Human Dimension and Interior Space Julius Panero, Martin Zelnik, 2014-01-21 The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in the physical fit, or interface, between the human body and the various components of interior space. Human Dimension and Interior Space is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors, including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric tables, which provide the most current data available on human body size, organized by age and percentile

groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With *Human Dimension and Interior Space*, these standards are now accessible to all designers of interior environments.

Model-making David Neat,2013-12-21 Model-making: Materials and Methods focuses primarily on the wide variety of materials that can be employed to make models; those which have been favoured for a while and those which are relatively new. The book looks at how these materials behave and how to get the best out of them, then illustrates a range of relatively simple methods of building, shaping, modelling, surfacing and painting with them. Useful features of the book include: the different uses of models in various disciplines; the sequence of making; planning and construction, creating surfaces, painting and finishing; methods of casting, modelling and working with metals; step-by-step accounts of the making of specially selected examples; simple techniques without the need for expensive tools or workshop facilities; a 'Directory' of a full range of materials, together with an extensive list of suppliers. This book is intended for students of theatre production, art & architecture, animation and theatre/television set designers where accurate scale models are necessary, and is also of interest to anyone involved with the process of making forms in 3D and the challenge of making small-scale forms in general. Superbly illustrated with 185 colour photographs.

Paper Things Jennifer Richard Jacobson,2015-02-10 When forced to choose between staying with her guardian and being with her big brother, Ari chose her big brother. There's just one problem—Gage doesn't actually have a place to live. When Ari's mother died four years ago, she had two final wishes: that Ari and her older brother, Gage, would stay together always, and that Ari would go to Carter, the middle school for gifted students. So when nineteen-year-old Gage decides he can no longer live with their bossy guardian, Janna, Ari knows she has to go with him. But it's been two months, and Gage still hasn't found them an apartment. He and Ari have been "couch surfing," staying with Gage's friend in a tiny apartment,

crashing with Gage's girlfriend and two roommates, and if necessary, sneaking into a juvenile shelter to escape the cold Maine nights. But all of this jumping around makes it hard for Ari to keep up with her schoolwork, never mind her friendships, and getting into Carter starts to seem impossible. Will Ari be forced to break one of her promises to Mama? Told in an open, authentic voice, this nuanced story of hiding in plain sight may have readers thinking about homelessness in a whole new way.
