Guns of Special Forces 2001 - 2015 Leigh Neville,2016-03 In the years since 9/11 Special Forces of many nations have been in almost constant action in covert, high risk operations around the globe. These include the two long conflicts in Iraq and Afghanistan, fighting nationalist insurgents and jihadist terrorists, as well as other lesser known operations. The weapons used by SF are a constant source of interest and speculation, as are SF training, methods and vehicles. The armories of these elite units have developed rapidly to meet their demands and the ever more sophisticated threat. They include for example suppressed piston-driven carbines, programmable grenade launchers that airburst behind hidden enemy and sniper rifles of extreme accuracy and range. This highly researched book gives the reader a privileged insight into this secret world exploring the custom-built weapons that operators carry on capture/kill missions in the 21st Century.

acts of violence were both individual and collective. In the midst of this explosive atmosphere, cross-border conflict between Israel and Lebanon intensified, culminating in Operation Peace for Galilee the invasion of Lebanon. This book offers a day-by-day account of the invasion and the subsequent siege of Beirut, an operation that resulted in both the PLO and Israel claiming victory. Numerous photographs and colour plates portray the uniforms and equipment of the Israeli, Palestinian and Multi-National forces.

The M1 Carbine Leroy Thompson, 2011-11-20 In 1938 the US Chief of Infantry requested that the Ordnance Department develop a carbine to be used by service and support troops, artillerymen, machine-gun crews, tankers, mortar crews and other troops not needing the power of the M1 Garand rifle. The development of this new weapon was given an added impetus by Germany's successful use of airborne and glider troops early on in World War II. This caused a fear amongst US officers that troops normally considered 'behind the lines' personnel might have to fight elite German troops and would therefore require a more effective weapon than their standard pistols. The resulting M1 Carbine was a not a shortened version of the standard service rifle but instead a brand-new design chambering a new cartridge. Eventually numerous manufacturers would combine to produce over six million M1 Carbines before the end of the war. This book charts the complete story of the weapon, from its design, to its operational history and its impact upon warfare.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

The FN Minimi Light Machine Gun Chris McNab, 2017-02-23 In 1974, renowned Belgian arms company Fabrique Nationale brought out a ground-breaking new light machine gun, the Minimi. Its success has been meteoric, arming more than 45 countries around the world. The Minimi offers the ultimate in portable firepower. Firing the high-velocity 5.56×45mm round, the Minimi is a gas-operated, lightweight, belt- or magazine-fed weapon, able to burn through cartridges at a cyclical rate of up to 1,150 rounds per minute, making it the weapon of choice for fire support at squad level. This study uses gripping first-hand accounts and striking combat photographs, following the Minimi to war zones such as Iraq and Afghanistan. It tracks its design and development, as well as investigating what has made it so compelling a choice for armed forces around the world for more than 40 years.

Weaponomics: the global market for assault rifles Phillip Killicoat,2007 Abstract: This paper introduces the first effort to quantitatively document the small arms market by collating field reports and journalist accounts to produce a cross-country time-series price index of Kalashnikov assault rifles. A model of the small arms market is developed and empirically estimated to identify the key determinants of assault rifle prices. Variables which proxy the effective height of trade barriers for illicit trade are consistently significant in determining weapon price variation. When controlling for other factors, the collapse of the Soviet Union does not have as large an impact on weapon prices as is generally believed.

**The Golden Spurs of Kortrijk** Randall Fegley,2010-06-28 The Franco-Flemish region of medieval Flanders was a locus of important trade routes in the 13th and 14th centuries. Located in a prime position between the Holy Roman Empire and the North Sea (present-day northern Belgium), the urban centers of the region were surpassed in population only by the city-states of central and northern Italy. This positioning afforded the Flemish citizens of the region great prosperity and they formed guilds to protect their rights, regulate their working hours and standardize their wages. These guilds produced a cohesive unit of people eager to retain the rights they had gained. In 1302, French cavalry faced the determined Flemish soldiers on foot at Kortrijk (Courtrai). This book analyzes the battle that ensued, its origins, consequences and legacy. It also examines the everyday lives of the inhabitants of Flanders; urban dwellers, knights, nobles, women and others. This is the first major English-language study of the historic 14th century battle between the French and the Flemish, a conflict whose repercussions linger in modern Belgium. Instructors considering this book for use in a course may request an examination copy here.
