Naval Accidents, 1945-1988 William M. Arkin, Joshua Handler, 1989

Impacts of the Fukushima Nuclear Accident on Fish and Fishing Grounds Kaoru Nakata, Hiroya Sugisaki, 2015-07-10 This book presents the results from the Japanese Fisheries Research Agency's 3-year intensive monitoring of radionuclides in a variety of fish, plankton, benthos, and their living environments after the Fukushima Daiichi Nuclear Power Plant (FNPP) accident in March 2011. The book reveals the dynamics of contamination processes in marine and freshwater fish, mediated by the contamination of water, sediments, and food organisms; it also clarifies the mechanisms by which large variations in the level of contamination occurs among individual fish. Most importantly, the book includes a large amount of original measurement data collected in situ and for the first time assesses diffusion of radiocesium across the Pacific using both in situ data and a numerical simulation model. Also introduced are several new approaches to evaluate the impact of the release of radionuclides, including the measurement of radiation emission from an otolith section to identify the main period of contamination in fish. The FNPP accident represents a rare instance where the environmental radioactivity level was elevated steeply through atmospheric fallout and direct discharge of radioactive water into the sea over a short period of time. Replete with precise scientific data, this book will serve as an important resource for research in fields such as fishery science, oceanography, ecology, and environmentology, and also as a solid basis for protecting fisheries from damage resulting from harmful rumors among the general public.

Submarine Commander Paul R. Schratz, 2013-07-24 A fascinating personal memoir of underwater combat in World War II, told by a man who played a major role in those dangerous operations. Frank and beautifully written, Submarine Commander's breezy style and irrepressible humor place it in a class by itself. This book will be of lasting value as a submarine history by an expert and as an enduring military and political analysis. In early 1943 the submarine USS Scorpion, with Paul R. Schratz as torpedo officer, slipped into the shallow waters east of Tokyo, laid a minefield, and made successful torpedo attacks on merchant shipping. Schratz participated in many more patrols in heavily mined Japanese waters as executive officer of the Sterlet and the Atule. At war's end he participated in the Japanese surrender, aided the release of American POWs, and had a key role in the disarming of enemy suicide submarines. He then took command of the revolutionary new Japanese submarine I-203 and returned it to Pearl Harbor. But this was far from the end of Schratz's submarine career. In 1949 he commissioned the ultramodern USS Pickerel, the most deadly submarine then afloat, and set a world's record in a 21-day, 5,200-mile submerged passage from Hong Kong to Honolulu. With the outbreak of the Korean War, the Pickerel was immediately sent to Korea to participate in secret intelligence operations only recently declassified and never before revealed in print. Schratz's broad military experience makes this a far from ordinary memoir.

Education, Human Rights and Peace in Sustainable Development Maigul Nugmanova, Heimo Mikkola, Alexander Rozanov, Valentina Komleva, 2020-11-19 The aim of sustainable development is to balance our economic, environmental and social needs, allowing prosperity for current and future generations. Countries must be allowed to meet their basic needs of employment, food, energy, water and sanitation. There is a clear relationship between the three topics of the book: right to education has been recognized as a human right - education has a role in peace-building. Additionally, education, human rights and peace have a significant role in sustainable development. The United Nations have defined a broad range of internationally accepted rights, including civil, cultural, economic, political and social rights. However, this book demonstrates that there are still people and nations not respecting the Universal Declaration of Human Rights. Chapters from Brazil, Cameroon, Ethiopia, Kazakhstan, Israel, Peru, Russia and South-Africa cover topics like civil war, human abuses,

the vulnerability of indigenous people, abortion, epilepsy, food security, lack of health equities in maternal and child health, and democracy or lack of it. We sincerely hope that this book will contribute to the joint pursuit of humanity to make the world better after we all get over the coronavirus pandemic.

A Bowl for a Coin William Wayne Farris, 2021-04-30 A Bowl for a Coin is the first book in any language to describe and analyze the history of all Japanese teas from the plant's introduction to the archipelago around 750 to the present day. To understand the triumph of the tea plant in Japan, William Wayne Farris begins with its cultivation and goes on to describe the myriad ways in which the herb was processed into a palatable beverage, ultimately resulting in the wide variety of teas we enjoy today. Along the way, he traces in fascinating detail the shift in tea's status from exotic gift item from China, tied to Heian (794-1185) court ritual and medicinal uses, to tax and commodity for exchange in the 1350s, to its complete nativization in Edo (1603-1868) art and literature and its eventual place on the table of every Japanese household. Farris maintains that the increasing sophistication of Japanese agriculture after 1350 is exemplified by tea farming, which became so advanced that Meiji (1868-1912) entrepreneurs were able to export significant amounts of Japanese tea to Euro-American markets. This in turn provided the much-needed foreign capital necessary to help secure Japan a place among the world's industrialized nations. Tea also had a hand in initiating Japan's "industrious revolution": From 1400, tea was being drunk in larger quantities by commoners as well as elites, and the stimulating, habit-forming beverage made it possible for laborers to apply handicraft skills in a meticulous, efficient, and prolonged manner. In addition to aiding in the protoindustrialization of Japan by 1800, tea had by that time become a central commodity in the formation of a burgeoning consumer society. The demand-pull of tea consumption necessitated even greater production into the postwar period—and this despite challenges posed to the industry by consumers' growing taste for coffee. A Bowl for a Coin makes a convincing case for how tea—an age-old drink that continues to adapt itself to changing tastes in Japan and the world—can serve as a broad lens through which to view the development of Japanese society over many centuries.

Society 5.0 Hitachi-UTokyo Laboratory (H-UTokyo Lab.), 2020-05-29 This open access book introduces readers to the vision on future cities and urban lives in connection with "Society 5.0", which was proposed in the 5th Basic Science and Technology Plan by Japan's national government for a technology-based, human-centered society, emerging from the fourth industrial revolution. The respective chapters summarize the findings and suggestions of joint research projects conducted by H-UTokyo Lab. Through the research collaboration and discussion, this book explores the future urban lives under the concept of "Society 5.0", characterized by the key phrases of data-driven society, knowledge-intensive society, and non-monetary society, and suggests the directionality to which the concept should aim as Japan's technology-led national vision. Written by Hitachi's researchers as well as academics from a wide range of fields, including engineering, economics, psychology and philosophy at The University of Tokyo, the book is a must read for members of the general public interested in urban planning, students, professionals and researchers in engineering and economics.

Edo Culture Kazuo Nishiyama, 1997-04-01 Nishiyama Matsunosuke is one of the most important historians of Tokugawa (Edo) popular culture, yet until now his work has never been translated into a Western language. Edo Culture presents a selection of Nishiyama's writings that serves not only to provide an excellent introduction to Tokugawa cultural history but also to fill many gaps in our knowledge of the daily life and diversions of the urban populace of the time. Many essays focus on the most important theme of Nishiyama's work: the seventeenth to nineteenth centuries as a time of

appropriation and development of Japan's culture by its urban commoners. In the first of three main sections, Nishiyama outlines the history of Edo (Tokyo) during the city's formative years, showing how it was shaped by the constant interaction between its warrior and commoner classes. Next, he discusses the spirit and aesthetic of the Edo native and traces the woodblock prints known as ukiyo-e to the communal activities of the city's commoners. Section two focuses on the interaction of urban and rural culture during the nineteenth century and on the unprecedented cultural diffusion that occurred with the help of itinerant performers, pilgrims, and touring actors. Among the essays is a delightful and detailed discourse on Tokugawa cuisine. The third section is dedicated to music and theatre, beginning with a study of no, which was patronized mainly by the aristocracy but surprisingly by commoners as well. In separate chapters, Nishiyama analyzes the relation of social classes to musical genres and the aesthetics of kabuki. The final chapter focuses on vaudeville houses supported by the urban masses.

Snow in the Tropics Thomas Taro Lennerfors, Peter Birch, 2019 Snow in the Tropics offers the first comprehensive history of the independent reefer operators, companies that are dedicated to transport refrigerated products by ship, from the early 20th century to the present.

China Made Karl Gerth, 2020-05-11 "Chinese people should consume Chinese products!" This slogan was the catchphrase of a movement in early twentieth-century China that sought to link consumption and nationalism by instilling a concept of China as a modern "nation" with its own "national products." From fashions in clothing to food additives, from museums to department stores, from product fairs to advertising, this movement influenced all aspects of China's burgeoning consumer culture. Anti-imperialist boycotts, commemorations of national humiliations, exhibitions of Chinese products, the vilification of treasonous consumers, and the promotion of Chinese captains of industry helped enforce nationalistic consumption and spread the message—patriotic Chinese bought goods made of Chinese materials by Chinese workers in factories owned and run by Chinese. In *China Made*, Karl Gerth argues that two key forces shaping the modern world—nationalism and consumerism—developed in tandem in China. Early in the twentieth century, nationalism branded every commodity as either "Chinese" or "foreign," and consumer culture became the place where the notion of nationality was articulated, institutionalized, and practiced. Based on Chinese, Japanese, and English-language archives, magazines, newspapers, and books, this first exploration of the historical ties between nationalism and consumerism reinterprets fundamental aspects of modern Chinese history and suggests ways of discerning such ties in all modern nations.

Alien Capital Iyko Day, 2016-03-11 In *Alien Capital* Iyko Day retheorizes the history and logic of settler colonialism by examining its intersection with capitalism and the racialization of Asian immigrants to Canada and the United States. Day explores how the historical alignment of Asian bodies and labor with capital's abstract and negative dimensions became one of settler colonialism's foundational and defining features. This alignment allowed white settlers to gloss over and expunge their complicity with capitalist exploitation from their collective memory. Day reveals this process through an analysis of a diverse body of Asian North American literature and visual culture, including depictions of Chinese railroad labor in the 1880s, filmic and literary responses to Japanese internment in the 1940s, and more recent examinations of the relations between free trade, national borders, and migrant labor. In highlighting these artists' reworking and exposing of the economic modalities of Asian racialized labor, Day pushes beyond existing approaches to settler colonialism as a Native/settler binary to formulate it as a dynamic triangulation of Native, settler, and alien populations and positionalities.

Placing Empire Kate McDonald, 2017-08-01 A free ebook version of this title is available through

Luminos, University of California Press’s Open Access publishing program. Visit www.luminosoa.org to learn more. *Placing Empire* examines the spatial politics of Japanese imperialism through a study of Japanese travel and tourism to Korea, Manchuria, and Taiwan between the late nineteenth century and the early 1950s. In a departure from standard histories of Japan, this book shows how debates over the role of colonized lands reshaped the social and spatial imaginary of the modern Japanese nation and how, in turn, this sociospatial imaginary affected the ways in which colonial difference was conceptualized and enacted. The book thus illuminates how ideas of place became central to the production of new forms of colonial hierarchy as empires around the globe transitioned from an era of territorial acquisition to one of territorial maintenance.

Attu John Haile Cloe, United States. National Park Service, 2017 The Battle of Attu, which took place from 11-30 May 1943, was a battle fought between forces of the United States, aided by Canadian reconnaissance and fighter-bomber support, and the Empire of Japan on Attu Island off the coast of the Territory of Alaska as part of the Aleutian Islands Campaign during the American Theater and the Pacific Theater and was the only land battle of World War II fought on incorporated territory of the United States. It is also the only land battle in which Japanese and American forces fought in Arctic conditions. The more than two-week battle ended when most of the Japanese defenders were killed in brutal hand-to-hand combat after a final banzai charge broke through American lines.
