The Lok: A Book in the Partha Wars Series Tommy Rice,2017-11-20 The story unfolds on the Victorian retro modern world of Partha Terra, a world of magic and advanced steam power. The alien race known as the Razium whose unending wars destroyed their own worlds, took what was left of their armada and fought their way across the stars in search of the magical power of the Labrynthain gates. Under a flag of truce they betrayed their new found allies, and in a coup for power assassinated the King of Ultima Thule. Walker, one of the few surviving Spartan Paladins, the Kings personal guard, has to try and find the Kings only remaining son; the Prince Lincoln. The prince is a Lok or mage and is the only one alive who can use the power of the Tempest, an ability that allows him to open the magical gates of the Labrynthian. On his journey Walker meets Tasha, Commander of a mad gangster's personal army, and gets dragged into her plight against the Razium's allies, the outcast Elves of the Dru-Nar. Lincoln has been in hiding with his uncle Matias, the commander of a small fortress Castle in a southern province of Ultima Thule. Matias is secretly readying to take Lincoln to see the Lok masters of White City so he can learn to control his growing powers and use them to reunite the people of Ultima Thule. However, after 7 years of searching, Nemsor Vault, the diabolical leader of the Razium has found information about the Prince's location, and has sent his monstrous Zajust lords to find him. This is a fantastic journey of friendship, adventure, romance and combat that leads these characters on a collision course across the Planet. From the frozen castle prison of Ice Well, to the excessive Elven city of Royal. Follow the prince as he tries to unravel the mysteries of the Labrynthian, and the Spartan Paladin as he tries to find the prince, as he tries to find the LOK.

Maker Camp Delanie Holton-Fessler,2021-02-23 Classic and innovative hands-on projects for kids ages 3 and up designed to teach both heritage skills and how to think creatively. Handcraft is part of human nature: we build, we create, we innovate. The 20+ projects in this book from an experienced art educator weave a story of human innovation and creativity, from the very beginnings of building

shelters in the woods to tinkering with recycled materials. Heritage skills teach children how to be independent and capable makers; fiber and wood projects offer rewarding crafts that also teach planning, preparation, and safe risk taking; and tinkering activities connect the low-tech process of making and doing with innovation. From soap carving and knot tying to building toy cars and junk robots, this book brings the fun of making things with your hands to young kids and links skills of the past with the present. The book also explores how to set up a maker space and teaches foundational workshop practices that can easily be applied to the home studio. Each project offers extensions for different ages and abilities and provides guiding questions to enrich the experience for both the maker (teacher/parent) and the apprentice (child) to encourage and celebrate creative, practical play.

A House is Not a Home Bruce Weber, 1996 This is an insight into the idiosyncratic flourishes which make a house into a home. Photographer Bruce Weber takes the reader around the world, looking at how creative individuals' homes reflect their own particular personalities. Here are interiors and exteriors, panoramas and details: Siegfried and Roy's tiger-striped (and tiger-filled) Las Vegas suite; Georgia O'Keefe's ghost ranch in New Mexico; Chris Isaak's childhood home in suburban California; the Duchess of Devonshire's stately home in England; Andrew Wyeth's Maine lighthouse retreat; and Weber's own Montana ranch, among others.

Maakies Tony Millionaire, 2001 The very first Maakies compilation of every strip appearing from its inception in 1994 through to 1996. Millionaire focuses on the adventures of an alcoholic and suicidal crow, mixed with shockingly elegant depictions of nautical adventures. It's all uncannily crafted with Millionaire's breathtaking line, which eerily reproduces the feel and spirit of earlier classic newspaper strips. Designed by Millionaire and Chip Kidd, whose art direction and packaging of *Batman The Complete History* ensured his place as one of the all time greatest book designers.

Linguistic Relativity in SLA Zhaohong Han, Teresa Cadierno, 2010 Crosslinguistic influence is an established area of second language research, and as such, it has been subject to extensive scrutiny. Although the field has come a long way in understanding its general character, many issues still remain a conundrum, for example, why does transfer appear selective, and why does transfer never seem to go away for certain linguistic elements? Unlike most existing studies, which have focused on transfer at the surface form level, the present volume examines the relationship between thought and language, in particular thought as shaped by first language development and use, and its interaction with second language use. The chapters in this collection conceptually explore and empirically investigate the relevance of Slobin's thinking-for-speaking hypothesis to adult second language acquisition, offering compelling and enlightening evidence of the fundamental nature of crosslinguistic influence in adult second language acquisition This is a landmark publication - the first to concertedly address the implications for SLA of Slobin's thinking-for-speaking hypothesis. Do processes of conceptualisation that L1s predispose speakers to affect their L2 production, and if so in what ways? Can we 're-think' for L2 speaking, and what cognitive abilities enable this? The research issues this book raises are fundamentally important for SLA theory and pedagogy alike. Peter Robinson, Professor of Linguistics and SLA, Aoyama Gakuin University, Tokyo, Japan Language affects how we think. Slobin's (1996) thinking-for-speaking hypothesis concerns the ways that native language directs speakers' attention to pick those characteristics of events that are readily encodable therein. In this impressive collection, Han and Cadierno marshal strong support for effects of native language upon second language use, i.e. for 'rethinking-for-speaking'. A must-read for anybody interested in linguistic relativity and transfer in SLA. Nick Ellis, Professor of Psychology, University of Michigan, USA

Saving Nature's Legacy Reed F. Noss,Allen Cooperrider,Rodger Defenders of Wildlife,1994-04-01

Written by two leading conservation biologists, *Saving Nature's Legacy* is a thorough and readable introduction to issues of land management and conservation biology. It presents a broad, land-based approach to biodiversity conservation in the United States, with the authors succinctly translating principles, techniques, and findings of the ecological sciences into an accessible and practical plan for action. After laying the groundwork for biodiversity conservation -- what biodiversity is, why it is important, its status in North America -- Noss and Cooperrider consider the strengths and limitations of past and current approaches to land management. They then present the framework for a bold new strategy, with explicit guidelines on: inventorying biodiversity selecting areas for protection designing regional and continental reserve networks establishing monitoring programs setting priorities for getting the job done Throughout the volume, the authors provide in-depth assessments of what must be done to protect and restore the full spectrum of native biodiversity to the North American continent.
