Illerup Ådal Jørgen Ilkjær,2002 At the same time that Emperor Septimius Severus was ordering the building of his triumphal arch in Rome, around 203 AD, a large fleet from Norway sailed through Kattegat. Nithijo, Wagnijo, Swarta and 1000 other warriors attacked Eastern Jutland, but were decisively defeated. Clothes were shredded and armour was torn apart wrote the Spanish priest and historian Orosius around 400 AD. We can add that shields were smashed, swords were bent and broken and horse harnesses were chopped into pieces. Then the wrecked spoils of war were sacrificed in a lake at Illerup. This book gives an account of the excavation and the detailed studies arising from one of the most impressive archaeological finds of our time, and the reader gains an insight into previously unknown and very surprising aspects of life in the Iron Age. Alesia 52 BC Nic Fields,2014-06-20 In 52 BC Caesar's continued strategy of annihilation had engendered a spirit of desperation, which detonated into a revolt of Gallic tribes under the leadership of the charismatic young Arvernian noble Vercingetorix. Major engagements were fought at Noviodunum, Avaricum, and Gergovia, with the last action being the most serious reverse that Caesar faced in the whole of the Gallic War. However, Vercingetorix soon realized that he was unable to match the Romans in pitched battle. Taking advantage of the tribesmen's superior knowledge of their home territory, Vercingetorix began a canny policy of small war and defensive manoeuvres, which gravely hampered Caesar's movements by cutting off his supplies. For Caesar it was to be a grim summertime – his whole Gallic enterprise faced disaster. In the event, by brilliant leadership, force of arms, and occasionally sheer luck, Caesar succeeded in stamping out the revolt in a long and brutal action culminating in the siege of Alesia. Vercingetorix finally surrendered and Alesia was to be the last significant resistance to the Roman will. Never again would a Gallic warlord independent of Rome hold sway over the Celts of Gaul.

Lake Trasimene 217 BC Nic Fields,2017-01-26 Following Hannibal's crushing victory at the battle of the Trebbia, the reeling Roman Republic sent a new army under the over-confident consul Caius Flaminius to destroy the Carthaginian invaders – unbeknownst to him they were ready and waiting. The destruction of the Roman force at Lake Trasimene firmly established Hannibal as one of the Ancient World's greatest commanders thanks to his use of innovative tactics, including the first recorded use of a turning movement. The Romans would not send another major army to confront him until the battle of Cannae in 216 BC. This new study, based on recent archaeological work on the battlefield itself, tells the full story of one of Hannibal's greatest victories with the help of maps, full-colour illustrations, and detailed sections on the make-up of the armies and their commanders.

Hacker, Hoaxer, Whistleblower, Spy Gabriella Coleman,2015-10-06 The ultimate book on the worldwide movement of hackers, pranksters, and activists collectively known as Anonymous—by the writer the Huffington Post says “knows all of Anonymous’ deepest, darkest secrets” “A work of anthropology that sometimes echoes a John le Carré novel.” —Wired Half a dozen years ago, anthropologist Gabriella Coleman set out to study the rise of this global phenomenon just as some of its members were turning to political protest and dangerous disruption (before Anonymous shot to fame as a key player in the battles over WikiLeaks, the Arab Spring, and Occupy Wall Street). She ended up becoming so closely connected to Anonymous that the tricky story of her inside-outside status as Anon confidante, interpreter, and erstwhile mouthpiece forms one of the themes of this witty and entirely engrossing book. The narrative brims with details unearthed from within a notoriously mysterious subculture, whose semi-legendary tricksters—such as Topiary, tflow, Anachaos, and Sabu—emerge as complex, diverse, politically and culturally sophisticated people. Propelled by years of chats and encounters with a multitude of hackers, including imprisoned activist Jeremy Hammond and the double agent who helped put him away, Hector Monsegur, Hacker, Hoaxer, Whistleblower, Spy is filled with insights into the meaning of digital activism and little understood facets of culture in the Internet age, including the history of “trolling,” the ethics and metaphysics of hacking, and the origins and manifold meanings of “the lulz.”

Roman Republican Legionary 298-105 BC Nic Fields,2012-04-17 Soon after the Caudine Forks fiasco, where Roman citizens had suffered the humiliation of being forced to pass under the yoke, an act symbolising their loss of warrior status, the tactical formation adopted by the Roman army underwent a radical change. Introduced as part of the Servian reforms, the legion had originally operated as a Greek-style phalanx, a densely packed block of citizens wealthy enough to outfit themselves with the full panoply of an armoured spearman or hoplite. The function of a hoplite had been the privilege only of those who owned a certain amount of property, poorer citizens serving either as auxiliaries or as servants. Now, however, the Romans adopted the manipular system, whereby the legion was split into distinct battle lines, each consisting of tactical subunits, the maniples. In contrast to the one solid block of the phalanx, the legion was now divided into several small blocks, with spaces between them. The Romans, in other words, gave the phalanx 'joints' in order to secure flexibility, and what is more, each soldier, or legionary, had twice as much elbow room for individual action, which now involved swordplay instead of spear work. Even though still a citizen militia recruited from property owners supplying their own war gear, it was the manipular legion that faced Pyrrhus and his elephants, the Gauls and their long swords, Hannibal and his tactical genius, the Macedonians and their pikes, to name but a few of its formidable opponents. This book, therefore, will look at the recruitment (now based on age and experience as well as on wealth and status), training (now the responsibility of the state as opposed to the individual), weapons (new types being introduced, both native and foreign), equipment (ditto) and experiences (which included submission to a draconian regime of military discipline) of the legionary at the epoch of the middle Republic. The middle Republican era opens with the last great war with the Samnites (Third Samnite War, 298-290 BC) and closes with the Republic at the height of its imperial glory after the victory in North Africa (Iugurthine War 112-105 BC). The provisional legion in which the legionary served now exhibited many of the institutions and customs of the later professional legions, perhaps best reflected in one of its most notable practices, the construction of a temporary camp at the end of each day's march. Lest we forget, however, for our legionary, military service was not a career, but an obligation he owed to the state, and it was this militia army that conquered the peninsula of Italy, defeated the magnificent Hellenistic kingdoms and the mercantile empire of Carthage. All of the Mediterranean basin was now within the imperium of Rome, some of it organized into provinces governed by Roman magistrates, the rest reduced to client status. Romans were acquiring a sense that they possessed a world empire.

Medieval Weapons Robert D. Smith,Kelly DeVries,2007-04-20 This fascinating reference covers the weapons and armor used by warriors from the 4th to the 15th century and discusses how and why they changed over time. In the Middle Ages, the lack of standardized weapons meant that one warrior's arms were often quite different from another's, even when they were fighting on the same side. And with few major technological advances in that period, the evolution of those weapons over the centuries was incremental. But evolve they ultimately did, bringing arms, armor, and siege weapons to the threshold of the modern era. From the fall of the Roman Empire to the beginnings of the Renaissance, Medieval Weapons: An Illustrated History of Their Impact covers the inexorable transformation from warrior in the mail shirt to fully armored knight, from the days of spears and swords to the large-scale adoption of the handgun. Medieval Weapons covers this fascinating expanse of centuries in chapters devoted to the early medieval, Carolingian, Crusade, and late medieval periods. Within each period, the book details how weapons and armor were developed, what weapons were used for different types of battles, and how weapons and armor both influenced, and were influenced by, changing tactics in battles and sieges.

A Dictionary of Cebuano Visayan John Wolff,2016-01-27 This is a dictionary of Cebuano Visayan, the language of the central part of the Philippines and much of Mindanao. Although the explanations are given in English, the aim of this work is not to provide English equivalents but to explain Cebuano forms in terms of themselves. It is meant as a reference work for Cebuano speakers and as a tool for students of the Cebuano language. There is a total of some 25,000 entries and an addenda of 700 forms which were prepared after the dictionary had been composed. This dictionary is the product of eleven years work by more than a hundred persons. The work was edited by John Wolff but the sources are entirely native, and all illustrations are composed by native speakers. To date, this work probably represents the most authoritative dictionary of the Cebuano Visayan language.

Tuna Barbara Ann Block,Ernest Donald Stevens,2001 Annotation Tuna are biologically fascinating, with many specializations such as endothermy (warm-bloodedness), aerobic capacity, and migratory abilities. The primary focus of this book is the physiology of tuna with respect to biomechanics, thermoregulation, and morphology. An evolutionary and phylogenetic backdrop illustrates the importance of comparative perspectives. Because of the economic importance of tuna, a secondary focus of the book is tuna aquaculture and conservation.
