The Mushroom at the End of the World Anna Lowenhaupt Tsing, 2017-09-19 What a rare mushroom can teach us about sustaining life on a fragile planet Matsutake is the most valuable mushroom in the world—and a weed that grows in human-disturbed forests across the northern hemisphere. Through its ability to nurture trees, matsutake helps forests to grow in daunting places. It is also an edible delicacy in Japan, where it sometimes commands astronomical prices. In all its contradictions, matsutake offers insights into areas far beyond just mushrooms and addresses a crucial question: what manages to live in the ruins we have made? A tale of diversity within our damaged landscapes, *The Mushroom at the End of the World* follows one of the strangest commodity chains of our times to explore the unexpected corners of capitalism. Here, we witness the varied and peculiar worlds of matsutake commerce: the worlds of Japanese gourmets, capitalist traders, Hmong jungle fighters, industrial forests, Yi Chinese goat herders, Finnish nature guides, and more. These companions also lead us into fungal ecologies and forest histories to better understand the promise of cohabitation in a time of massive human destruction. By investigating one of the world's most sought-after fungi, *The Mushroom at the End of the World* presents an original examination into the relation between capitalist destruction and collaborative survival within multispecies landscapes, the prerequisite for continuing life on earth.

My Search for Ramanujan Ken Ono, Amir D. Aczel, 2016-04-20 The son of a prominent Japanese mathematician who came to the United States after World War II, Ken Ono was raised on a diet of high expectations and little praise. Rebelling against his pressure-cooker of a life, Ken determined to drop out of high school to follow his own path. To obtain his father's approval, he invoked the biography of the famous Indian mathematical prodigy Srinivasa Ramanujan, whom his father revered, who had twice flunked out of college because of his single-minded devotion to mathematics. Ono describes his rocky path through college and graduate school, interweaving Ramanujan's story with his own and telling how at key moments, he was inspired by Ramanujan and guided by mentors who encouraged him to pursue his interest in exploring Ramanujan's mathematical legacy. Picking up where others left off, beginning with the great English mathematician G.H. Hardy, who brought Ramanujan to Cambridge in 1914, Ono has devoted his mathematical career to understanding how in his short life, Ramanujan was able to discover so many deep mathematical truths, which Ramanujan believed had been sent to him as visions from a Hindu goddess. And it was Ramanujan who was ultimately the source of reconciliation between Ono and his parents. Ono's search for Ramanujan ranges over three continents and crosses paths with mathematicians whose lives span the globe and the entire twentieth century and beyond. Along the way, Ken made many fascinating discoveries. The most important and surprising one of all was his own humanity.

The Technological System Jacques Ellul, 2018-06-11 Some 20 years after writing *The Technological Society*, Jacques Ellul realized how the totalistic dimensions of our modern technological milieu required an additional treatment of the topic. Writing amidst the rise of books in the 1970s on pollution, over-population, and environmental degradation, Ellul found it necessary, once again, to write about the global presence of technology and its far-

reaching effects. The Technological System represents a new stage in Ellul's research. Previously he studied technological society as such; in this book he approaches the topic from a systems perspective wherein he identifies the characteristics of technological phenomena and technological progress in light of system theory. This leads to an entirely new approach to what constitutes the most important event of our society which has decisive bearing on the future of our world. Ellul's analysis touches on all aspects of modern life, not just those of a scientific or technological order. In the end, readers are compelled to formulate their own opinions and make their own decisions regarding the way a technique-based value system affects every level of human life.

Matsutake Worlds Lieba Faier, Michael J. Hathaway, 2021-07-16 The matsutake mushroom continues to be a highly sought delicacy, especially in Chinese, Japanese, and Korean cuisine. Matsutake Worlds explores this mushroom through the lens of multi-species encounters centered around the matsutake's notorious elusiveness. The mushroom's success, the contributors of this volume argue, cannot be accounted for by any one cultural, social, political, or economic process. Rather, the matsutake mushroom has flourished as the result of a number of different processes and dynamics, culminating in the culinary institution we know today.

Studio Ghibli Colin Odell,Michelle Le Blanc,2009-09-01 The animations of Japan's Studio Ghibli are amongst the highest regarded in the movie industry. Their delightful films rank alongside the most popular non-English language films ever made, with each new eagerly-anticipated release a guaranteed box-office smash. Yet this highly profitable studio has remained fiercely independent, producing a stream of imaginative and individual animations. The studio's founders, long-time animators Isao Takahata and Hayao Miyazaki, have created timeless masterpieces. Although their films are distinctly Japanese their themes are universal—humanity, community, and a love for the environment. No other film studio, animation or otherwise, comes close to matching Ghibli for pure cinematic experience. All their major works are examined here, as well the early output of Hayao Miyazaki and Isao Takahata, exploring the cultural and thematic threads that bind these films together.

Rhetorics of Insecurity Zeynep Gambetti,Marcial Godoy-Anativia,2013-08-23 In Rhetorics of Insecurity, Zeynep

Gambetti and Marcial Godoy-Anativia bring together a select group of scholars to investigate the societal ramifications of the present-day concern with security in diverse contexts and geographies. The essays claim that discourses and practices of security actually breed insecurity, rather than merely being responses to the latter. By relating the binary of security/insecurity to the binary of neoliberalism/neoconservatism, the contributors to this volume reveal the tensions inherent in the proliferation of individualism and the concurrent deployment of techniques of societal regulation around the globe. Chapters explore the phenomena of indistinction, reversal of terms, ambiguity, and confusion in security discourses. Scholars of diverse backgrounds interpret the paradoxical simultaneity of the suspension and enforcement of the law through a variety of theoretical and ethnographic approaches, and they explore the formation and transformation of forms of belonging and exclusion. Ultimately, the volume as a whole aims to understand one crucial question: whether securitized neoliberalism effectively spells the end of political liberalism as we know it today. Zeynep Gambetti is Associate Professor of Political Theory at Bogazici University, Istanbul. Marcial Godoy-Anativia is Associate Director of the Hemispheric Institute of Performance and Politics at New York University, where he serves as coeditor of its online journal e-misférica.

Affective Health and Masculinities in South Africa Hans Reihling, 2020-04-03 Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

Happiness 6 Shuzo Oshimi,2017-12-19 A supernatural story of sexual awakening, growing up, and suburban vampirism, Happiness follows a dorky boy who is attacked by a girl in an alley. She sucks his blood and gives him a choice: life or death. He chooses life, but finds himself nearly overwhelmed by a new thirst and a fascination with the necks of his classmates... Praise for Flowers of Evil: A shockingly readable story that vividly--one might even say queasily--evokes the fear and confusion of discovering one's own sexuality. Recommended. -The Manga Critic A page-turning tale of sordid middle school blackmail. -Otaku USA Magazine By loving this manga I recognize what a sick and twisted individual I have become. While I can still say that I am not truly deviant, Flowers of Evil is a great reminder of my own thirst for power and my own personal corruption. -Otaku Champloo
