worldwide for its contributions to managerial planning and complex global operations. Over the past six decades, OR analyses have impacted our daily lives: when making an airline or hotel reservation, waiting in line at a bank, getting the correctly blended fuel at the gas station, and ensuring that the book you are holding arrived at its destination on time. OR originated in the late 1930s when British scientists from various disciplines joined Royal Air Force officers to determine the most effective way to employ new radar technology for intercepting enemy aircraft. During World War II, similar applied research groups were formed to study, test, and evaluate military operations on both sides of the Atlantic. Their work resulted in great improvements—OR helped the Allies win the war. The scientific field that emerged from these studies was called operational research in the U.K. and operations research in the U.S. Today, OR provides a broad and powerful science to aid decision making. Profiles describes the lives and contributions of 43 OR pioneers and innovators and relates how these individuals, with varying backgrounds and diverse interests, were drawn to the nascent field of OR. The profiles also describe how OR techniques and applications expanded considerably beyond the military context to find new domains in business and industry. In addition to their scientific contributions, these profiles capture the life stories of the individuals—interwoven with personal tales, vivid vignettes, family backgrounds, and views of the mission and future of OR. Collectively, the profiles recount the fascinating story of the growth and development of a field enriched by the convergence of different disciplines. The Editors: Arjang A. Assad is Dean of the School of Management, University at Buffalo, State University of New York. Saul I. Gass is Professor Emeritus, Department of Decision, Operations & Information Technologies, Smith School of Business, University of Maryland, College Park. From the Reviews Profiles In Operations Research: Pioneers and Innovators. Book Review by Nigel Cummings: U.K. OR Society's e-journal, Inside OR., Sept 2011. I can thoroughly recommend this book. I found it both enlightening and undeniably gripping, so much so in fact, you may find it difficult to put it down once you have commenced reading it. Arjang A. Assad and Saul I. Gass have created a masterwork which will serve to immortalise [sic] the pioneers of O.R. for many years to come. *For a list of all known typos, plus further discussion on the book, please visit <http://profilesinoperationsresearch.com>.

Backyard Fairies Phoebe Wahl, 2018-03-06 Fairies are real, and they're all around us! Award-winning author-illustrator Phoebe Wahl offers a fanciful and beautifully illustrated peek into the hidden world of fairies, sprites, and other magical creatures. A girl searches for fairies in her backyard and the woods beyond, following little clues and traces of magic. Fairies and other magical creatures can be found on every page, hidden among the flowers, trees and pebbles. But although readers can see them, the girl keeps searching, just one step behind... In the end, it is clear (both to the girl and readers) that there is magic all around, even when it's hidden in plain sight. Phoebe Wahl takes us deep into the world of fairies, and her vibrant, multi-textured woodland scenes are every bit as enchanting as the creatures therein. A gorgeously illustrated paean to imagination and the natural world. Delightful . . . This gently magical outing will appeal not only to longtime lovers of European

folklore, but also to fans of the popular fairy door phenomenon.--Kirkus Reviews

Music Scenes Andy Bennett, Richard A. Peterson, 2004 While more than 80 percent of the world's commercial music is controlled by four multinational firms, most music is made and enjoyed in diverse situations divorced from such corporate behemoths. These fourteen original essays examine the fascinating world of music scenes, those largely inconspicuous sites where clusters of musicians, producers, and fans explore their common musical tastes and distinctive lifestyle choices. Although most music scenes come and go with hardly a trace, they nevertheless give immense satisfaction to their participants, and a few - New York bop jazz, Merseybeat, Memphis rockabilly, London punk, Bronx hiphop - achieve fame and spur musical innovations. To date, serious study of the scenes phenomenon has focused mainly on specific music scenes while paying less attention to recurrent dynamics of scene life, such as how individuals construct and negotiate scenes to the various activities. This volume remedies that neglect. The editors distinguish between three types of scenes - local, translocal, and virtual - which provide the organizing framework for the essays. Aspects of local scenes, which are confined to specific areas, are explored through essays on Chicago blues, rave, karaoke, teen pop, and salsa. The section on translocal scenes, which involve the coming together of scattered local scenes around a particular type of music and lifestyle, includes articles on Riot Grrrls, goths, art music, and anarcho-punk. Aspects of virtual scenes, in which fans communicate via the internet, are illustrated using alternative country, the Canterbury sound, postrock, and Kate Bush fans. Also included is an essay that shows how the social conditions in places where jazz was made influenced that music's development.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

How to Make Adorable Baby Animal Dolls Jonni Good,2013-06 In this book the author shows you exactly how to make your own adorable baby animal collector's dolls, leading you through the entire process every step of the way. Your dolls won't cost much to make, and every doll will be an original, one-of-a-kind work of art. Since no two dolls ever come out exactly alike, each doll will have it's own personality and character. You won't have to learn how to make molds for the doll heads, because each one is hand-sculpted over a simple armature. You don't need a kiln, because you'll be using home-made air-dry clay instead of porcelain. The resulting heads are seamless, hollow, and surprisingly strong. The bodies and ears are made out of soft, huggable cotton velour, and the toes are sculpted with a few easy stitches. Adorable!

The Conspiracy Rhetoric of Mankind Paul J. Linke,2012-09-29 When we think we learned something new, we are quite proud of it. But it wears off quickly for an unknown reason. So, what is wrong with what we do? When you start to think about the things you learn, and what the reason or purpose actually is, then you have to wonder sometimes is it really something new we just learned. Because having in mind to learn something new can be quite exhausting at

times. Maybe we have to start to think about this in a different way, and take a different approach in discovering new things. It is like a treasure hunt, imagine that we are all pirates looking for an adventure or treasures. Obviously our life is about searching for something, but most of the time we don't even know what we are looking for. We do this quite instinctively, maybe we are preprogrammed in a way and we are not aware of it. But when you find out who we are, then everything seems to make sense. Our entire world (Universe) stands on myth and mythology (including our history), making us wonder if it is real. Let's look at life in a different way. Learn more about our history, maybe we can learn from old things our ancestors already knew, and then set that aside and try to find your own way. You most certainly will see things with different eyes. This is what our life is all about, it is a soul search where the experience we have along the way is the reward (treasure). In Australia the Aboriginal people are most likely a candidate for such an idea. They go on a regular Walkabout, which literally means looking for something. They might find something which can be worth bringing home as an idea for which the whole community can benefit from. This is what a walkabout is all about, looking for something which is useful, and has a value in the community. After all we are constantly occupied by making a living or providing for our needs. The westerners actually practice the same thing, we call them the Backpackers. People who go and see other parts of the world, enjoy the diversity and beauty of nature, as well as other cultures and traditions. Yes, we can learn something old, have a lot of fun and it can be quite rewarding. This book was taking shape, based on an ironic thought; How much knowledge there is, and we know so little. How come we know so little? We know all the most complicated things there can be, but we know very little of what life is about. What is the cause for all things? How does it all work? What is the reason? And last but not least; How do we fit into everything? Is it possible that we have taken valuable information from ancient Greek knowledge, but ignored one of their most important practices the philosophy of all things. Has everything to us become scientific or important because sciences can explain the real world. Have we forgotten that this real world we live in comes from a mystical source (something unseen). Something we call a different dimension because we can't possibly explain it. It is such an exotic source, that it would take a lot of ancient knowledge to discover the truth. Do you want to discover the truth? This book might have some answers.
