The Exhaustion of Difference Alberto Moreiras, 2001-09-26 The conditions for thinking about Latin America as a regional unit in transnational academic discourse have shifted over the past decades. In *The Exhaustion of Difference* Alberto Moreiras ponders the ramifications of this shift and draws on deconstruction, Marxian theory, philosophy, political economy, subaltern studies, literary criticism, and postcolonial studies to interrogate the minimal conditions for an effective critique of knowledge given the recent transformations of the contemporary world. What, asks Moreiras, is the function of critical reason in the present moment? What is regionalistic knowledge in the face of globalization? Can regionalistic knowledge be an effective tool for a critique of contemporary reason? What is the specificity of Latin Americanist reflection and how is it situated to deal with these questions? Through examinations of critical regionalism, restitutional excess, the historical genealogy of Latin American subalternism, testimonio literature, and the cultural politics of magical realism, Moreiras argues that while cultural studies is increasingly institutionalized and in danger of reproducing the dominant ideologies of late capitalism, it is also ripe for giving way to projects of theoretical reformulation. Ultimately, he claims, critical reason must abandon its allegiance to aesthetic-historicist projects and the destructive binaries upon which all cultural theories of modernity have been constructed. *The Exhaustion of Difference* makes a significant

contribution to the rethinking of Latin American cultural studies.

We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these paperbacks as a service so you don't have to. Beginning with a brief history of US-Panama relations and the development of the Panamanian Defense Forces, this book focuses principally on the military aspects of Operation 'Just Cause', and ends with a summary of the conflict's aftermath. Numerous photographs, and detailed color plates depict the actions of the armed forces units that executed this difficult, and controversial, operation.

Material Cultures of Childhood in Second World War Britain Gabriel Moshenska, 2019-04-01 How do children cope when their world is transformed by war? This book draws on memory narratives to construct an historical anthropology of childhood in Second World Britain, focusing on objects and spaces such as gas masks, air raid shelters and bombed-out buildings. In their struggles to cope with the fears and upheavals of wartime, with families divided and familiar landscapes lost or transformed, children reimagined and reshaped these material traces of conflict into toys, treasures and playgrounds. This study of the material worlds of wartime childhood offers a unique viewpoint into an extraordinary period in history with powerful resonances across global conflicts into the present day.

Assessment of Explosive Destruction Technologies for Specific Munitions at the Blue Grass and Pueblo Chemical Agent Destruction Pilot Plants National Research Council, Division on Engineering and Physical Sciences, Board on Army Science and Technology, Committee to Review Assembled Chemical Weapons Alternatives Program Detonation Technologies, 2009-04-22 The Army's ability to meet public and congressional demands to destroy expeditiously all of the U.S. declared chemical weapons would be enhanced by the selection and acquisition of appropriate explosive destruction technologies (EDTs) to augment the main technologies to be used to destroy the chemical weapons currently at the Blue Grass Army Depot (BGAD) in Kentucky and the Pueblo Chemical Depot (PCD) in Colorado. The Army is considering four EDTs for the destruction of chemical

weapons: three from private sector vendors, and a fourth, Army-developed explosive destruction system (EDS). This book updates earlier evaluations of these technologies, as well as any other viable detonation technologies, based on several considerations including process maturity, process efficacy, process throughput, process safety, public and regulatory acceptability, and secondary waste issues, among others. It also provides detailed information on each of the requirements at BGAD and PCD and rates each of the existing suitable EDTs plus the Army's EDS with respect to how well it satisfies these requirements.
