With more than 3 million fans, TheDadLab has quickly become an online sensation by creating a solution for parents when they hear the dreaded 'I'm bored' complaint, and now, for the first time, Sergei Urban has transferred his most popular experiments to print in this beautifully illustrated and mind-blowing book! With 40 wonderful activities, including 15-never-before-posted, TheDadLab includes additional information not found on his online posts: each activity will feature a detailed explanation simplifying the information that stems from the fields of Science, Technology, engineering, and Mathematics (STEM) for a parent to help explain their curious child and answer the questions 'how' and 'why.'

Moosers' Train: the Origami Train Set J.C. Nolan,2013-10-22 Mooser's Train has inspired and challenged folders for nearly five decades. For the first five years after its creation the only existing documentation was a hand-written crease map with no instructions whatsoever. Later, in 1967, hand-written notes were added by Raymond McLain but it was still left up to the reader to decipher a folding sequence on their own. It was not until 25 years later that the notes became widely available and far more readable when Dr. Robert Lang reproduced clarified versions in his book Origami Design Secrets in its excellent chapter on box pleating. It was not until late 2012 when my friend Hank Simon generously arranged to have diagrams produced and made available for everyone. These pages make the model fun and approachable for folders of all ages!

Positive Pedagogy for Sport Coaching Richard Light, 2016-11-25 The concept of positive pedagogy has transformed the way we understand learning and coaching in sport. Presenting examples of positive pedagogy in action, this book is the first to apply its basic principles to individual sports such as swimming, athletics, gymnastics and karate. Using the game based approach (GBA) (an athlete-centred, inquiry-based method that involves game-like activities), this book demonstrates how positive pedagogy can be successfully employed across a range of sports and levels of performance, while also providing insight into coaches' experiences of this approach. Divided into three sections that focus on the development, characteristics and applications of positive pedagogy, it fills a gap in coaching literature by extending the latest developments of GBA to activities beyond team sports. It pioneers a way of coaching that is both efficient in improving performance and effective in promoting positive experiences of learning across all ages and abilities. *Positive Pedagogy for Sport Coaching: Athlete-centred coaching for individual sports* is invaluable reading for all sports coaching students as well as any practising coach or physical education teacher looking for inspiration.

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.
