Raising Red Flags N.R. Jenzen-Jones, Jonathan Ferguson, 2014-11-18 This report examines the significant range of arms and munitions carried and employed throughout the conflict by armed individuals on all sides. It also examines, somewhat less extensively, the range of armoured vehicles and aircraft observed in the conflict. This report examines over 100 distinct weapons systems, over 60 different types of munitions, and over 70 different models of armoured fighting vehicles, as well as miscellaneous associated materiel, in the context of the ongoing conflict in Ukraine. Particular attention is paid to items which may indicate flows of arms and munitions into and within the affected areas of Ukraine. Beginning with an assessment of the arms and munitions employed during the initial unrest in Kiev, in February 2012, the report documents relevant materiel up until the time of publication

Spacecraft Trajectory Optimization Bruce A. Conway, 2010-08-23 This is a long-overdue volume dedicated to space trajectory optimization. Interest in the subject has grown, as space missions of increasing levels of sophistication, complexity, and scientific return - hardly imaginable in the 1960s - have been designed and flown. Although the basic tools of optimization theory remain an accepted canon, there has been a revolution in the manner in which they are applied and in the development of numerical optimization. This volume purposely includes a variety of both analytical and numerical approaches to trajectory optimization. The choice of authors has been guided by the editor's intention to assemble the most expert and active researchers in the various specialities presented. The authors were given considerable freedom to choose their subjects, and although this may yield a somewhat eclectic volume, it also yields chapters written with palpable enthusiasm and relevance to contemporary problems.

SOG John L. Plaster, 2022-05-19 A new edition of this classic illustrated history of the operations and operatives of MACV-SOG in the Vietnam War. In 1972 the U.S. military destroyed all known photos of the top-secret Studies and Observations Group, with the intention that details could never be made public. But unknown to those in charge, SOG veterans had brought back with them hundreds of photographs of SOG in action and would keep them secret for more than three decades. In this new edition of *SOG: A Photo History*, more than 700 irreplaceable photos bring to life the stories of SOG legends Larry Thorne, Bob Howard, Dick Meadows, George Sisler, Q and others, and document what really happened deep inside enemy territory: Operation Tailwind, the Son Tay raid, SOG's defense of Khe Sanh, Hatchet Force operations, Bright Light rescues, HALO insertions, string extractions, SOG's darkest programs and much more.

SOG John L. Plaster, 2019-01-01 John Plaster's riveting account of his covert activities as a member of a special operations team during the Vietnam War is "a true insider's account, this eye-opening report will leave readers feeling as if they've been given a hot scoop on a highly classified project" (Publishers Weekly). Code-named the Studies and Observations Group, SOG was the most secret elite US military unit to serve in the Vietnam War—so secret its very existence was denied by the government. Composed entirely of volunteers from such ace fighting units as the Army Green Berets, Air Force Air Commandos, and Navy SEALs, SOG took on the most dangerous covert

assignments, in the deadliest and most forbidding theaters of operation. In SOG, Major John L. Plaster, a three-tour SOG veteran, shares the gripping exploits of these true American warriors in a minute-by-minute, heartbeat-by-heartbeat account of the group's stunning operations behind enemy lines—penetrating heavily defended North Vietnamese military facilities, holding off mass enemy attacks, launching daring missions to rescue downed US pilots. Some of the most extraordinary true stories of honor and heroism in the history of the US military, from sabotage to espionage to hand-to-hand combat, Plaster's account is "a detailed history of this little-known aspect of the Vietnam War...a worthy act of historical rescue from an unjustified, willed oblivion" (The New York Times).

Rigby Silvio Calabi, Steve Helsley, Roger Sanger, 2012-02 Whether you were a sportsman, civil servant, subaltern, or tea planter, you wanted a good rifle if you were headed out to the colonies. From the height of British imperialism in the eighteenth and nineteenth centuries through its demise in Asia, Africa, and beyond in the twentieth, John Rigby & Co., an elite cadre of gunmakers working at the heart of Britain's empire, crafted some of the finest sporting rifles and guns ever made. Thus begins this fascinating story of John Rigby & Co., which details the legendary exploits of famous Rigby owners Jim Corbett, W.D.M. Bell, Field Marshall Mannerheim, and others. Rigby's story is the story of colonial adventure, of the world's most famous big-game hunters and their rifles. In *Rigby: A Grand Tradition*, authors Calabi, Helsley, and Sanger bring Rigby owners Jim Corbett, W.D.M. Bell, Field Marshal Mannerheim, the Maharana of Udaipur, and others to life in rich detail. Extensively illustrated and including a thorough treatment of the development of the technology behind Rigby rifles and ammunition, this book provides substantial insight into the people, adventures, and rifles behind big game hunting in the early 20th century.

Secret Commandos John L. Plaster, 2018-10-16 Major John L. Plaster recalls his remarkable covert activities as a member of a special operations team during the Vietnam War in a "comprehensive, informative, and often exciting...account of an important part of the overall Vietnam tragedy" (The New York Times). Before there were Navy SEALs, there was SOG. Short for "Studies and Operations Group," it was a secret operations force in Vietnam, the most highly decorated unit in the war. Although their chief mission was disrupting the main North Vietnamese supply route into South Vietnam, SOG commandos also rescued downed helicopter pilots and fellow soldiers, and infiltrated deep into Laos and Cambodia to identify bombing targets, conduct ambushes, mine roads, and capture North Vietnamese soldiers for intelligence purposes. Always outnumbered, they matched wits in the most dangerous environments with an unrelenting foe that hunted them with trackers and dogs. Ten entire teams disappeared and another fourteen were annihilated. This is the dramatic, page-turning true story of that team's dedication, sacrifice, and constant fight for survival. In the "gripping" (Publishers Weekly) *Secret Commandos*, John Plaster vividly describes these unique warriors who gave everything fighting for their country—and for each other.

The Craft of Scientific Presentations Michael Alley, 2006-05-17 This timely and hugely practical work provides a

score of examples from contemporary and historical scientific presentations to show clearly what makes an oral presentation effective. It considers presentations made to persuade an audience to adopt some course of action (such as funding a proposal) as well as presentations made to communicate information, and it considers these from four perspectives: speech, structure, visual aids, and delivery. It also discusses computer-based projections and slide shows as well as overhead projections. In particular, it looks at ways of organizing graphics and text in projected images and of using layout and design to present the information efficiently and effectively.

Conceptualizing the Regulatory Thicket Shen Wei, 2020-10-18 This book examines the regulatory framework, regulatory objectives, regulatory logics, regulatory instruments, regulatory failures, and regulatory responses in China's financial market after the global financial crisis. The book provides an in-depth analysis of China's contemporary financial regulatory system, focusing on risks, regulation, and policies in practice. By drawing on public and private interest theories relating to financial regulation, the book contends that the controlled development of the banking sector, and the financial sector generally, has transformed China's banks into more market-oriented institutions and increased public sector growth. However, China's financial market and financial regulation have some inherent weaknesses and deficiencies. This book also offers insights into how this can be improved or adapted to minimize systemic risks in China's financial sector. This book tries to prove that financial regulation is not just a vehicle for maintaining efficient financial markets but a primary tool through which the Chinese government achieves its political and economic objectives. More fundamentally, according to the law and finance theory, strong market and vibrant judicial systems are needed to further modernize China's financial markets and market economy. The book will be a useful reference for anyone interested in learning from the Chinese experience.

Optical Design for Biomedical Imaging Rongguang Liang, 2010 Designing an efficient imaging system for biomedical optics requires a solid understanding of the special requirements of the optical systems for biomedical imaging and the optical components used in the systems. However, a lack of reference books on optical design (imaging and illumination) for biomedical imaging has led to some inefficient systems. This book fills the gap between biomedical optics and optical design by addressing the fundamentals of biomedical optics and optical engineering, and biomedical imaging systems. The first half provides a brief introduction to biomedical optics and then covers the fundamentals of optics, optical components, light sources, detectors, optical imaging system design, and illumination system design. This also includes important issues related to biomedical imaging, such as autofluorescence from optical materials. The second half of the text covers various biomedical imaging techniques and their optical systems, along with design examples.
