Bob Cashner

Fg42 Jeff John,2022-02-04 The 2nd Edition of FG42 expands on the 1st Edition by including the early Type I as well as the original Type II in a further exploration of Germany's groundbreaking FG42. This full-auto machine rifle took the primary infantry rifle from a slow-firing pre-1900 bolt-action-even beyond the U. S. Army's fast-firing M1 Garand-to a high-capacity, select-fire machine rifle capable of firing 900 rounds per minute while weighing the same as either the M1 or K98k. The FG42's amazingly brief development includes some prescient aspects of optics capability and its use of a discarded aircraft sight at first. One major influence in the FG42 design was that of the American Johnson Light Machine Gun (a pre-war inspiration), with the heart of America's LMG Lewis Gun as the operating system! Too few FG42s were made too late in the war to have much impact. And the battlefield superiority the FG42 offered was lost on post-war arms designers worldwide who ignored its valuable lessons. With existing originals selling in the six-figure range, two well-made semi-auto reproductions give an idea of how well this rifle could have been had it not been hampered by wartime pressure on raw materials causing redesigns, substitutions and quality control issues. This work on the FG42 is written for arms enthusiasts, reenactors and students of the Second World War. Included is a thorough evaluation with an in-depth shooting review of the SMG Guns Type I and Type II semi-auto replicas of these remarkable rifles. Test and evaluation data includes factory ammo and handloaded ammo, a complete, fully illustrated disassembly/reassembly guide of both rifles, as well as more than 100 full color photos of the SMG replica illustrated with a wide variety of reproduction and original accoutrements that make this rifle at home in any WWII collection. Also included are B&W period photos of the arm in combat use from Germany's Bundesarchiv. View sample pages in Amazon Preview or read illustrated sample chapters free at ArtInArmsPress.com.

The FN FAL Battle Rifle Bob Cashner,2013-08-20 Of all the infantry small arms developed during World War II, one that generated the most interest was the German 'assault rifle', the StG 44 Sturmgewehr. This innovative weapon fired an intermediate cartridge much more powerful and long-ranged than the standard pistol rounds used in submachine guns, but smaller and lighter than a full-size 7.92mm rifle round, producing less recoil and enabling the soldier to carry more ammunition. The StG 44 and the Soviet weapon it inspired, the AK-47 in 7.62x39mm calibre, could still effectively and accurately engage targets on semi-automatic out to 300m, but when close-range firepower was needed could fire on full-automatic like a submachine gun. In the West, the NATO countries looked hard at new weapons to upgrade their own infantry arsenals and counter the AK-47. Although British and other designers developed their own prototype assault rifles chambered for intermediate cartridges, the Americans adopted the M14 'battle rifle' and forced a common full-length calibre, 7.62x51mm, on their NATO allies. Fabrique Nationale of Belgium designed a new military rifle, the Fusil Automatique Léger or FAL, as an assault rifle using a true intermediate cartridge, but this innovative weapon also proved to be a successful battle rifle when adapted for the full-length NATO round. It was soon adopted by the military and police forces of no fewer than 93 nations around the globe, from the United Kingdom to Israel, and was manufactured under licence on every populated continent. It remains in production to this day and is regarded by most as the quintessential postwar battle rifle. In fact, the FAL dominated the militaries of the West to such a degree that its nickname became the Right Arm of the Free World. Roughly comparable in terms of size and weight to other contemporary battle rifles such as the American M14 and the German Heckler & Koch G3, the FAL proved to be reliable and well loved by its users. It performed reliably in a wide variety of small wars and insurgencies, in the hands of professional soldiers as well as those of hastily trained conscripts and essentially untrained guerrillas. It proved itself in harsh environments as varied as the cold, wet, featureless Falkland Islands in the South Atlantic, the snow and ice of Norway and northern Canada, the deep jungles of Vietnam and Malaya, the deserts of the Middle East, and the streets of Belfast. While thankfully never called upon for its original intent - facing down hordes of mechanized Soviet infantry on the plains of Western Europe - the FAL fulfilled every role it was asked to perform and remains a viable and well-respected weapon to this day.
