**Papertoy Monsters** Brian Castleforte,2010-12-29 A breakthrough paper-folding book for kids—paper airplanes meet Origami meets Pokemon. Papertoys, the Internet phenomenon that's hot among graphic designers and illustrators around the world, now comes to kids in the coolest new book. Created and curated by Brian Castleforte, a graphic designer and papertoy pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia, Chile, even Jackson, Tennessee), Papertoy Monsters offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful and hip, combining the edginess of anime with the goofy fun of Uglydolls and other collectibles. Plus each character comes with its own back-story. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask. Yucky Chuck, the lunchbox creature born in the deepest depths of your school bag. Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the hairy grandpa monster with his very own moustache collection.

**Artists' Film (World of Art)** David Curtis,2021-10-05 Artists' Film offers a lucid, accessible account of artists' unique contribution to the art of the moving image in the twentieth and early twenty-first centuries. International in scope and accessibly written by a renowned authority on the subject, Artists' Film is an introductory guide to the exciting and expanding field of artists' film and an alternative history of the moving image, chronicling artists' ever-evolving fascination with filmmaking from the early twentieth century to now. From early pioneers to key artists of today, writer and curator David Curtis offers a vivid account of the many creators who have been inspired by the cinematic medium and who have felt compelled to interpret and respond to it in their own way. In doing so, Curtis discusses these artists' widely differing achievements, aspirations, theories, and approaches. Featuring over four hundred international moving-image makers and drawing on examples from across the arts, including experimental film, video, installation, and multimedia, this generously illustrated account offers an incomparable introduction to this continually evolving art form. A perfect read for anyone with an interest in the intersection of contemporary art and film.

**Interactive Art and Embodiment** Nathaniel Stern,2013-08-05 What is interactive art? Is this a genre? A medium? An art movement? Must a work be physically active to be classified as such, or do we interact when we sense and make sense? Is a switch-throw or link-click enough - I do this, and that happens - or must subjects and objects be confused over time? Is interaction multiple in its engagements (relational), or a one-to-one reaction (programmed)? Are interactive designs somehow more democratic and individualized than others, or is that merely a commercial strategy to sell products and ideas? This book argues that interactive art frames moving-thinking-feeling as embodiment; the body is addressed as it is formed, and in relation. Interactive installations amplify how the body's inscriptions, meanings, and matters unfold out, while the world's sensations, concepts, and matters enfold in. Interactive artwork creates situations that enhance, disrupt, and alter experience and action in ways that call attention to our varied relationships with and as both structure and matter. Nathaniel Stern's inspirational book, Interactive Art and Embodiment, outlines how new media has the ability to intervene in, and challenge, not only the construction of bodies and identities, but also the ongoing and emergent processes of embodiment, as they happen. It includes immersive descriptions of a significant number of interactive artworks and over 40 colour images. The theorists, artists, practitioners and curators discussed in this text include Brian Massumi, Christiane Paul, Sarah Cook, Beryl Graham, Kelli Fuery, Theodore Watson, William Kentridge, Char Davies, Stelarc, Janet Cardiff, Carlo Zanni, Tero Saarinen, Karen Barad, Daniel Rozin, Richard Schechner, Nicole Ridgway, Rebecca Schneider, Annie Sprinkle, Karen Finley, VALIE EXPORT, The Guerrilla Girls, Tegan Bristow, Brian Knepp, Anna Munster, Zach Lieberman, Golan Levin, Simon Penny, Camille Utterback, Jean-Luc Nancy, The Millefiore Effect, Nick Crossley, Mathieu Briand, Scott Snibbe, David Rokeby, José Gil, Erin Manning, Rafael Lozano-Hemmer, and Norah Zuniga Shaw Contents Acknowledgments Series Foreword Introduction: Art Philosophy Chapter 1: Digital is as Digital Does Chapter 2: The Implicit Body as Performance Chapter 3: A Critical Framework for Interactive Art Chapter 4: Body-Language Chapter 5: Social-Anatomies Chapter 6: Flesh-Space Chapter 7: Implicating Art Works In Production: Companion Chapter Bibliography Index

**Open Codes** Blanca Giménez,2022 Today we live in a globalized world, controlled and created by digital codes. From communication to transportation (of people, goods, and messages), everything is guided by codes that use electromagnetic waves and computers. With the?Open Codes. Living in Digital Worlds± exhibition, the ZKM Karlsruhe is once again addressing the subject of digitalization and the recording of the world through the binary code.0Everyone should have the chance to understand what lies behind today?s digital world. The exhibition will present artworks and scientific works based on digital as well as on analog codes. The works visualize and explain the complex dynamics of code, and the way in which they are increasingly shaping the way we live and perceive the world. 00Exhibition: ZKM - Zentrum für Kunst und Medien, Karlsruhe, Germany (19.10.2017 - 06.01.2019).

**Karin Sander - Gebrauchsbilder** Karin Sander,2011 Karin Sander's Patina Paintings are created at--and by--the site of their exhibition. Sander transports blank canvases to the exhibition venue and leaves them outside, unprotected, to accumulate the patina of their location as chance and the whims of nature determine. The results are delicate abstractions resembling the mark-making of John Cage or Cy Twombly. This handsome monograph records the series.

**The Amden Atelier, 1999-2015** Roman Kurzmeyer,2015 The mountain community of Amden am Walensee (Switzerland) was a place of social and artistic experiments as early as the beginning of the 20th century. In the last 15 years, many artists have been invited to exhibit in the Amden Atelier, a small farm, or to use the facilities for the production of a work of art. This publication includes all exhibitions and installations staged since 1999 and describes and discusses the individual art projects. The work is complemented by essays on the landscape, the place and its change of use to an exhibition space, on the curating concept and its development in recent years.

**Ausst. in Göppingen u.d.T.: Pietro Sanguineti - the center** Pietro Sanguineti,Oliver Zybok,2010 Pietro Sanguineti's language-oriented work evokes the bold aesthetic of advertising but also incorporates a variety of historical and contemporary artistic references, from Ren Magritte to Ken Lum. Using words as visual motifs, Sanguineti explores the interplay between these almost polar approaches. This monograph surveys Sanguineti's work in installation, video and sculpture in addition to his trademark verbal images.

**Ecological Aesthetics** Nathaniel Stern,2018-07-03 With this poetic and scholarly collection of stories about art, artists, and their materials, Nathaniel Stern argues that ecology, aesthetics, and ethics are inherently entwined, and together act as the cornerstone for all contemporary arts practices. An ecological approach, says Stern, takes account of agents, processes, thoughts, and relations. Humans, matter, concepts, things, not-yet-things, politics, economics, and industry are all actively shaped in, and as, their interrelation. And aesthetics are a style of, and orientation toward, thought - and thus action. Including dozens of color images, this book narrativizes artists and artworks - ranging from print to installation, bio art to community activism - contextualizing and amplifying our experiences and practices of complex systems and forces, our experiences and practices of thought. Stern, an artist himself, writes with an eco-aesthetic that continually unfurls artful tactics that can also be used in everyday existence.

**The Encyclopedia of Hammer Films** Chris Fellner,2019-07-31 This reference work contains entries on every film made by Hammer Films, a British studio renowned for its horror films of the 1950s, 60s, and 70s. In addition, entries on people—directors, writers, producers, etc.—who have worked with the studio, as well as the stars associated with the studio, notably Christopher Lee and Peter Cushing.

**Yul Brynner** Michelangelo Capua,2014-06-26 Known as the bald cowboy in The Magnificent Seven and the sexy, charismatic male lead in The King and I, Yul Brynner was a Hollywood paragon of masculinity. Beyond his distinctive appearance and distinguished acting career was a life of intrigue and concocted tales surrounding his youth. Born Youl Bryner in Russia, he played gypsy guitar and worked as a trapeze clown until a severe injury motivated him to pursue his interest in theater. This biography takes readers through Brynner's formative years in Russia, France and China and

describes his journey from sweeping stages in Parisian theaters to a versatile career in theater, television and film, reaching a stardom that began and ended with the classic Rodgers and Hammerstein musical *The King and I*. With accounts of his personal and professional successes and failures, the book includes his four marriages, his numerous and notorious affairs with such stars as Judy Garland, Joan Crawford and Ingrid Bergman, and his 1985 death from lung cancer. A filmography details his movies and plays, and appendices outline his work in documentaries, music and soundtracks, radio programs and television.

Net.art generator Cornelia Sollfrank,2004 The German artist, hacker and cyberfeminist Cornelia Sollfrank gained notoriety with her Net.Art Generator ([www.obn.org/generator](http://www.obn.org/generator)), which allows users to enter a few keystrokes and create a work of art. Sollfrank's real goal is to challenge the concept of authorship in an age where appropriation is as common as the click of a mouse, and this monograph provides a detailed discussion of one of the Net's pioneering artist/theorists.

*Writing About Architecture* Alexandra Lange,2012-02-29 Extraordinary architecture addresses so much more than mere practical considerations. It inspires and provokes while creating a seamless experience of the physical world for its users. It is the rare writer that can frame the discussion of a building in a way that allows the reader to see it with new eyes. *Writing About Architecture* is a handbook on writing effectively and critically about buildings and cities. Each chapter opens with a reprint of a significant essay written by a renowned architecture critic, followed by a close reading and discussion of the writer's strategies. Lange offers her own analysis using contemporary examples as well as a checklist of questions at the end of each chapter to help guide the writer. This important addition to the *Architecture Briefs* series is based on the author's design writing courses at New York University and the School of Visual Arts. Lange also writes a popular online column for *Design Observer* and has written for *Dwell*, *Metropolis*, *New York magazine*, and *The New York Times*. *Writing About Architecture* includes analysis of critical writings by Ada Louise Huxtable, Lewis Mumford, Herbert Muschamp, Michael Sorkin, Charles Moore, Frederick Law Olmsted, and Jane Jacobs. Architects covered include Marcel Breuer, Diller Scofidio + Renfro, Field Operations, Norman Foster, Frank Gehry, Frederick Law Olmsted, SOM, Louis Sullivan, and Frank Lloyd Wright.

*Infogothic* Alistair Hughes,2018-10-13 Everything you ever wanted to know about Hammer's horror films is contained in this incredible graphic guide. Charts, templates, diagrams and illustration take you through all the facts and figures. From the relative heights of *Frankenstein's Monster*, to the actors to have played *Dracula* ... no stone is left unturned in this compelling and fascinating look at the films which redefined 'Horror' for a generation.

SQM, the Quantified Home Space Caviar,2014 The way in which we live is changing under the influence of different factors - be they financial, environment of respective, technological or geopolitical nature, quickly. What was equated with home has change, the home has turned into a *Handeslware* whose value is measured in Quatdratmetern. 'SQM: The Quantified Home' is less concerned with the house as a physical , protective shell, it presents it as a complex universe of overlapping cultural references, daily rituals, practical needs, unexpressed wishes and aspirations which develop steadily and flow together in an architectural space. The book presents the fundamental changes in the perception of the home, evaluates relevant data, makes assumptions and shows a selection of houses and interiors - from Osama bin Laden's fortress to examples of living in the era of Airbnb. In essays by architects, designers, artists and theorists will examine how the space in which we live, has become recognisable and yet so foreign. 140 illustrations

**Disorder and the Disinformation Society** Jonathan Paul Marshall,James Goodman,Didar Zowghi,Francesca da Rimini,2015-04-17 This book is the first general social analysis that seriously considers the daily experience of information disruption and software failure within contemporary Western society. Through an investigation of informationalism, defined as a contemporary form of capitalism, it describes the social processes producing informational disorder. While most social theory sees disorder as secondary, pathological or uninteresting, this book takes disordering processes as central to social life. The book engages with theories of information society which privilege information order, offering a strong counterpoint centred on disinformation. *Disorder and the Disinformation Society* offers a practical agenda, arguing that difficulties in producing software are both inherent to the process of developing software and in the social dynamics of informationalism. It outlines the dynamics of software failure as they impinge on of information workers and on daily life, explores why computerized finance has become inherently self-disruptive, asks how digital enclosure and intellectual property create conflicts over cultural creativity and disrupt informational accuracy and scholarship, and reveals how social media can extend, but also distort, the development of social movements.

**Mainframe Experimentalism** Hannah Higgins,Douglas Kahn,2012-09-21 "The computer may now be seen as a 'universal machine,' but this has not always been the case. This substantial collection of essays and documents shows how artists, poets, musicians, filmmakers and other experimenters first discovered the computer, and began using it as their tool and medium. *Mainframe Experimentalism* is essential reading for anyone who wants to penetrate behind superficial clich  s about digital art and culture."—Erkki Huhtamo, author of *Illusions in Motion: A Media Archaeology of the Moving Panorama and Related Spectacles*. "Higgins' and Kahn's anthology is an indispensable resource for anyone interested in the impact of computer technology on creative production in the arts and literature in the 1960s and beyond. This superb collection presents the first truly international examination of this subject, demonstrating the fascinating collaborations and interchanges that occurred as artists, poets, musicians, and filmmakers explored the potential for new, impersonal forms of expression offered by 'mainframe experimentalism.' Here is the prehistory of the digital arts of today in a volume that is equally essential to the histories of the individual fields involved as well as to scholarship on art and technology in general."—Linda Dalrymple Henderson, author of *Duchamp in Context: Science and Technology in the Large Glass and Related Works*.
