📖 **ACHTUNG-PANZER!** Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

📖 **JEONGMEE YOON** Bonnie Yochelso,2019 Why do girls love pink toys, and boys love blue ones? The fine arts photographer Jeongmee Yoon (*1969, Seoul) poses this question in her work, The Pink and Blue Project, for which she began photographing Korean and American girls and boys in their rooms in 2005. The gender-specific color schemes quickly established themselves as an overarching phenomenon, independent of cultural or ethnic background. Yoon's impressive portraits, for which she spent hours carefully arranging pink or blue objects, question these color codes and the consumer habits of both parents and children. They reveal the connections linking gender identity and social norms, consumer culture, and media. She continued this project by visiting the children years later and capturing how their favorite colors had changed. Jeongmee Yoon was awarded the ILWOO Foundation Prize for her project.

📖 **GRUNCH* OF GIANTS** R. Buckminster Fuller,1983-04-15 With the appearance of Grunch of Giants, R. Buckminster Fuller consummates his literary canon, his panoramic lifetime survey of all aspects of the responsibility of human beings for their own destiny. This book is a modern allegory - his long-gestated myth-of the villainy of capitalism and the fecklessness of classic economics. For Fuller, the academic discipline of economics is irrelevant since it derives from an invalid assumption of scarcity. In fact, he has long argued that future historians of our era may subsume our business practices as a branch of mythology; thus it is not surprising that the word economic appears nowhere in his text. Fuller's myth is no idle fairy tale, since he faces his question - the question of a technological imperative which only he could raise with the deadly seriousness of satire. That question is: Can our system of national political sovereignties and corporate profits survive the inevitable technology revolution required to obviate wars by effecting a worldwide rise in the standard of living. One of the functions of myth is to resolve contradictions in our culture. Grunch of Giants portrays the rising of multinational corporations in the paradoxical role of function both as the epitome of capitalistic selfishness and as the inadvertent vehicle for the dissolution of national political boundaries - the last deterrent to a one-world economy. The result is more subversive of the property and profit values of the capitalist system than anything dreamed of since Karl Marx. —E.J. Applewhite, collaborator with RBF on Synergetics and Synergetics 2, author of Cosmic Fishing: A Memoir of Working With R. Buckminster Fuller

📖 **THE AVRO SHACKLETON** Richard A. Franks,2005-10 The first in a series of detailed and well illustrated accounts of classic aircraft in service from the prototype to the few remaining preserved examples. The book contains over thirty-five specially commissioned accurate side, 4-view, and squadron badge illustrations in full color, with many previously unpublished photographs. A full listing of all airframes and their histories is also included.

📖 **DISABILITY INTERACTIONS** Catherine Holloway,Giulia Barbareschi,2022-05-31 Disability Interactions (DIX) is a new approach to combining cross-disciplinary methods and theories from human computer interaction (HCI), disability studies, assistive technology, and social development to co-create new technologies, experiences, and ways of working with disabled people. DIX focuses on the interactions people have with their technologies and the interactions which result because of technology use. A central theme of the approach is to tackle complex issues where disability problems are part of a system that does not have a simple solution. Therefore, DIX pushes researchers and practitioners to take a challenge-based approach, which enables both applied and basic research to happen alongside one another. DIX complements other frameworks and approaches that have been developed within HCI research and beyond. Traditional accessibility approaches are likely to focus on specific aspects of technology design and use without considering how features of large-scale assistive technology systems might influence the experiences of people with disabilities. DIX aims to embrace complexity from the start, to better translate the work of accessibility and assistive technology research into the real world. DIX also has a stronger focus on user-centered and participatory approaches across the whole value chain of technology, ensuring we design with the full system of technology in mind (from conceptualization and development to large-scale distribution and access). DIX also helps to acknowledge that solutions and approaches are often non-binary and that technologies and interactions that deliver value to disabled people in one situation can become a hindrance in a different context. Therefore, it offers a more nuanced guide to designing within the disability space, which expands the more traditional problem-solving approaches to designing for accessibility. This book explores why such a novel approach is needed and gives case studies of applications highlighting how different areas of focus—from education to health to work to global development—can benefit from applying a DIX perspective. We conclude with some lessons learned and a look ahead to the next 60 years of DIX.

📖 **STENBERG BROTHERS** Christopher Mount,Peter Kenez,Museum of Modern Art (New York, N.Y.),1997 The exhibition Stenberg Brothers: Constructing a Revolution in Soviet Design, organized by Christopher Mount, Assistant Curator in the Department of Architecture and Design, is the first critical survey of the work of these two seminal figures in the history of twentieth-century graphic design.

📖 **HAT PINS** E. Eckstein,2008-03-04 Hats replaced bonnets as headgear for women around the 1890s and hat pins were needed to secure the hats firmly; they were essential for the larger hats worn around 1910-12. The hat-pin industry expanded rapidly, producing pins of many materials, styles and qualities. Hat pins were necessary for everyday wear as well as for sports and motoring. Suffragettes used them as offensive weapons and were not allowed to wear them when they appeared in court. By-laws prohibited hat pins from being worn with protruding unprotected points and contemporary cartoons poked fun at their use.

📖 **VIRGIL FINLAY** Virgil Finlay,1975 Virgil Finlay had a life-long interest in -- ghoulies and ghosties and long leggety beasties. This great artist had a preoccupation with the fantastic and weird, and the myths and legends of antiquity fascinated him and were to become his models. When changing trends brought a decline in fantasy magazine art during the 1930s and 1940s, Finlay turned to the astrology magazines which gave him an opportunity to continue with his first love, fantasy art. Almost one hundred illustrations have been assembled for this book, including three color pieces. It was Finlay's belief that they were among his finest work, and it was a dream of his to see them collected in book form. With an introduction revealing much of his approach to the subject.
